SYLLABUS

M.Sc. BOTANY (Annual Scheme)

M.Sc. (Previous) Examination 2023

M.Sc. (Final) Examination 2024

Rg/Tas
Dy. Registrar (Acad.)
University of Rajasthan
& JAIPUR

UNIVERSITY OF RAJASTHAN, JAIPUR
M.Sc. (BOTANY)
M.Sc. (ANNUAL PATTERN)

(M.Sc. Previous)

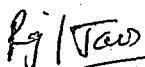

Paper I	Cell & Molecular Biology of Plants
Paper II	Cytology, Genetics & Cytogenetics
Paper III	Biology & Diversity of Lower Plants : Cryptogams
Paper IV	Taxonomy & Diversity of Seed Plants
Paper V	Plant Physiology and Metabolism
Paper VI	Microbiology and Plant Pathology

(M.Sc. Final)

Paper VII	Plant Morphology, Development Anatomy and Reproductive Biology
Paper VIII	Plant Ecology
Paper IX	Plant Resource Utilization & Conservation
Paper X	Biotechnology & Genetic Engineering of Plants & Microbes
Paper XI	Elective I
Paper XII	Elective II

Elective Papers XI & XII

Paper XI(a)	: Advanced Plant Pathology—I
Paper XII(a)	: Advanced Plant Pathology—II
	OR
Paper XI(b)	: Seed Science and Technology—I
Paper XII(b)	: Seed Science and Technology—II
	OR
Paper XI(c)	: Ecosystem Ecology
Paper XII(c)	: Environmental biology
	OR
Paper XI(d)	: Advanced Plant Physiology—I
Paper XII(d)	: Advanced Plant Physiology—II
	OR
Paper XI(e)	: Advanced Morphology and Morphogenesis—I
Paper XII(e)	: Advanced Morphology and Morphogenesis—II
	OR
Paper XI(f)	: Biosystematics of Angiosperms—I
Paper XII(f)	: Biosystematics of Angiosperms—I
	OR
Paper XI(g)	: Biotechnology—I
Paper XII(g)	: Biotechnology—II

M.Sc. Botany

Scheme of Examination

M.Sc. (Prev.)

There will be six papers in theory, each of three hours duration, 100 marks each and two practicals carrying 150 marks each (10% marks are reserved for viva and 15% records in each examination). Each practical examination will be of 6 hours duration to be completed in one day.

Each paper will have 9 questions, out of which a student has to attempt 5 questions including the question No.1 which will be compulsory. The question No.1 will carry 20 marks and will be of short answer type questions with a limit of 20 words.

M.Sc. (Final)

There will be six papers, four compulsory and two elective, in theory of 3 hours duration carrying 100 marks each and two practicals each as follows :

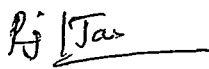

(i) Practical for compulsory papers of 200 marks of 8 hours duration to be completed in two days.

(ii) Practical for elective papers - 100 marks of 4 hours duration to be completed in one day.

Each paper will have 9 questions, out of which a student has to attempt 5 questions including the question No.1 which will be compulsory. The question No.1 will carry 20 marks and will be of short answer type questions with a limit of 20 words.

M.Sc. Previous

- Paper-I** : Cell and Molecular Biology of Plants
Paper-II : Cytology, Genetics and Cytogenetics
Paper-III : Biology and Diversity of Lower Plants :
Cryptogams
Paper-IV : Taxonomy and Diversity of Seed Plants
Paper-V : Plant Physiology and Metabolism
Paper-VI : Microbiology and Plant Pathology

Dy. Registrar (Acad.)
University of Rajasthan
JAIPUR

Paper-I : Cell and Molecular Biology of Plants

Scheme of Examination

Max. Marks : 100

Each paper will have 9 questions, out of which a student has to attempt 5 questions including the question No.1 which will be compulsory. The question No.1 will carry 20 marks and will be of short answer type questions with a limit of 20 words.

