SYLLABUS

Bachelor of Computer Application

B.C.A. Part-I Examination 2021
B.C.A. Part-II Examination 2022
B.C.A. Part-III Examination 2023
Bachelor of Computer Applications (BCA)

Eligibility for Admission to BCA course session 2014-2015: "A candidate must have passed 10+2 examination (Arts/Science/Commerce) or equivalent with securing 48% or more (minimum pass mark for SC/ST/OBC/SBC candidates) in aggregate without any approximations".

In regard to reservation of seats for admission to BCA Part I, the reservation policy of Govt. of Rajasthan/University of Rajasthan will be followed.

Admission Procedure: Admission to BCA Part I course will be made on the basis of merit list (10+2 level).

Attendance: A candidate shall be required to put in a minimum of 75% attendance at the lectures and 75% attendance at the practicals separately in each paper, as per university norms.

Scheme of Examination for Bachelor of Computer Applications (BCA):

The Bachelor of Computer Applications will be a Three Part Course in Faculty of Science extending over three academic sessions. Medium of instructions and examination will be English only. There shall be an examination at the end of each part. Each theory paper examination will be of three hour duration and shall carry 100 marks. Theory paper shall contain three parts. All questions are compulsory.

Part - I (very short answer) consists 10 questions of two marks each with two questions from each unit. Maximum limit for each question is up to 40 words.
Part - II (short answer) consists 5 questions of four marks each with one question from each unit. Maximum limit for each question is up to 80 words.
Part - III (Long answer) consists 5 questions of twelve marks each with one question from each unit with internal choice.

Each practical examination (Maximum marks 100) will be of four hour duration on one day and carry 60 marks for exercises (3 exercises assigned in the examination, 25 marks for viva-voce and 15 marks for practical records and regularity of the candidate. Other rules and procedures of examinations will be common to those for B.Sc. course.

"A candidate will be promoted to Part III if he/she passed in three theory and two practical papers of Part II examination and with at least 50% in aggregate of these papers. However, if the candidate has not passed Part II examination then also he/she be promoted to Part III if the number of due papers (part I & Part II together) does not exceed four theory papers and two practical papers."

Passing of Examinations and Promotion to next Part: A candidate must secure at least 40 marks in each paper and 40% marks in aggregate for passing paper examination. A
candidate will be promoted to part II if he/she has secured at least 40% in three theory and two practical papers of part I examination and with at least 50% in aggregate of these papers. A candidate will be promoted to Part III if he/she has passed 40% in three theory and two practical papers of Part II examination and with at least 50% in aggregate of these papers, and has passed Part I examination.

Division and Honors: On successful passing out of all three part examinations (in first attempt), those securing 75% and above in aggregate of all the three parts will be awarded First division with Honors, and those securing between 60% or more but less than 75% will be awarded First division and rest will be awarded Second division.

BCA101: Elementary Physics

Question Paper pattern for Main University Examination  Max Marks: 100

Part - I (very short answer) consists 10 questions of two marks each with two questions from each unit. Maximum limit for each question is up to 40 words.

Part - II (short answer) consists 5 questions of four marks each with one question from each unit. Maximum limit for each question is up to 80 words.

Part - III (long answer) consists 5 questions of twelve marks each with one question from each unit with internal choice.

UNIT-I

Electric charge, conductors and insulators, Coulomb's Law, quantization and conservation of electric charge, the electric field, electric lines of force and Gauss' Law of electrostatics, electric potential energy, electric potential, energy and electrical power. Capacitors, capacitance, capacitors in series and parallel, capacitors with dielectric. Electric current, resistance, resistivity and conductivity, Ohm's law, electromotive force, series and parallel combination of resistances, current in a single loop, Kirchhoff's current law, Kirchhoff's Voltage law.

UNIT-II

Magnetic field due to a bar magnet, Biot Savart's law, magnetic field due to a current carrying coil, Force between two parallel currents, Magnetic field inside solenoid and toroid, magnetic flux, Faraday's law of electromagnetic induction, magnetic properties of matter, (diamagnetic, paramagnetic, ferromagnetic and ferromagnetic materials). inductance, energy stored in an inductor, LR circuits.

