TRANSACTIONS

Understanding most of the concepts introduced through this course is essential for any classroom teacher. Hence, curriculum transactions may involve lectures with adequate explanations and examples with reference to Indian context. Class discussions must follow theoretical introductions so that the student teachers are able to link this knowledge with whatever observations and reflections they are making in schools. Suggested library readings prior to the lecture will help student teachers to get familiarized with the notions and appropriate terms. Evaluations must focus on understanding the concepts and processes with reference to students with and without special needs.

In order to facilitate their meaningful empowerment, therefore, it is necessary to provide students with visual impairment skills and techniques which enable them to cope with these challenges. Developments, especially during and after World War II, have led to the emergence of a large variety of such strategies, skills and technologies, which are covered under the discipline titled Orientation and Mobility.

So, the present course carrying the same title introduces the learners to various crucial aspects of this vital subject. It is hoped that through the study of the course, the learners would be in a better position to understand the implications of vision loss with reference to independent movement. It would also enable them to get insights into basic skills and components essential for meaningful orientation and easy and graceful movement for the visually impaired.

Introduction

Communication, language and speech have always been at the centre stage when education of children with deafness is being discussed. Without going into much of judgemental discussions in the direction of 'either - or' options to be the 'best', this syllabus intends to expose the student teachers to all the dominant options. However, over and above the said exposure offered through compulsory courses, this optional course offers the student teachers an additional opportunity to sharpen the skills in one of the categories of options. Transactions

Curricular transactions of this course must involve skill based approach. This course being placed in the 4th semester, the students are expected to have adequate exposure of special school system, aural activities therein and the school environment. Lecturers of this course are expected to use those experiences while teaching theory component of this course. The transaction strategies however, must focus on skill development of aural oral techniques through observations (live or recorded) and reflecting upon it. Mock parent child conversations, demonstrations and practicing tuning speech and language to suit needs of CWHI etc are expected to support the understanding of student teachers. Unconventional ASK strategy of working first on Attitude, then on Skills and lastly backing it up with Knowledge or theory is expected to work better. Application in diverse situation and professional conviction needed for aural option can be focussed at the time of evaluations.

Transactions:

As the course title suggests, this course is expected to be completely an action / practice oriented experience. Lecturers are expected to touch upon basic theory in a rather summarised manner working basically towards skill development and professional conviction needed to apply manual option. Curricular transactions here must involve interactions with adults / adolescents with Deafness and their siblings. The optional course is an extension of the compulsory practical units learnt during the third semester. Brushing up earlier learnt skills and practicing them more in real life situations is therefore recommended. Extensive use of web based material on sign language is also suggested. Modern and communicative approach (as against close door structural approach) typically used for foreign language learning is to be used. Unconventional ASK strategy of working first on Attitude, then on Skills and lastly backing it up with Knowledge or theory is expected to work better. Application in diverse situation; importance to fluency and confidence rather than correctness and non purist approach to evaluation is recommended so that the student teachers become independent users of ISL.

Best outcomes in terms of understanding, skills and pro active attitude towards role of environment and family can be obtained if this course is well linked with experiences from F 1 (School internship) of the same semester. Discussions, case presentations, structured debates and mock family interactions are recommended as transaction strategies. Evaluations in the form of action oriented tasks rather than conventional written tasks are recommended for at least internal assessment.

Transactions

It is highly recommended that this course reaches meta-level understanding of own reading process by the student teachers. Hence lecturers are suggested to float the theory bare minimum focussing more on ‘insights through practice sessions’. To keep the motivation high and complexity low the transactions must involve hands on activities based on the units of the course. The terminology used in units is more for the understanding of the lecturers than the student teachers since this is a newly introduced course in this revised syllabus. Experiential discussions, team tasks and internalising learning by doing are expected to obtain best outcomes. Evaluation must target process of reflecting upon own personalised insights into reading and responding to texts. Hence, entire internal assessment must focus on progressions through activities rather than written tests.

Introduction:

India has an excellent historical backdrop as well as contemporary talents in the field of art. However, it is debatable whether the same has been translated into our school system effectively. Do most of our students get exposure to a variety of activities involving knowing, exploring and appreciating art? Most probably they do not. It is time that we take a fresh look at what art education is and what role it plays in school education. More than anything, art education is also expected to enhance learning. And do teachers know how to go about it to achieve it? Here is an opportunity to facilitate the art within you which in turn will reflect art in within students.

Important Note: for a student teacher with disability appropriate learning alternatives are to be given by the college. For example, a candidate with blindness must get alternative learning opportunities and evaluative tasks for visual art or a candidate with deafness for music art – if and when needed.