Unit—I

The dynamic cell : Structural organization of the plant cell, specialized plant cell types, chemical foundation, biochemical energetics.

Cell wall : Structure and functions, biogenesis, growth.

Plasma membrane : Structure, models and functions, sites for ATPases, ion carriers, channels and pumps, receptors.

Plasmodesmata : Structure, role in movement of molecules and macromolecules, comparison with gap junctions.

Unit—II

Chloroplast : Structure, genome organization, gene expression, RNA editing, nucleochloroplastic interactions.

Mitochondria : Structure, genome organization, biogenesis.

Plant vacuole : Tonoplast membrane, ATPase, transporters, as storage organelle.

Nucleus : Structure, nuclear pores, nucleosome organization, DNA structure, A, B and Z forms, replication, damage and repair, transcription, plant promoters and transcription factors, splicing, mRNA transport nucleolous, rRNA biosynthesis.

Restriction enzymes : Cleavage of DNA into specific fragments, construction of a restriction map from the fragments, restriction sites, as genetic markers, RFLP and their use in plant breeding.

Unit—III

Ribosomes : Structure, site of protein synthesis, mechanism of translation, initiation, elongation and termination, structure and role of tRNA.

Protein sorting : Targeting of proteins to organelles.

Cell shape and motility : The cytoskeleton, organization and role of microtubules and microfilaments, motor movements, implications in flagellar and other movements.

Unit—IV

Cell cycle and apoptosis : Control mechanisms, role of cyclins and cyclin-dependent kinases, retinoblastoma and E2F proteins, cytokinesis and cell plate formation, mechanisms of programmed cell death.

Other Cellular organelles : Structure and functions of microbodies, Golgi apparatus, lysosomes, endoplasmic reticulum.

R. J. Jain

Dy. Registrar (Acad.)
University of Rajasthan
JAIPUR

Techniques in cell biology: Immunotechniques, in situ hybridization to locate transcripts in cell types, FISH, GISH, confocal microscopy.

Suggested Readings:

1. Lewis, B. 200. Genes VII. Oxford University Press, New York.
2. Alberts, B., Bray, D., Lewis, J., Raff, M., Roberts, K and Watson, J., 1999. Molecular Biology of the Cell. Garland Publishing, Inc.. New York.
3. Wolfe, S.L. 1993. Molecular and Cellular Biology. Wadsworth Publishing USA.
4. Rest, T, *et al.* 1998. Plant Biology. Wadsworth Publishing Co., California USA.
5. Krishnamurthy, K.V. 2000. Methods in Cell Wall Cytochemistry. CRC Press, Boca Raton, Florida.
6. Buchanan, B.B., Gruissem, W., and Jones, R.L. 2000. Biochemistry and Molecular Biology of Plants, American Society of Plant Physiologists. Maryland, USA.
7. De, D.N. : 2000. Plant Cell Vacuoles : An Introduction. CSIRO Publication Collingwood, Australia.
8. Kleinsmith, L.J. and Kish, V.M. 1995. Principles of Cell and Molecular Biology. (2nd Edition). Harper Collins College Publishers, New York USA.
9. Lodish, H., Berk, A., Zipursky, S.L., Matsudaira, P., Baltimore, D. and Darnell, J. 2000. Molecular Cell Biology (4th Edition). W.H. Freeman and Co., New York, USA.

See the following Review Journals

Annual Review of Plant Physiology and Molecular Biology.

Current Advances in Plant Sciences.

Trends in Plant Sciences.

Nature Reviews : Molecular and Cell Biology.

Suggested laboratory Exercises

1. Isolation of mitochondria and the activity of its marker enzyme succinate dehydrogenase (SDH).
2. Isolation of chloroplasts and SDS-PAGE profile, of proteins to demarcate the two subunits of Rubisco.
3. Isolation of nuclei and identification of histones by SDS-PAGE
4. Isolation of plant DNA and its quantitation by spectrophotometric method.
5. Isolation of DNA. and preparation of 'cot' curve.
6. Restriction digestion of plant DNA, its separation by agarose gel electrophoresis and visualization by ethidium bromide staining.
7. Isolation of RNA and quantitation by a spectrophotometric method.

