India is a Democracy and her Constitution embodies the basic principles of the democratic government how it comes into being what are its powers functions, responsibilities are and obligations how power is in various organs distributed. Whatever had been the original power base of the Constitution, today it seems to have assumed legitimacy as a highest norm of Public Law. The purpose of teaching constitutional law is to highlight its never-ending growth. Constitutional interpretation is bound to be influenced by social, economics or political predilections. A student must, therefore, learn how various interpretations of the constitution are possible and why a significant interpretation was adopted in a particular situation. Such a critical approach is necessary requirement in the study of constitutional law.

Judicial review is also one of the important aspects of constitutional law. India is the only country where the judiciary has the power to declare certain constitutional amendments. This course attempts to provide a **basic introduction** to evolution of Law of India. Study of Law relating to a particular country is not complete without understanding the history and development of the law and legal institution. A student of law should be exposed to the ancient social order and religious philosophy as well as to the systems of dispute settlement mechanisms existing in those days. The medieval period had influence in the development of legal system. The advent of the British was an event, which also had its influence.

**The traditions of the past have made our modern legal system what it is and still live on in it. #### **Aims and Objectives:**

The power to tax is an incident of sovereignty; and since the Constitution of India is the supreme law of the land, all other laws, including the Income Tax Act, are subordinate to the Constitution and must be read and interpreted in the light of the constitutional provisions. In *India Cement Ltd. v. State of Tamil Nadu*, a seven-judge Bench of Supreme Court observed that the Constitution is the mechanism under which the laws are to be made and not merely an Act which declares what the law is to be one of the most important provisions of the Constitution relating to taxation is art. 265, which provides No tax shall be levied or collected except by authority of law. Therefore, not only the levy but also the collection of a tax must be under the authority of some law. Law means law enacted by a competent legislature and cannot include an executive order, or a rule without express statutory authority, or a custom. Thus, any act of the state that seeks to impose a tax without legislative authority will be void.
