UNIVERSITY OF RAJASTHAN
JAIPUR

SYLLABUS

Bachelor of Computer Application

BCA Part-I Examination  2019
BCA Part-II Examination  2020
BCA Part-III Examination  2021
Bachelor of Computer Applications (BCA)

Eligibility for Admission to BCA course session 2014-2015: A candidate must have passed 10+2 examination (Arts/Science/Commerce) or equivalent with securing 48% or more (minimum pass mark for SC/ST/OBC/SBC candidates) in aggregate without any approximations.

In regard to reservation of Seats for admission to BCA Part I, the reservation policy of Govt. of Rajasthan/University of Rajasthan will be followed.

Admission Procedure: Admission to BCA Part I course will be made on the basis of merit list (10+2 level).

Attendance: A candidate shall be required to put in a minimum of 75% attendance at the lectures and 75% attendance at the practicals separately in each paper, as per university norms.

Scheme of Examination for Bachelor of Computer Applications (BCA):

The Bachelor of Computer Applications will be a Three Part Course in Faculty of Science extending over three academic sessions. Medium of instructions and examination will be English only. There shall be an examination at the end of each part. Each theory paper examination will be of three hour duration and shall carry 100 marks. Theory paper shall contain three parts. All questions are compulsory.

Part - I (very short answer) consists 10 questions of two marks each with two questions from each unit. Maximum limit for each question is up to 40 words.
Part - II (short answer) consists 5 questions of four marks each with one question from each unit. Maximum limit for each question is up to 80 words.
Part - III (Long answer) consists 5 questions of twelve marks each with one question from each unit with internal choice.

Each practical examination (maximum marks 100) will be of four hour duration on one day and carry 60 marks for exercises (3 exercises) assigned in the examination, 25 marks for viva-voce and 15 marks for practical records and regularity of the candidate. Other rules and procedures of examinations will be common to those for B.Sc. course.

A candidate will be promoted to Part III if he/she passed with 40% in three theory and two practical papers of Part II examination and with at least 50% in aggregate of these papers. However, if the candidate has not passed Part II examination then also he/she be promoted to part III if the number of the papers in part I & Part II together does not exceed four theory papers and two practical papers.

Promotion of Examination and Promotion to next Part: A candidate must pass in Part I with at least 40% marks in理论 papers. In Part II, the candidate must pass at least 50% marks in both theory and practical papers.

(1)
A candidate will be promoted to Part II if he/she has secured at least 40% in three theory and two practical papers of Part I examination and with at least 50% in aggregate of these papers. A candidate will be promoted to Part III if he/she has passed 40% in three theory and two practical papers of Part II examination and with at least 50% in aggregate of these papers, and has passed Part I examination.

Division and Honors: On successful passing out of all three part examinations (in first attempt), those securing 75% and above in aggregate of all the three parts will be awarded First division with Honors, and those securing between 60% or more but less than 75% will be awarded First division and rest will be awarded Second division.

BCA101: Elementary Physics

Question Paper pattern for Main University Examination

Max Marks: 100

Part - I (very short answer) consists 10 questions of two marks each with two questions from each unit
Maximum limit for each question is up to 40 words.
Part - II (short answer) consists 5 questions of four marks each with one question from each unit
Maximum limit for each question is up to 80 words.
Part - III (long answer) consists 5 questions of twelve marks each with one question from each unit
with internal choice.

UNIT - I
Electric charge, conductors and insulators, Coulomb's Law, quantization and conservation of
electric charge, the electric field, electric lines of force and Gauss’ Law of electrostatics, electric
potential energy, electric potential, energy and electrical power.
Capacitors, capacitance, capacitors in series and parallel, capacitors with dielectric. Electric
current, resistance, resistivity and conductivity, Ohm’s law, electromotive force, series and
parallel combination of resistances, current in a single loop, Kirchoff’s current law, Kirchoff’s
Voltage law.

UNIT - II
Magnetic field due to a bar magnet, Biot Savart’s law, magnetic field due to a current carrying coil,
Force between two parallel currents, Magnetic field inside solenoid and toroid, magnetic flux,
Faraday's law of electromagnetic induction, magnetic properties of matter, (diamagnetic,
paramagnetic, ferromagnetic and ferromagnetic materials), inductance, energy stored in an
inductor, LR circuits.

UNIT - III
Introduction to Logic and implementation with Logic Gates, Logic functions- NOT, AND, OR,
NOR, EX-NOR. Truth tables, Boolean Algebra, de Morgan’s theorems, Standard forms for
logical expressions, Sum of Products, Product of Sums specification of logical functions in terms
of Min terms and Max terms, Karnaugh Maps, simplification of logical functions, introduction of
“don’t care” states, Synthesis using only NAND or only NOR gates.