UNIT-III

Introduction to Logic and implementation with Logic Gates, Logic functions-NOT, AND, OR, NOR, EX-NOR. Truth tables, Boolean Algebra, de Morgan's theorems, Standard forms for logical expressions. Sum of Products, Product of Sums. specification of logical functions in terms of Minterms and Maxterms, Karnaugh Maps, simplification of logical functions, introduction of "don't care" states, Synthesis using only NAND or only NOR gates.

UNIT - IV

Combinational Circuits: Multiplexer-IC 74150 and IC 44151, De multiplexer-IC 74154, Deculator-IC 74139, BCD to Seven segment Dec-coder IC 7446/7447 IC 7448/7449 Decimal to BCD Priority Encoder IC 74148, parity Checker IC 74118, Magnitude Comparator IC 7485.

UNIT - V

Sequential Circuits: RS Flip Flop, Clocked RS Flip Flop, D Flip Flop, Edge Triggered D Flip Flop, master-Slave Technology and its advantage. Shift Register as Flip Flop system, IC 7496, UP/DOWN counters 74 series asynchronous counters 74 series synchronous

Question Paper pattern for Main University Examination

Max Marks: 100

Part - I (very short answer consists 10 questions of two marks each with two questions from each unit. Maximum limit for each question is up to 40 words

Part - II (short answer) consists 5 questions of four marks each with one question from each unit. Maximum limit for each question is up to 80 words

Part -III (Long answer) consists of 5 questions of Twelve Marks each with one question from each unit and with internal choice.

Unit- I

Functions: Functions, domain & range of a function, types of functions-constant, identity, polynomial, exponential, logarithmic, trigonometric, inverse-trigonometric, rational, periodic, modulus, signum and greatest integer functions with their graphs. Composite functions, Invertible Functions. Function domain and range, one to one and onto functions, composite functions, inverse of functions. Binary operations.

Unit-II

Matrices and Determinant: Definition and Types of Matrices, Addition, Subtraction and Multiplication of Matrices, Non-commutatively of multiplication of matrices and existence of non-zero matrices whose product is the zero matrix (restrict to square matrices of order 2), Scalar Multiplication. Transpose of a Matrix. Determinant of a square matrix (up to 3x3 matrices), properties of determinants, minors, cofactors. expansion of determinants, application of determinants in finding the area of a triangle. Invertible matrices. Adjoint and inverse of a matrix, Solution of system of linear equations by inverse matrix method and Cramer's Rule, Eigen Values, Eigen Vectors.

UNIT III

UNIT- IV

UNIT-V

Probability: Factorial notation n!, Combinations and Permutations, Classical approach of Probability - trial & events, exhaustive events, equally likely events, mutually exclusive events, favourable events, independent events. Classical or mathematical definition of probability. Law of addition of probabilities. Multiplication law of probability and conditional probability. Simple problems based on addition and multiplication law of probabilities.

Question Paper pattern for Main University Examination

Max Marks: 100

Part - I (very short answer) consists 10 questions of two marks each with two questions from each unit. Maximum limit for each question is up to 40 words

Part - II (short answer) consists 5 questions’ of four marks each with one question from each unit. Maximum limit for each question is up to 80 words

Part –III (Long answer) consists of 5 questions of Twelve Marks each with one question from each unit and with internal choice.

UNIT-I

UNIT-II
Written Communication: Objectives of written Communication, Merits and demerits of written communication, Planning business messages.

UNIT-III
Language Skills: Importance of Vocabulary: Choice of words. Common problems with verbs, adjectives, adverbs, pronouns, conjunctions, punctuation, prefix, suffix etc.

UNIT-IV
Oral Communication: Principles of effective oral communication, Media of oral communication, Advantages of oral communication, Disadvantages of oral communication. Styles of oral communication.
Arts of Listening: Good listening for improved communications, Art of listening, Meaning, nature and importance of listening. Principles of good listening, Barriers in listening. Comprehension.

UNIT V
Job Application: Types of application, Form & Content of an application, Drafting the application. Preparation of resume.

