Paper VIII Indian Economy II

Section-A

Foreign trade: Size, composition and direction of India's exports and imports, Structural changes in India's exports: changes in commodity composition, Move towards value addition, moving away from traditional exports towards new manufactured products, Exports of services, Causes and measures to correct unfavorable balance of trade, Foreign trade policy. Trends in India's balance of payments, Current account and capital account. IMF and WTO.

Section-B

Problems and challenges of Indian Economy, Unemployment and poverty: concepts and measurement of unemployment, strategies and policy for employment generation, Magnitude and determinants of poverty in India: state level poverty ratios, anti poverty programmes and role of MNREGA. Inflation and Fiscal policy: trends in whole sale prices and consumer prices, fiscal reforms, FRBM Act, Fiscal deficit and worsening state finances.

Paper – V: Real Analysis and Metric Space

Teaching : 3 Hours per Week

Duration of Examination : 3 Hours

Max. Marks: 85

Note: This paper is divided into FIVE Units. TWO questions will be set from each Unit. Candidates are required to attempt FIVE questions in all taking ONE question from each Unit. All questions carry equal marks.

Unit 1: Real numbers as complete ordered field, Limit point, Bolzano-Weierstrass theorem, Closed and Open sets, Union and Intersection of such sets. Concept of compactness. Heine-Borel theorem. Connected sets.

Real sequences- Limit and Convergence of a sequence, Monotonic sequences.

Unit 2: Cauchy's sequences. Subsequences, Cauchy's general principle of convergence. Properties of continuous functions on closed intervals. Properties of derivable functions. Darboux's and Rolle's theorem.

Unit 3: Notion of limit, continuity and differentiability for functions of two variables. Riemann integration – Lower and Upper Riemann integrals, Riemann integrability, Mean value theorem of integral calculus. Fundamental theorem of integral calculus.

Unit 4: Functions of bounded variations. Sequence and series of functions – Pointwise and Uniform convergence. Cauchy's criterion. Weierstrass M-test, Abel's test, Dirichlet's test for uniform convergence of series of functions. Uniform convergence and Continuity of series of functions. Term by term differentiation and integration.

Unit 5: Metric space – Definition and examples. Open and Closed sets, Interior and Closure of a set, Limit point of a set. Subspace of a metric space, Product space, Continuous mappings. Sequence in a metric space. Cauchy sequence.

Paper – VI: Differential Equations
Teaching : 3 Hours per Week
Duration of Examination : 3 Hours

Max. Marks: 85

Note: This paper is divided into FIVE Units. TWO questions will be set from each Unit. Candidates are required to attempt FIVE questions in all taking ONE question from each Unit. All questions carry equal marks.

Unit 1: Degree and order of a differential equation. Equations of first order and first degree. Equations in which the variables are separable. Homogeneous equations and equations reducible to homogeneous form. Linear equations and equations reducible to linear form. Exact differential equations and equations which can be made exact.

Unit 2: First order but higher degree differential equations solvable for x, y and p . Clairaut's form and singular solutions with Extraneous Loci. Linear differential equations with constant coefficients. Complimentary function and Particular integral.

Unit 3: Homogeneous linear differential equations, Simultaneous differential equations. Exact linear differential equations of n th order. Existence and uniqueness theorem.

Unit 4 : Linear differential equations of second order. Linear independence of solutions. Solution by transformation of the equation by changing the dependent variable/the independent variable. Factorization of operators. Method of variation of parameters. Method of undetermined coefficients.

Unit 5: Partial differential equations of the first order. Lagrange's linear equation. Charpit's general method of solution. Homogeneous and non-homogeneous linear partial differential equations with constant coefficients. Equations reducible to equations with constant coefficients.

Teaching : 3 Hours per Week

Duration of Examination : 3 Hours

Max. Marks: 85

Note: (i) This paper is divided into FIVE Units. TWO questions will be set from each Unit. Candidates are required to attempt FIVE questions in all taking ONE question from each Unit. All questions carry equal marks.

(ii) Non-Programmable Scientific Calculators are allowed.

Unit 1: Differences. Relation between differences and derivatives. Differences of a polynomial. Newton's formulae for forward and backward interpolation. Divided differences. Newton's divided difference, Lagrange's interpolation formula.

Unit 2: Central differences. Gauss's, Stirling's and Bessel's interpolation formulae. Numerical Differentiation. Derivatives from interpolation formulae. Numerical integration, Derivations of general quadrature formulas, Trapezoidal rule. Simpson's one-third, Simpson's three-eighth and Gauss's quadrature formulae.

Unit 3: Relation between the roots and coefficients of general polynomial equation in one variable, transformation of equations, Descartes's rule of signs, solution of cubic equations by Cardon's method, biquadratic equations by Ferrari's method.

Numerical solution of Algebraic and Transcendental equations. Bisection method. secant method. Regula-Falsi method. Iteration method. Newton- Raphson Method (derivation of formulae and rate of convergence only).

Unit 4: Gauss elimination and iterative methods (Jacobi and Gauss Seidal) for solving system of linear algebraic equations. Partial Pivoting method, ill conditioned systems. Numerical solutions of ordinary differential equations of first order with initial condition using Picard's, Euler and modified Euler's method.

Unit 5: Scalar and Vector point functions. Differentiation and integration of vector point functions. Directional derivative. Differential operators. Gradient, Divergence and Curl. Theorems of Gauss, Green, Stokes (without proof) and problems based on these theorems.

NOTE :-

1. There will be four theory Papers in Psychology in B.A. Honour Part-I. It would be common for Arts and Science. Each paper will be of 3 hours. It would comprise 3 Sections A, B and C and would cover the entire course content of the paper.

Section-A will contain 10 questions of 20 words consisting of 1.5 marks each. Thus, Part-A will be of 15 marks.

Section-B will contain 7 questions of 50 words each, out of which students are required to attempt 5 questions. Each question will be of 3 marks. Thus, Part-B will be of 15 marks.

Section-C will contain 3 long questions each with internal choice. Each question will be of 15 marks. Thus, Part-C will be of 45 marks.

For clarification the distribution of marks is tabulated as below:-

| B.A. Honours (Psychology) Part-I | | | |