UNIT - IV
Combinational Circuits: Multiplexer-IC 74150 and IC 44151, De multiplexer-IC 74154, Decoder-
IC 74139, BCD to Seven segment Decoder IC 7446/7447 IC 748 Decoder to BCD
Priority Encoder IC 7447, parity checker IC 74180, Magnitude Comparator IC 7485

UNIT - V
Sequential Circuits: RS Flip Flop, Clocked RS Flip Flop, D Flip Flop, Edge Triggered D Flip
Flopp, master Slave Technology and its advantage. Shift Register as Flip Flop system, IC 7496,
UP DOWN Counter, 4-bit synchronous counters, 7-segment asynchronous counters, 7-seal
synchronous

Question Paper pattern for Main University Examination

Max Marks: 100

Part - I (very short answer) consists 10 questions of two marks each with two questions from each unit. Maximum limit for each question is up to 40 words.

Part - II (short answer) consists 5 questions of four marks each with one question from each unit. Maximum limit for each question is up to 80 words.

Part - III (Long answer) consists 5 questions of twelve marks each with one question from each unit with internal choice.

UNIT - I

Functions: Functions, domain & range of a function, types of functions-constant, identity, polynomial, exponential, logarithmic, trigonometric, inverse- trigonometric, rational, periodic, modulus signum and greatest integer functions with their graphs. Composite functions, Invertible Functions.

Function domain and range, one to one and onto functions, composite functions, inverse of functions, Binary operations.

UNIT - II

Matrices and Determinant: Definition and Types of Matrices, Addition, Subtraction and Multiplication of Matrices, Non-commutatively of multiplication of matrices and existence of non-zero matrices whose product is the zero matrix (restrict to square matrices of order 2), Scalar Multiplication, Transpose of a Matrix.

Determinant of a square matrix (up to 3x3 matrices), properties of determinants, minors, cofactors, expansion of determinants, application of determinants in finding the area of a triangle. Invertible matrices, Adjoint and Inverse of a matrix, Solution of system of linear equations by inverse matrix method and Cramer’s Rule, Eigen Values, Eigen Vectors.

UNIT - III

Co-ordinate Geometry: Cartesian co-ordinate system, Polar coordinate system, distance between two points, section formulae, Area of a triangle, Locus and its Equation.

Straight Line: Equation of straight line, slope form, two point form, intercept form, normal form, distance of a point from a line, condition of concurrency of three lines, Pair of straight lines, angle between two lines, equation of a line parallel or perpendicular to a given line, Standard equations of a Circle.

Quadratic Equation: Solution of Quadratic Equations, Nature of Roots, Solution of a quadratic equation by factorization method and Shridharaycharya’s formula, relation between the roots of a quadratic equation, formation of quadratic equation from given roots.
UNIT IV

UNIT V

Probability: Factorial notation n!, Combinations and Permutations, Classical approach of Probability- trial & events, exhaustive events, equally likely events, mutually exclusive events, favourable events, independent events. Classical or mathematical definition of probability. Law of addition of probabilities. Multiplication law of probability and conditional probability. Simple problems based on addition and multiplication law of probabilities.

BCA103: General English

Question Paper pattern for Main University Examination

Max Marks: 100

Part I (very short answer) consists 10 questions of two marks each with two questions from each unit.
Maximum limit for each question is up to 30 words.
Part II (short answer) consists 5 questions of four marks each with one question from each unit.
Maximum limit for each question is up to 60 words.
Part III (Long answer) consists 5 questions of twelve marks each with one question from each unit with internal choice.

UNIT I

UNIT-II

Written Communication: Objectives of written communication, Media of written communication, Merits and demerits of written communication, Planning business messages.

UNIT-III

Language Skills: Improving command in English, Choice of words, Common problems with verbs, adjectives, adverbs, pronouns, conjunctions, punctuation, prefix, suffix etc.

UNIT-IV

Oral Communication: Principles of effective oral communication, Media of oral communication, Advantages of oral communication, Disadvantages of oral communication. Styles of oral communication.

Arts of Listening: Good listening for improved communications, Art of listening. Meaning, nature and importance of listening. Principles of good listening, Barriers in listening.

UNIT V

Job Application: Types of application, Form & Content of an application, Drafting the application, Preparation of resume.

Project Presentations: Advantages & Disadvantages, Executive Summary, Charts, Distribution of time (presentation, questions & answers, summing up), Visual presentation, Guidelines for using visual aids, Electronic media (power-point presentation).

Question Paper pattern for Main University Examination

Max Marks: 100

Part - I (very short answer) consists 10 questions of two marks each with two questions from each unit
Maximum limit for each question is up to 40 words.

Part - II (short answer) consists 5 questions of four marks each with one question from each unit
Maximum limit for each question is up to 80 words.

Part - III (Long answer) consists 5 questions of twelve marks each with one question from each unit
with internal choice.

UNIT - I

UNIT - II

Fundamentals of C: History and importance of C, sample programming, basic structure and execution of C programs, constants, variables, and data types and various types of declarations, different types operators and expressions, evaluation of expressions, operator precedence and associativity. Managing input and output operations, decision making and branching decision making.