Max Marks: 100

Part - I (very short answer) consists 10 questions of two marks each with two questions from each unit.
Maximum limit for each question is up to 40 words.

Part - II (short answer) consists 5 questions of four marks each with one question from each unit.
Maximum limit for each question is up to 80 words.

Part - III (Long Answer) consists 3 questions of twelve marks each with one question from each unit
with internal choice.

UNIT - I

Basic concepts of Programming languages, Programming Domains, Language Evaluation criteria and language categories, Evolution of major programming languages. Describing syntax and semantics formal methods of describing syntax, Pseudo code, Design of Algorithm & Flowchart

UNIT - II

Fundamentals of C: History and importance of C, sample programming, basic structure and execution of C programs, constants, variables, and data types and various type of declarations, different type operators and expressions, evaluation of expressions, operator precedence and associativity. Managing input and output operations, decision making and branching decision making.

UNIT - III

Iteration: while, do...while, for loop, nested loops, break & continue, goto statements.

Arrays and Strings: One-dimensional arrays and their declaration and initialization, two-dimensional arrays and their initializations, character arrays (One and Two dimensional), reading and writing strings, string - handling functions.

UNIT - IV

Functions: Need and elements for user defined functions, definition of functions, return values and their types, function calls and declaration, recursion, parameter passing, passing arrays and strings to functions, the scope, visibility and life time of variables.

Understanding Pointers: Accessing the address of a variable, declaration and initialization of pointer variables, accessing a variable through its pointer, pointers and arrays, pointers and function arguments, functions returning pointers.

UNIT - V

Structures and Unions: Defining structure, declaring structure variable and accessing structure members, initialization of structure, operation on individual members, and array of structures, union, set of structure.

Format: Textual content is formatted as per the instructions provided.
BCA105: Computer Organization

Question Paper pattern for Main University Examination

Max Marks: 100

Part - I (very short answer) consists 10 questions of two marks each with two questions from each unit. Maximum limit for each question is up to 40 words.

Part - II (short answer) consists 5 questions of four marks each with one question from each unit. Maximum limit for each question is up to 80 words.

Part - III (Long answer) consists 5 questions of twelve marks each with one question from each unit with internal choice.

UNIT I

Computer System History and Architecture development von Neumann machine, Mother Board, System clock, Bus (Data, Address Control), Bus architecture (ISA, MCA, EISA, PCI, AGP), Expansion slots and cards (Network adapter cards, SCSI card, Sound card, TV tuner card, PC card), Ports (Serial Parallel, AGP, USB hire Wire), cables (RS 2.12, BIN), Input devices Output devices , Storage devices, random versus sequential access, formatting, tracks and sectors, speed, storage capacity, Floppy Disk, I lard Disk tracks, cylinders, scslots, Hard Drive Interfaces Optical Disks . Magnetic tape. Modern (fax/Datay Voice.)

UNIT II

Basic building blocks I/O, Memory, ALU and its components, Control Unit and its functions. Instruction -word. Instruction and Execution cycle, branch, skip, jump and shift instruction, Operation of control registers; Controlling of arithmetic operations, Classification of Computers (Workstation, Mainframe, Super Computer, Client Server Computer, Notebook, Tablet, PalmTop Computer).

UNIT III

Basics of Computer Architecture ,System Bus and instruction cycles, memory subsystem organization and interfacing, system buses and instruction cycles, I/O subsystem organization and interfacing. Register transfer language. CPU design: Specifying a CPU design, and implementation of a simple CPU(fetching instructions from memory, decoding and executing instructions, establishing required data path, Design of ALU, Design of Control Unit and design verification). Design and implementation a simple micro processor. Feature of Pentium microprocessor.

UNIT IV

UNIT V

Buses, Interfacing buses, Bus formats - address, data and control, Interfacing keyboard, display, auxiliary storage devices and pointers. I/O cards in personal computers. Introduction to Microprocessor and Microcontrollers: Introduction to 8085,8086 microprocessor, DMA Controller, examples of few instructions to understand addressing techniques.Difference between microprocessor and Microcontrollers. RISC Vs. CICS.
Recommended Books

Max Marks: 100

Part - I (very short answer) consists of 10 questions each with two marks each with two questions from each unit.
Maximum limit for each question is up to 40 words.
Part - II (short answer) consists of 5 questions each with four marks each with one question from each unit.
Maximum limit for each question is up to 80 words.
Part - III (Long answer) consists of 5 questions each with twelve marks each with one question from each unit with internal choice.

UNIT - I

Number Systems: Number systems- natural numbers, integers, rational numbers, real numbers, complex numbers, arithmetic modulo a positive integer, Radix r representation (decimal and binary), Change of radix (decimal to binary and vice versa).
Binomial Theorem and Mathematical Induction: Binomial theorem for positive integral indices, general and middle term in binomial expansion with simple applications. Some simple problems of Principle of Mathematical induction.

Recurrence Relations and Generating Functions: Recurrence relation, linear recurrence relation with constant coefficients, solution of linear recurrence relation with constant coefficients. Generating functions, Solution of recurrence relations using generating functions.

UNIT - II

Sets: Definition of sets, representation of sets, type of sets, Operations on sets, Sub sets, Power set, Universal set, Complement of a set, Union and Intersection of two sets, Venn diagrams, De-Morgans law of sets, Partition of sets, Duality Principles.
Relations: Relation, Types of relations- reflexive, symmetric, anti-symmetric, transitive, equivalence and partial order relation. Relation and digraphs, Cartesian product of two sets.
Functions: Function, domain and range, One to one and onto functions, composite functions, inverse of a functions. Binary operations.

UNIT - III

Logic and Proofs: Proposition, Conjunction, Disjunction, Negation, Compound proposition, Conditional propositions (Hypothesis, conclusion, necessary and sufficient condition) and Logical equivalence, De Morgan’s law, Tautology and contradiction, quantifiers, universally quantified statements, component of a Mathematical system (axioms, definitions, undefined terms, theorem, lemma and corollary), proofs (direct proofs, indirect proofs, proof by contra-positive), Mathematical induction.
Boolean Algebra: Definition and Laws of Boolean Algebra, Boolean functions, Simplification of Boolean functions, Special forms of Boolean functions, Application of Boolean algebra (open and closed switches, switches in series and parallel), Logic gates and Circuits.

UNIT - IV

UNIT - V
Tree: Definition of tree, Fundamental terminologies-Node, Child, Parent, Root, Leaf, Level, Height and Subling, Rooted trees, Ordered trees, Binary tree, Complete binary tree, Tree of an algebraic expression, Tree searching (traversal algorithms): Preorder, Inorder and Postorder, Distance and centre, Relation between general tree and binary tree, Spanning trees, Algorithms for minimal spanning trees (Kruskal's and Prim's), Game tree.

UNIT - I
UNIT- II
Data Modeling: Data modeling using the Entity Relationship Model: ER model concepts, notation for ER diagram, mapping constraints, keys, Concepts of Super Key, candidate key, primary key, Generalization, aggregation.
Relational Algebra: Fundamental operations of relational algebra & their implementation, interdependence of operations.

UNIT-III
Database Design: Functional dependencies, loss less decomposition, 1st, 2nd & 3rd normal forms, dependency preservation, boyce codd NF. Introduction to Transactions, transaction states.

UNIT- IV
Introduction to SQL: Characteristics of SQL, Advantages of SQL, SQL data types and literals, Types of SQL commands, SQL operators and their procedure, Tables, views and indexes, Queries and sub queries, Aggregate functions, insert, update and delete operations, Joins, Unions, Intersection, Minus in SQL.

UNIT- V
Introduction to Advance DBMS:
Object-based Databases: Object-Oriented Databases: Object-oriented data model, Object Oriented Languages, Persistent Programming Languages. Object-Relational Databases: Nested Relations, Storage for Object Databases
Distributed Databases: Distributed Data Storage, Distributed Transactions, Commit protocol, Concurrency Control in Distributed Databases, Availability, Distributed Query Processing

Part - II (short answer) consists 5 questions of four marks each with one question from each unit. Maximum limit for each question is up to 80 words.