UNIT - III

Iteration: while, do..while, for loop, nested loops, break & continue, goto statements.

Arrays and Strings: One-dimensional arrays and their declaration and initialization, two-dimensional arrays and their initializations, character arrays (One and Two dimensional), reading and writing strings, string - handling functions.

UNIT - IV

Functions: Need and elements for user defined functions, definition of functions, return values and their types, function calls and declaration, recursion, parameter passing, passing arrays and strings to functions, the scope, visibility and life time of variables.

Understanding Pointers: Accessing the address of a variable, declaration and initialization of pointer variables, accessing a variable through its pointer, pointers and arrays, pointers and function arguments, functions returning pointers.

UNIT - V

Structures and Unions: Defining structure, declaring structure variable and accessing structure members, initialization of structure, operation on individual members and array of structures, union size of structure.

Data structures: Graphs and Trees, Traversals, Graphs, Trees, Tree traversal, Breadth First Traversal, Depth First Traversal.

BCA105: Computer Organization

Question Paper pattern for Main University Examination
Max Marks: 100

Part – I (very short answer) consists 10 questions of two marks each with two questions from each unit.
Maximum limit for each question is up to 40 words.
Part – II (short answer) consists 5 questions of four marks each with one question from each unit.
Maximum limit for each question is up to 80 words.
Part – III (Long answer) consists 5 questions of twelve marks each with one question from each unit
with internal choice.

UNIT-I

Computer System History and Architecture development von Neumann machine, Mother Board, System clock, Bus (Data, Address Control), Bus architecture (ISA, MCA, EISA, PCI, AGP), Expansion slots and cards (Network adapter cards, SCSI card, Sound card, TV tuner card, PC card), Ports (Serial Parallel, AGP, USB Fire Wire), cables (RS 232, BNC), Input devices
Output devices, Storage devices, random versus sequential access, formatting, tracks and sectors, speed, storage capacity, Floppy Disk, Hard Disk tracks, cylinders, sectors, Hard Drive Interfaces
Optical Disks, Magnetic tape, Modern (Fax/Data/Voice)

UNIT-II

Basic building blocks I/O, Memory, ALU and its components, Control Unit and its
functions. Instruction word, Instruction and Execution cycle, branch, skip, jump and shift instruction. Operation of control registers, Controlling of arithmetic operations,
Classification of Computers (Workstation, Mainframe, Super Computer, Client Server Computer, Notebook, Tablet, PalmTop Computer)

UNIT-III

Basics of Computer organization, system busses and instructions cycles, memory subsystem
organization, system busses and instruction cycles, memory subsystem organization
and interfacing, I/O subsystem organizations and interfacing. Register transfer languages.
CPU design specifying a CPU, design and implementation of a simple CPU (fetching instructions from memory, decoding and executing instructions, establishing required data paths, design of ALU, design of the control unit and design verification), design and implementation of
a simple microprocessor. Features of Pentium microprocessors.

UNIT-IV

Next time please send a clear image.
UNIT V

Buses, Interfacing buses. Bus formats – address, data and control, Interfacing keyboard, display, auxiliary storage devices and printers. I/O cards in personal computers.

Introduction to Microprocessors and Microcontrollers: introduction to 8085 microprocessor, examples of few instructions to understand addressing techniques. Difference between microprocessor and microcontrollers, RISC v/s CISC.

Recommended Books

BCA106: Office Management Tools

Question Paper pattern for Main University Examination

Max Marks: 100

Part – I (very short answer) consists 10 questions of two marks each with two questions from each unit
Maximum limit for each question is up to 40 words.

Part – II (short answer) consists 5 questions of four marks each with one question from each unit
Maximum limit for each question is up to 80 words.

Part – III (long answer) consists 5 questions of twelve marks each with one question from each unit with internal choice.

UNIT I

Introduction to Operating System: Introduction to Operating system, FAT and NT file systems, file and directory structures and naming rules of files, booting process, system files. Dos Commands (internal & external)

UNIT II

MS Word: Word processor, MS Word toolbar, creating, editing and opening documents in MS Word, insertion toolbar, underline, strikeout, bullet, number, paragraph formatting a document, alignment toolbar of MS Word, and other tools.
thesaurus, mail merge, handling graphics, tables, converting a Word document into various formats like text, rich text format, Word perfect, etc.

UNIT - III

MS Excel: Worksheet basics, creating worksheet, entering data into worksheet, data, text, dates, alphanumeric values saving & quitting worksheet, opening and moving around in an existing worksheet, Toolbars and menus, Keyboard shortcuts, working with single and multiple workbook, working with formula & cell referencing, Auto sum, coping formulas, absolute and relative addressing, formatting of worksheet, previewing & printing worksheet, Graphs and Charts, Database, macros, multiple worksheets-concepts.

UNIT - IV

Power Point: Creating and viewing a presentation, managing Slide Shows, navigating through a presentation, using hyperlinks, advanced navigation with action setting and action buttons, organizing formats with Master Slides, applying and modifying designs, adding graphics, multimedia and special effects.