Part - III (Long answer) consists 5 questions of twelve marks each with one question from each unit with internal choice.

UNIT - I

World Wide Web: Elements of the Web, Web browser and its types, viewing pages with a browser, using a browser for Mail, News and chat, Security and Privacy issues (cookies, firewalls, executable Applets and scripts, blocking system). Plug-ins and Active controls, dealing with Web pages that contain Active X, playing streaming Audio and Video, playing MP music. Using Search engines, subscriptions and channels, making use of web resources (Portal, News and weather, sports Personal Financing and Investing, Entertainment, shopping, Computers and Internet, Travel, Health and Medicine, Communities and Clubs).

UNIT - II

HTML Fundamentals: Introduction to HTML, Creating HTML Pages, incorporating Horizontal Rules and Graphical Elements, Hyper-link, Creating HTML Tables, Creating HTML Forms, HTML and Image Techniques, HTML and Page, Frames, Development of Website and Webpage (Planning, Navigation and Themes, Elements of a Web page, steps of creating a site, publishing and publicizing site structuring web site).

UNIT - III

Introduction to DHTML: Features of DHTML, CSS: Types of Style sheets, Different elements of Style sheets, Filter effects, IFrame, DIV and Layer Tags.

UNIT - IV

UNIT - V

Introduction of Photoshop

Creating a New File: Main Selections, Picking color, Filling a selection with color, More ways to choose colors and fill selections, Painting with paintbrush tool, Using the magic wand tool and applying a filter, Saving your document (save your file): Save file as a JPEG, TIFF, GIF, PNG), Introduction and use of layers, Introduction and use of tool of PhotoShop.

Introduction to Coral draw

Introduction to coral draw, use and importance in designing, various graphic file and file extension, vector image and raster images, introduction to screen and work area. Introduction and use of tool of coral draw.

Max Marks: 100

Part – I (very short answer) consists 10 questions of two marks each with two questions from each unit.
Maximum limit for each question is up to 40 words.

Part – II (short answer) consists 5 questions of four marks each with one question from each unit.
Maximum limit for each question is up to 80 words.

Part – III (Long answer) consists 5 questions of twelve marks each with one question from each unit with internal choice.

UNIT – I

Introduction to Object Oriented Concepts: Evolution of OOP, OOP Paradigm, advantages of OOP, comparison between functional programming and OOP approach, characteristics of object oriented language – objects, classes, inheritance, reusability, user defined data types, polymorphism, overloading.

UNIT – II

Introduction to C++: C++ tokens, data types, C++ operators, type conversion, variable declaration, arrays, statements, expressions, conditional statements, Jumping statements, loops, functions, pointers, structures.

UNIT – III

Classes and Objects: Classes, objects, defining member functions, arrays of class objects, pointers and classes, passing objects, constructors, types of constructors, destructors, this pointer, access specifiers, friend functions, inline functions.

UNIT – IV

Inheritance: Introduction, Importance of Inheritance, types of inheritance, Constructor and Destructor in derived classes.
Polymorphism: Function overloading, operator overloading, virtual functions, pure virtual functions.

UNIT – V

File Management: Handling Data files (sequential and random), Opening and closing of files, stream state member functions, Operations on Files. Templates, Exception Handling.

Question Paper pattern for Main University Examination

Max Marks: 100

Part - I (very short answer) consists 10 questions of two marks each with two questions from each unit. Maximum limit for each question is up to 40 words.
Part - II (short answer) consists 5 questions of four marks each with one question from each unit. Maximum limit for each question is up to 80 words.
Part - III (Long answer) consists 5 questions of twelve marks each with one question from each unit with internal choice.

UNIT - I
Introduction - Introduction Graphical User Interface (GUI), Programming Language (Procedural, Object Oriented, Event Driven), The Visual Basic Environment, Editions of Visual Basic, Features of VB, How to use VB compiler, debug and run the programs, Introduction to tool box, object naming conventions, setting properties, Methods and Events, Working with basic objects - forms, labels, textboxes, command buttons, option button, check box, Frame and Image.

UNIT - II
Programming Fundamentals - Data types in VB, Variables and Declaration, Scope of variables, Operators in VB, sub procedures and functions, Control structures - IF, Select ...case, Do while ...,loop, Do ...loop while, Do ...loop until, For ...Next, Exit For, Exit Do, With ... End With. Fixed size and Dynamic Arrays, control array, Data type conversion functions, VB Built in functions - Date, time, Format and String.

UNIT - III
Additional Controls and Menus - List box and combo box controls, Scroll bars, Picture box control, Shape and line controls, Timer control, Menu basics, Menu Editor, Creating menus, Assigning access keys and short cuts, Separating menu items, creating popup menus, controlling menus at run time.

UNIT - IV
Dialog Boxes, Mouse Events, MDI Forms and Error Handling - Standard, Custom and Common Dialog Control and Mouse Events, Creating and using MDI Form, Arranging the child forms, Adjusting the size of controls, Runtime errors, Handling runtime errors by on error ... Statements, Err object, Debug and immediate window.

UNIT - V
Database Connectivity and Crystal Reports - Connecting with databases through ADO/DC control, Bounded and unbounded methods for displaying data, Accessing and Manipulating database records, TableLayoutPanel, DataGridView, LabeledDataGrid, DataGridView and Form only, connecting database using connection string, Introduction to crystal reports, sections of report, creation of report using database, linking report with vb programs.

BCA Part - III

BCA301 : Data Structure (Using C/ C++)

Introduction to Algorithm Design: Algorithm, its characteristics, efficiency of algorithms, analyzing Algorithms and problems.

UNIT - I

Linear Structure: Arrays, records, stack, operation on stack, implementation of stack as an array, queue, types of queues, operations on queue, implementation of queue.

UNIT - II

Linked Structure : List representation, Polish notations, operations on linked list - get node and free node operation, implementing the list operation, inserting into an ordered linked list, deleting, circular linked list, doubly linked list, implementation of stack and queues using linked list.

UNIT - III

Tree Structure : Concept and terminology, Types of trees, Binary search tree, inserting, deleting and searching into binary search tree, implementing the insert, search and delete algorithms, tree traversals, Huffman's algorithm.

UNIT - IV

Graph Structure : Graph representation - Adjacency matrix, adjacency list, Warshall's algorithm, adjacency multilist representation. Orthogonal representation of graph. Graph traversals - bfs and dfs. Shortest path, all pairs of shortest paths, transitive closure, reflexive transitive closure.

UNIT - V

Searching and sorting : Searching - sequential searching, binary searching, hashing. Sorting - selection sort, bubble sort, quick sort, heap sort, merge sort, and insertion sort, efficiency considerations.

Question Paper pattern for Main University examination

Max Marks: 100

Part – I (very short answer) consists of questions each with two questions from each unit.
Maximum limit for each question is up to 40 words.
Part – II (short answer) consists of questions each with one question from each unit.
Maximum limit for each question is up to 80 words.
Part – III (Long answer) consists of questions each with one question from each unit with internal choice.

UNIT-I

Network architecture, configuring network, network strategies, networks types LAN, MAN and WAN [Basic concepts, Line configuration, topology, transmission mode, identify key components of network, categories of network, differentiating between LAN, MAN, WANS and Internet].

UNIT II

The OSI model, The physical layer (bandwidth limited signals, transmission media, wireless transmission), the data link layer, error detection and correction, data link protocols, Bridges, the network layerem routing algorithm, congestion control algorithm, internet working, the transport layer, the application layer, MAC protocols for high speed LANs.

UNIT-III

Introduction to TCP/IP [Understand the TCP/IP Protocol Suite], its history and modification processes, compare TCP/IP to the Open Systems Interconnection (OSI) reference model, Examine a number of TCP/IP applications such as FTP, Telnet, DNS, DHCP Boot, etc. connection, host Internetworking, IP, IPv6, Bridging, TCP, Routing protocols, TCP, UDP, SNMP, SMTP, and MIME, HTTP.