UNIT - V

Microsoft Access: Planning a database (tables, queries, forms, reports), creating and editing database, customizing tables, linking tables, designing and using forms, modifying database structure, Sorting and Indexing database, querying a database and generating reports.

Max Marks: 100

Part - I (very short answer) consists 10 questions of two marks each with two questions from each unit. Maximum limit for each question is up to 40 words.

Part - II (short answer) consists 5 questions of four marks each with one question from each unit. Maximum limit for each question is up to 80 words.

Part - III (Long answer) consists 5 questions of twelve marks each with one question from each unit with internal choice.

UNIT- I

Number Systems: Number systems: natural numbers, integers, rational numbers, real numbers, complex numbers, arithmetic modulo a positive integer, Radix r representation (decimal and binary), Change of radix (decimal to binary and vice versa).

Binomial Theorem and Mathematical Induction: Binomial theorem for positive integral indices, general and middle term in binomial expansion with simple applications. Some simple problems of Principle of Mathematical induction.

Recurrence Relations and Generating Functions: Recurrence relation, linear recurrence relation with constant coefficients, solution of linear recurrence relation with constant coefficients. Generating functions, Solution of recurrence relations using generating functions.

UNIT- II

Sets: Definition of sets, representation of sets, type of sets, Operations on sets, Sub sets, Power set, Universal set, Complement of a set, Union and Intersection of two sets, Venn diagrams, De-Morgan's law of sets, Partition of sets, Duality Principles.

Relations: Relation, Types of relations- reflexive, symmetric, anti-symmetric, transitive, equivalence and partial order relation. Relation and digraphs, Cartesian product of two sets.

Functions: Function, domain and range, One to one and onto functions, composite functions, inverse of a functions. Binary operations.

UNIT - III

Logic and Proofs: Proposition, Conjunction, Disjunction, Negation, Compound proposition, Conditional propositions (Hypothesis, conclusion, necessary and sufficient condition) and Logical equivalence, De Morgan's law, Tautology and contradiction, quantifiers, universally quantified statements, component of a Mathematical system (axiorn, definitions, undefined terms, theorem, lemma and corollary), proofs (direct proofs, indirect proofs, proof by contra-positive), Mathematical Induction.

UNIT - IV

UNIT - V

Tree : Definition of tree, Fundamental terminologies-Node, Child, Parent, Root, Leaf, Level, Height and Subling. Rooted trees, Ordered trees, Binary tree, Complete binary tree, Tree of an algebraic expression, Tree searching ( traversals algorithms)- Preorder, Inorder and Postorder. Distance and centre, Relation between general tree and binary tree, Spanning trees, Algorithms for minimal spanning trees ( Kruskal’s and Prim’s). Game tree.

Part – III (Long answer) consists 5 questions of twelve marks each with one question from each unit with internal choice.

UNIT – I

UNIT – II

Basic Synchronization principles : Interactive processes coordinating processes, Semaphores, Shared memory multiprocessors, AND Synchronization, Inter-process communication, Inter-process messages, mailboxes.

Deadlocks, Race conditions, Status Modeling Handling deadlocks, deadlock detection and resolution, deadlock avoidance.
UNIT – III
Memory Management: Requirements on the primary memory, mapping the address space to primary memory, dynamic memory for data structures, Memory allocation (Fixed partition Memory allocation strategy), Dynamic Address Relocation, Memory Manager Strategies (Swapping, Virtual Memory, Shared Memory Multiprocessors). Virtual Memory: Address translation paging, Static and dynamic paging algorithms.

UNIT – IV

UNIT – V
Distributed Computing: Distributed process management, message passing, remote procedure call, distributed memory management, security in distributed environment, Introduction of Parallel Processing.

Recommended reference books:

Part - II (short answer) consists 5 questions of four marks each with one question from each unit.
Maximum limit for each question is up to 80 words.

Part - III (Long answer) consists 5 questions of twelve marks each with one question from each unit with internal choice.

UNIT – I
Database System Concepts & Architecture: Overview of DBMS, Basic DBMS terminologies. Database system vs. file system, Advantages and disadvantages of DBMS. Data independence, Architecture of DBMS, Schema, Instance, Database.
UNIT-II

Data Modeling: Data modeling using the Entity Relationship Model: ER model concepts, notation for ER diagram, mapping constraints, keys, Concepts of Super Key, candidate key, primary key, Generalization, aggregation.
Relational Algebra: Fundamental operations of relational algebra & their implementation, interdependence of operations.

UNIT-III

Database Design: Functional dependencies, loss less decomposition, 1st, 2nd & 3rd normal forms, dependency preservation, boyce codd NF. Introduction to Transactions, transaction states.

UNIT-IV

Introduction to SQL: Characteristics of SQL, Advantages of SQL, SQL data types and literals, Types of SQL commands, SQL operators and their procedure, Tables, views and indexes, Queries and sub queries, Aggregate functions, insert, update and delete operations, Joins, Unions, Intersection, Minus in SQL.