BCA304: Core Java Programming

Question Paper pattern for Main University Examination Max Marks: 100

Part—1 (very short answer) consists 10 questions of two marks each with two questions from each unit.
Maximum limit for each question is up to 40 words.
Part—II (short answer) consists 5 questions of four marks each with one question from each unit.
Maximum limit for each question is up to 80 words.
Part—III (Long answer) consists 5 questions of twelve marks each with one question from each unit with internal choice.

UNIT—I
Overview of Object Oriented Concepts in Java.
Introduction: getting and installing the Java Development Kit, Java features like security, portability, byte code, java virtual machine, object oriented, robust, multithreading, architectural neutral, distributed and dynamic, Java programming language structure and syntax, control statements (The If statement, Logical Operators, The Conditional Operator, the Switch Statement, Variable Scope, Loops).

UNIT—II
Java arrays, Java Strings, Operations on Strings and String Buffer Objects, Class, Objects, Methods and Problem solving using classes, objects, and relationships, Inheritance, types of inheritance, packages and interface, exception handling.
UNIT - III
Java utilities like java.lang, java.util, java.io, GUI in Java using AWT and Swing, Event Handling Mechanisms, AWT based effective GUI in Java: Detailed overview of AWT classes, Graphics primitives and UI Components, Layout features, Standalone GUI applications, Layout Managers, Implementation of event driven mechanism, Delegation of even model, Listeners and Adapters, Inner classes.

UNIT - IV

UNIT - V
Overview of Networking in Java: URL class and its usage through connection, Sockets based connectivity, TCP/IP Sockets and server sockets, Datagram Sockets. Collections in Java-Array List, stack, queue, hash. Collection class hierarchy. IDBC and JAR files.

UNIT I

Introduction to .Net framework: Managed Code and the CLR Intermediate Language, Metadata and JIT Compilation Automatic Memory Management

Elements: Variable and constants data types, declaration. Operators, types precedence, Expressions Program flow, Decision statements, properties, delegate, indexer, attributes, Loop statements.

UNIT II

Types: Structures, Enumerations, Reference data types, arrays.

Windows Programming: Creating windows forms windows controls, Button, Check box, Combo box, Label, List box Radio Button, Text box, Events, Click, close deactivate, Load, mousedown, mouseup.

Menus and Dialog Boxes: Creating menus, menu items, context menu, Using dialog boxes, show dialog() method.

UNIT III

ADO.NET: Architecture of ADO.NET, ADO.NET providers, Connection, Command, Data Adapter, Dataset, Connecting to Data Source, Accessing Data with Data set and Data reader, Create an ADO.NET application, Using Stored Procedures.

UNIT IV

ASP.NET Features: Application of States and Structure; Change the Home Directory in IIS; Add a Virtual Directory in IIS- Set a Default Document for IIS- Stop, Start, or Pause a Web Site. Server security and application(s) security issues.

UNIT V

Creating Web Controls: Web Controls, HTML Controls, Using Internist Contol, Using Input Validation Controls, Selecting Controls for Applications, Data Controls and Adding web controls to

Creating Web Forms: Server Controls, Types of Server Controls, state management- Types and applications, Adding ASP.NET Code to a page.

Web Services and WCF: Introduction to Web Services protocol and standards WSDL Documents- Visual Studio.NET Architecture of WCF, WCF Client

Part - III (Long answer) consists 5 questions of twelve marks each with one question from each unit with internal choice.

UNIT - I

Introduction to PHP: Server side Scripting Vs Client Side Scripting, Evaluation of PHP, Features of PHP, Basic Syntax, Variable and constant, Data types, Operators and Expressions

UNIT - II

Decision Making: If, Multiple Ifs, Nested Ifs, Loops (while, do...while, for loop, foreach), Nested Loops, Jumping Statement.

Arrays: Numeric, Associative and Multidimensional Arrays

UNIT-III

Strings: Creating and accessing String, Searching & Replacing String, Formatting String, String Related Library function, Pattern matching, Replacing text, Splitting a string with a Regular Expression

Functions: Defining a Function, Calling a Function, Parameter passing, Returning value from function

UNIT-IV

Form Data Handling: $_GET, $_POST, $_REQUEST Variables, Cookies handling, Session Management, URL encryption and security functions.