UNIT-V

Introduction to Advance DBMS:
Object-based Databases: Object-Oriented Databases: Object-oriented data model, Object Oriented Languages, Persistent Programming Languages. Object-Relational Databases: Nested Relations, Storage for Object Databases
Distributed Databases: Distributed Data Storage, Distributed Transactions, Commit protocol, Concurrency Control in Distributed Databases, Availability, Distributed Query Processing

Question Paper pattern for Main University Examination

Max Marks: 100

Part - I (very short answer) consists 10 questions of two marks each with two questions from each unit.
Maximum limit for each question is up to 40 words.
Part - II (short answer) consists 5 questions of four marks each with one question from each unit.
Maximum limit for each question is up to 80 words.
Part - III (long answer) consists 5 questions of twelve marks each with one question from each unit with
internal choice.

UNIT - I

World Wide Web: Elements of the Web, Web browser and its types, viewing pages with a browser, using a
browser for Mail, News and chat, Security and Privacy issues (cookies, firewalls, executable Applets and
scripts, blocking system), Plug-Ins and Active controls, dealing with Web pages that contain Active X,
playing streaming Audio and Video, playing MP music. Using Search engines, subscriptions and channels,
making use of web resources (Portal, News and weather, sports Personal Financing and Investing,
Entertainment, shopping, Computers and Internet, Travel, Health and Medicine, Communities and Clubs).

UNIT - II

HTML Fundamentals: Introduction to HTML, Creating HTML Pages, incorporating Horizontal Rules and
Graphical Elements, Hyper-links, Creating HTML Tables, Creating HTML Forms, HTML Image
Techniques, HTML and Page, Frames, Development of Website and Webpage (Planning, Navigation and
Themes, Elements of a Web page, steps of creating a site, publishing and publicizing site structuring web site.

UNIT-III

Introduction to DHTML: Features of DHTML, CSS: Types of Style sheets, Different elements of Style
sheets, Filter effects, IFrame, DIV and Layer Tags.

UNIT-IV

Java Script Fundamental: Introduction to Java Script Working with Variables and Data Functions, Methods
and Events, Controlling Programming Flow. The Java Script Object Model Java Script language Objects,
Developing Interactive Forms, Cookies and Java Script Security Controlling Frames in Java Script, Client -
Side Java Script Custom, JavaScript Objects. Introduction to JQuery and AJAX.

UNIT - V

Introduction of Photoshop
Creating a New File:- Main Selections, Picking color, Filling a selection with color, More ways to choose
colors and fill selections, Painting with paintbrush tool, Using the magic wand tool and applying a filter,
Saving your document (save your file:- Save file as a JPEG, TIFF, GIF, PNG), Introduction and use of layers,
Introduction and use of tool of PhotoShop.

Introduction to Coral draw-
Introduction to coral draw, use and importance in designing, various graphic file and file extension, vector
image and raster images, introduction to screen and work area.
Introduction and use of tool of coral draw.

BCA206 (A) : Object Oriented Concepts (Through ‘C++’)

Question Paper pattern for Main University Examination

Max Marks: 100

Part - I (very short answer) consists 10 questions of two marks each with two questions from each unit. Maximum limit for each question is up to 40 words.
Part - II (short answer) consists 5 questions of four marks each with one question from each unit. Maximum limit for each question is up to 80 words.
Part - III (Long answer) consists 5 questions of twelve marks each with one question from each unit with internal choice.

UNIT - I
Introduction to Object Oriented Concepts: Evolution of OOP, OOP Paradigm, advantages of OOP, comparison between functional programming and OOP approach, characteristics of object oriented language - objects, classes, inheritance, reusability, user defined data types, polymorphism, overloading.

UNIT - II
Introduction to C++: C++ tokens, data types, C++ operators, type conversion, variable declaration, arrays, statements, expressions, conditional statements, Jumping statements, loops, functions, pointers, structures.

UNIT - III
Classes and Objects: Classes, objects, defining member functions, arrays of class objects, pointers and classes, passing objects, constructors, types of constructors, destructors, this pointer, access specifiers, friend functions, inline functions.

UNIT - IV
Inheritance: Introduction, Importance of Inheritance, types of inheritance, Constructor and Destructor in derived classes.
Polymorphism: Function overloading, operator overloading, virtual functions, pure virtual functions.

UNIT - V
File Management: Handling Data files (sequential and random), Opening and closing of files, stream state member functions, Operations on Files. Templates, Exception Handling.

Reference Books

6. Deitel and deitel; How to program C++, Addison Wesley, Pearson Education Aisa
BCA206 (B) : Programming through VB 6.0

Question Paper pattern for Main University Examination

Max Marks: 100

Part - I (very short answer) consists 10 questions of two marks each with two questions from each unit.
Maximum limit for each question is up to 40 words.
Part - II (short answer) consists 5 questions of four marks each with one question from each unit.
Maximum limit for each question is up to 80 words.
Part - III (Long answer) consists 5 questions of twelve marks each with one question from each unit with internal choice.

UNIT - I

Introduction - Introduction Graphical User Interface (GUI), Programming Language (Procedural, Object Oriented, Event Driven), The Visual Basic Environment, Editions of Visual Basic, Features of VB, How to use VB compiler, debug and run the programs, Introduction to tool box, object naming conventions, setting properties, Methods and Events, Working with basic objects - forms, labels, textboxes, command buttons, option button, check box, Frame and Image.

UNIT - II

Programming Fundamentals - Data types in VB, Variables and Declaration, Scope of variables, Operators in VB, sub procedures and functions, Control structures - IF, Select .case, Do while ...loop, Do ... loop while, Do ... loop until, For ..Next, Exit For, Exit Do, With .. End With. Fixed size and Dynamic Arrays, control array, Data type conversion functions, VB Built in functions - Date, time, Format and String.

UNIT - III

Additional Controls and Menus - List box and combo box controls, Scroll bars, Picture box control, Shape and line controls, Timer control, Menu basics, Menu Editor, Creating menus, Assigning access keys and short cuts, Separating menu items, creating popup menus, controlling menus at run time.

UNIT - IV

Dialog Boxes, Mouse Events, MDI Forms and Error Handling - Standard, Custom and Common Dialog Control and Mouse Events, Creating and using MDI Form, Arranging the child forms, Adjusting the size of controls, Runtime errors, Handling runtime errors by on error .. Statements, Err object, Debug and immediate window.

UNIT - V

Database Connectivity and Crystal Reports - Connecting with databases through ADODC control, Bounded and unbounded methods for displaying data, Accessing and Navigating database, Recordsets - Tabletype, Dynaset, snapshot, dynamic and forward only, connecting database using connection string, Introduction to crystal reports, sections of report, creation of report using database, linking report with vb programs.

Practical Lab Exercises based on Theory Paper BCA-206(B)
BCA Part - III

BCA301 : Data Structure (Using C/ C++)

Question Paper pattern for Main University Examination

Max Marks: 100

Part - I (very short answer) consists 10 questions of two marks each with two questions from each unit.
Maximum limit for each question is up to 40 words.
Part - II (short answer) consists 5 questions of four marks each with one question from each unit.
Maximum limit for each question is up to 80 words.
Part - III (Long answer) consists 5 questions of twelve marks each with one question from each unit with internal choice.

UNIT – I

Introduction to Algorithm Design: Algorithm, its characteristics, efficiency of algorithms, analyzing Algorithms and problems.

Linear Structure: Arrays, records, stack, operation on stack, implementation of stack as an array, queue, types of queues, operations on queue, implementation of queue.

UNIT – II

Linked Structure: List representation, Polish notations, operations on linked list - get node and free node operation, implementing the list operation, inserting into an ordered linked list, deleting, circular linked list, doubly linked list, implementation of stack and queues using linked list.

UNIT – III

Tree Structure: Concept and terminology, Types of trees, Binary search tree, inserting, deleting and searching into binary search tree, implementing the insert, search and delete algorithms, tree traversals, Huffman's algorithm.

UNIT – IV

Graph Structure: Graph representation - Adjacency matrix, adjacency list, Warshall's algorithm, adjacency multilist representation. Orthogonal representation of graph. Graph traversals - bfs and dfs. Shortest path, all pairs of shortest paths, transitive closure, reflexive transitive closure.

UNIT – V

Searching and sorting: Searching - sequential searching, binary searching, hashing. Sorting - selection sort, bubble sort, quick sort, heap sort, merge sort, and insertion sort, efficiency considerations.

BCA302 : System Design Concepts

Question Paper pattern for Main University Examination

Max Marks: 100

Part - I (very short answer) consists 10 questions of two marks each with two questions from each unit.
Maximum limit for each question is up to 40 words.
Part - II (short answer) consists 5 questions of four marks each with one question from each unit.
Maximum limit for each question is up to 80 words.
Part - III (Long answer) consists 5 questions of twelve marks each with one question from each unit with internal choice.

UNIT - I

Introduction to Systems Design Environment:
Systems Development Approaches-Function Oriented, Data Oriented, Object Oriented, Development Process, Methodologies, Tools, Modeling Methods, Processing Types and Systems, Batch Processing, Realtime Processing.

UNIT - II

UNIT - III

Testing fundamentals: Objectives, principles, testability, Test cases: White box & Black box testing strategies: verification & validation, UNIT test, integration testing, validation, testing, system testing, System Implementation, Maintenance and documentation, Document Configurations Maintaining a Configuration.

UNIT - IV

UNIT - V

BCA303: Networking Technologies

Question Paper pattern for Main University Examination

Max Marks: 100

Part – I (very short answer) consists 10 questions of two marks each with two questions from each unit.
Maximum limit for each question is up to 40 words.
Part – II (short answer) consists 5 questions of four marks each with one question from each unit.
Maximum limit for each question is up to 80 words.
Part – III (Long answer) consists 5 questions of twelve marks each with one question from each unit with internal choice.