Exception Handling: Understanding Exception and error, Try, catch, throw

UNIT-V

File Handling: Opening and closing a file, Copying, renaming and deleting a file

Database Handling: Connection with MySql Database or ODBC, Performing basic database, operation (Insert, Delete, Update, Select), Setting query parameter.

Examination Time: Three Hours
Maximum Marks: 100

Guidelines for preparing the Project Report (BCA-310)

I. Objective: Student should be able to develop a small real time application using any Programming Languages which is part of their course curriculum or any new upcoming Programming Language.

II. Guidelines regarding project:
1. Students should work in group. Minimum number of students in one group can be 2. Maximum number of students in one group can be 4.
2. Students will be working under supervision of one teacher.
3. Students will submit a synopsis of the project.
4. Two copies of the report should be submitted.
5. The reports should be spiral bound along with the soft copy of the project.
6. The reports should be submitted with the following guidelines in the prescribed format.
   - Paper size: A4
   - Margins: Left 1.5, Right, Top and Bottom 1 inch
   - Font: Times New Roman
   - Chapter Heading: 16pt
   - Sub Heading: 14, Sub-Sub Headings: 12 Bold
   - Running Matter: 12 pt
   - All topics should be numbered accordingly.
   - Paragraph Gap: 6 Pt Maximum
   - Line Spacing: 1.5

III: Top Page

>Title of Project Work>

Project report submitted in partial fulfillment of the requirement for the award of the Degree of Bachelor of Computer Application

By

>Name of the Candidate>

Roll No.
Enrollment No.:
Session: <Session>

>University Logo>

{Name of the Constituent/Affiliated College>
University of Rajasthan
Jaipur

Second Page

Certificate

This is to certify that the project report entitled .......... being submitted by Mr/Mrs........ in partial fulfillment for the award of the Degree of Bachelor of Computer Application to the University of Rajasthan is a record of bonafied work carried out by himself/herself under my guidance and supervision. The results embodied in this project report have not been submitted to any other University or Institute for the award of any Degree or Diploma.

(HOD)  

Guide Name
Designation

Dr. Registrar
(Academic)
University of Rajasthan
Jaipur
Third Page

The third page may include the Certificate given by Organization or Company where candidate has done his/her project.

Fourth Page

The fourth page should contain the declaration by the students (see the sample format)

```
DEVELOPMENT

This is to certify that the work reported in the present project entitled "<Title Of The Project Work>" is a record of work done by me in the <Department Name>, <Name of the College/Organization>. The reports are based on the project work done entirely by us and not copied from any other source.

Signature of Candidate

<M. Name of the Student>

Class:

Roll No.

Enrolment No.

Session:
```

Fifth Page

The fifth page may include the Acknowledgement.

Sixth and Seventh Page

In this page, a table of contents, list of tables, list of figures must be provided.

Eighth Page

The eighth page should contain an abstract of the Project report. The candidate may emphasize here his/her contributions in the project.

NOTE: All the above pages are to be numbered in Roman numerals of lower case. Ex. i, ii, iii, iv, ... except the top page.

The following is suggested format for arranging the project report matter into various chapters:

1. Introduction
   This chapter must describe introduction about your project.
2. Literature Survey/Review of Literature
3. Define the problem.
   Define the modules and their functionalities
   Hardware / Software requirements
4. System Design and Implementation
   /* Actual Implementation of the problem should be described in this chapter. */

   The design part must include the following items
   o DFDs in case of Database projects
   o UML diagrams. This UML diagrams must include the following
     o Class Diagrams
     o Interaction diagrams-Sequence and Collaboration diagrams
     o Object Diagrams
     o Use case diagrams
     o Control Flow diagrams
     o Database Design

   In Case of a database projects, the report must include the following items.
   o E-R Diagrams

5. Results and Discussions
6. Conclusions & Future Enhancements / Recommendations
7. References / Bibliography
8. Appendices (if any)