UNIT-I

Network architecture, configuring network, network strategies, networks types, LAN, MAN and WAN [basic concepts, Line configuration, topology, transmission mode, identify key components of network, categories of network, differentiating between LAN, MAN, WANS and Internet].

UNIT-II

The OSI model, The physical layer (bandwidth limited signals, transmission media, wireless transmission), the data link layer, error detection and correction, data link protocols, Bridges, the network layer in routing algorithm, congestion control algorithm, internet working, the transport layer, the application layer, MAC protocols for high speed LANs.

UNIT-III

Introduction to TCP/IP [Understand the TCP/IP Protocol Suite, its history and modification processes, compare TCP/IP to the Open Systems Interconnection (OSI) reference model, Examine a number of TCP/IP applications such as FTP, Telnet, DNS, DHCP, Bootp, connection-less inter-networking: IP, IPv6, IP multicast time Routing protocol - RIP, BGP, OSPF, SMNP, and MIB, HTTP]
UNIT-IV
Circuit Switching: Simple switching Network, Circuit Switching Networks, Brief idea of following (detail working) not required:
- Circuit Switching Concepts: Space Division switching, Time Division Multiplexing,
- Data Encoding: Spread Spectrum, Asynchronous and Synchronous transmission, Full and Half duplex, Interfacing, Functional and Procedural aspects of V.24,

UNIT-V
Data Communication Systems, Serial Data formats, encoded data formats, error detection and correction, information about microwave, information about microwave in Communications, Satellite, Geosynchronous Satellites and optical fiber communication
[Basic concept of light propagation, Fiber Cables, Optical fiber versus Metallic cable facilities, Light sources, Optical Detectors, Fiber cable losses, SONET, ISDN, DSL

Recommended Books:
1. William Stallings: Data & Communications, Sixth Edition
2. A. S. Tanenbaum: Computer Networks

BCA304: Core Java Programming

Question Paper pattern for Main University Examination
Max Marks: 100

Part – I (very short answer) consists 10 questions of two marks each with two questions from each unit. Maximum limit for each question is up to 40 words.
Part – II (short answer) consists 5 questions of four marks each with one question from each unit. Maximum limit for each question is up to 80 words.
Part – III (Long answer) consists 5 questions of twelve marks each with one question from each unit with internal choice.

UNIT – I
Overview of Object Oriented Concepts in Java.
Introduction: getting and installing the Java Development Kit, Java features like security, portability, byte code, java virtual machine, object oriented, robust, multithreading, architectural neutral, distributed and dynamic, Java programming language structure and syntax, control statements (The If statement, Logical Operators, The Conditional Operator, the Switch Statement, Variable Scope, Loops).

UNIT – II
Java arrays, Java Strings, Operations on Strings and StringBuffer Objects, Class, Objects, Methods and Problem solving using classes, objects and relationships.
Inheritance, types of Inheritance, packages and interface, exception handling
UNIT - III
Java utilities like java.lang, java.util, java.io, GUI in Java using AWT and Swing, Event Handling Mechanisms, AWT based effective GUI in Java: Detailed overview of AWT classes, Graphics primitives and UI Components, Layout features, Standalone GUI applications, Layout Managers, Implementation of event driven mechanism, Delegation of event model, Listeners and Adapters, Inner classes.

UNIT - IV
Applets: Introduction to Applet coding, Applet life cycle, Graphics facility, Color and Font, Passing—parameters to applets, Apletcontext, Inter Applet Communication.

UNIT - V
Overview of Networking in Java: URL class and its usage through connection, Sockets based connectivity, TCP/IP Sockets and server sockets, Datagram Sockets. Collections in Java: Array List, stack, queue, Hash table, Collection class hierarchy, JDBC and Jar files.

Part – II (short answer) consists 5 questions of four marks each with one question from each unit. Maximum limit for each question is up to 80 words.

Part – III (Long answer) consists 5 questions of twelve marks each with one question from each unit with internal choice.

UNIT - I

Business to Business Electronic Commerce: Inter-organizational transactions, Electronic markets, Electronic data interchange (EDI), EDI: the nuts and bolts, EDI and Business Inter organizational E-Commerce.

UNIT - II

UNIT - III

Implementation: Understanding Implementation. Applying Implementation Planning with example, Challenges and Opportunities of Implementation Planning.

UNIT - IV

Electronic Payment Systems: Special features required in payment systems, Types of E-payment systems, E-Cash, E-cheque, credit card, Smart Card, Electronic Purses, E-Marketing, E-Customer Relationship Management, E Supply Chain Management.

UNIT - V

Introduction to e-banking: Definition, Transaction websites components, E-Banking support services, Wireless Banking.

E-Banking Risk: Transaction/Operation Risk, Credit Risk, Liquidity/Internet Risk, Price Risk, Strategic Risk, Reputation Risk.

Introduction to M-Commerce: Business using smart devices (Mobile, e-wallet, online shopping and payment system via mobile, security and privacy features), Mobile delivery technology, applications of M Commerce. M Wallet, Mobile Shopping.

Question Paper pattern for Main University Examination

Marks: 100

Max

Part – I (very short answer) consists 10 questions of two marks each with two questions from each unit. Maximum limit for each question is up to 40 words.

Part – II (short answer) consists 5 questions of four marks each with one question from each unit. Maximum limit for each question is up to 80 words.

Part – III (Long answer) consists 5 questions of twelve marks each with one question from each unit with internal choice.

UNIT-I

Introduction to .Net framework: Managed Code and the CLR Intermediate Language, Metadata and JIT Compilation Automatic Memory Management

Elements: Variable and constants data types, declaration. Operators, types precedence, Expressions Program flow, Decision statements, properties, delegate, inlexer, attributes, Loop statements.

UNIT-II

Types: Structures, Enumerations, Reference data types, arrays.

Windows Programming: Creating windows forms windows controls, Button, Check box, COMBO box, Label, List box Radio Button, Text box, Events, Click, close deactivate, Load, mousemove, mousedown, mouseup.

Menus and Dialog Boxes: Creating menus, menu items, context menu, Using dialog boxes, show dialog() method.

UNIT - III

ADO.NET: Architecture of ADO.NET, ADO.NET providers, Connection, Command, Data Adapter, Dataset, Connecting to Data Source, Accessing Data with Data set and Data reader, Create an ADO.NET application, Using Stored Procedures.

UNIT-IV

UNIT-V

Creating Web Controls: Web Controls, HTML Controls, Using Internist Control, Using Input Validation Controls, Selecting Controls for Applications, Data Controls and Adding web controls to a page.

Creating Web Forms: Server Controls, Types of Server Controls, state management- Types and applications, Adding ASP.NET Code to a page.

Web Services and WCF: Introduction to Web Services protocol and standards WSDL Documents-Visual Studio.NET Architecture of WCF, WCF Client

BCA306 (B): Advance Technologies of Programming through PHP

Question Paper pattern for Main University Examination

Max Marks: 100

Part – I (very short answer) consists 10 questions of two marks each with two questions from each unit.
Maximum limit for each question is up to 40 words.
Part – II (short answer) consists 5 questions of four marks each with one question from each unit.
Maximum limit for each question is up to 80 words.
Part – III (Long answer) consists 5 questions of twelve marks each with one question from each unit with internal choice.

UNIT - I

Introduction to PHP: Server side Scripting Vs Client Side Scripting, Evaluation of PHP, Features of Php, Basic Syntax, Variable and constant, Data types, Operators and Expressions.

UNIT - II

Decision Making: If, Multiple Ifs, Nested Ifs, Loops (while, do...while, for loop, foreach), Nested Loops, Jumping Statement.
Arrays: Numeric, Associative and Multidimensional Arrays

UNIT-III

Strings: Creating and accessing String, Searching & Replacing String, Formatting String, String Related Library function, Pattern matching, Replacing text, Splitting a string with a Regular Expression

Functions: Defining a Function, Calling a Function, Parameter passing, Returning value from function

UNIT-IV

Form Data Handling: $_GET, $_POST, $_REQUEST Variables, Cookies handling, Session Management, URL encryption and security functions.
Exception Handling: Understanding Exception and error, Try, catch, throw

UNIT-V

File Handling: Opening and closing a file, Copying, renaming and deleting a file
Database Handling: Connection with MySql Database or ODBC, Performing basic database, operation (Insert, Delete, Update, Select), Setting query parameter.

Question Paper pattern for Main University Examination  

Max Marks: 100

Part – I (very short answer) consists 10 questions of two marks each with two questions from each unit. 
Maximum limit for each question is up to 40 words.
Part – II (short answer) consists 5 questions of four marks each with one question from each unit. 
Maximum limit for each question is up to 80 words.
Part – III (Long answer) consists 5 questions of twelve marks each with one question from each unit with internal choice.

UNIT-I

The Operating System: Linux history, Linux features, Linux distributions, Linux’s relationship to Unix, Overview of Linux architecture, Installation, Booting, Login and Shutdown Process, Start up scripts, controlling processes, system processes (an overview, Types of users, the powers of Root, managing users (adding and deleting); using the command line. Introduction to Linux Security.

UNIT-II

UNIT-III

Filter-The grep family, advanced filters-sed and awk vi editor: General startup of vi editor and it modes, Creating and editing files, features of vi, screen movement, cursor movement insertion, deletion searching, submitting operations, yank put, delete commands reading & writing files.

UNIT-IV

Shell: meaning and purpose of shell, introduction to types of shell, the command line, standard input and standard output, redirection pipes, filters special characters for searching files and pathnames.

UNIT-V

Shell programming shell Meta character local and global shell variables- interactive shell scripts -shell script arguments- looping and making choice- for loop, case, while and until, shell functions eval.