Raj Tan

Dy. Registrar (Acad.)
University of Rajasthan
JAIPUR

8. Separation of plant RNA by agarose gel electrophoresis and visualization by EtBr staining.
9. Southern blot analysis using a gene specific probe.
10. Northern blot analysis using a gene specific probe.
11. Immunological techniques : Ouchterlony method, ELISA and western blotting.
12. Fluorescence staining with FDA for cell viability and cell wall staining with calcofluor.
13. Demonstration of SEM and TEM.

Note : Chemicals and kits for conducting some of the above molecular biology experiments are available in India, for example from M/s Bangalore Genei and Centre for Biotechnology (CSTR) Mall Road, Delhi.

Suggested Readings (For laboratory exercises)

JAIPUR

Paper-II : Cytology, Genetics and Cytogenetics

Scheme of Examination

Max. Marks : 100

Each paper will have 9 questions, out of which a student has to attempt 5 questions including the question No.1 which will be compulsory. The question No.1 will carry 20 marks and will be of short answer type questions with a limit of 20 words.

Unit-1

CYTOLOGY

Chromatin organization : Chromosome structure and packaging of DNA, molecular organization of centromere and telomere, nucleolus and ribosomal RNA genes, euchromatin and heterochromatin, karyotype analysis, banding patterns, karyotype, evolution, specialized types of chromosomes, polytene, lampbrush, B-chromosomes and sex chromosome, molecular basis of chromosome pairing.

Structural and numerical alterations in chromosomes : Origin, meiosis and breeding behavior of duplication, deficiency, inversion and translocation heterozygotes, Origin, occurrence, production and meiosis of haploids, aneuploids and euploids, origin and production, of autopolyploids, chromosome and chromatid segregation, allopolyploids, types, genome constitution, and analysis, evolution of major crop plants, induction and characterization of trisomics and monosomics.

Unit-II

GENETICS

Genetics of prokaryotes and eukaryotic organelles : Mapping the bacteriophage genome, phage phenotypes, genetic recombination in phage, genetic transformation, conjugation and transduction in bacteria, genetics of mitochondria and chloroplasts, cytoplasmic male sterility.

Gene Structure and expression : Genetic fine structure, cis—trans test fine structure analysis of eukaryotes, introns and their significance, RNA Splicing, regulation of gene expression in prokaryotes and eukaryotes. Panoply of operon, catabolite repression, attenuation and antitermination.

Genetic recombination and genetic mapping : Recombination independent assortment and crossing over. molecular mechanism of recombination. role of RecA and RecBCD enzymes, site-specific recombination. chromosome mapping, linkage groups, genetic markers. construction of molecular maps, correlation of genetic and physical maps. somatic cell genetics—an alternative approach to gene mapping.

Unit-III

Rj/Vay

Dy. Registrar (Acad.)
University of Rajasthan
JAIPUR

CYTOGENETICS

Mutations : Spontaneous and induced mutations, physical and chemical mutagens, molecular basis of gene mutation, transposable elements in prokaryotes and eukaryotes, mutation induced by transposons, site-directed mutagenesis, inherited diseases and defects in DNA repair, initiation of cancer at cellular level, protooncogenes and oncogenes.

Sex determination, sex linked inheritance, sex limited characters and sex reversal, multiple alleles.

Cytogenetics of aneuploids and structural heterozygotes : Effect of aneuploidy on phenotype in plants, transmission of monosomics and trisomics and their use in chromosome mapping in diploid and polyploid species, breeding behaviour and genetics of structural heterozygotes, complex translocation heterozygotes, translocation tester sets, Robertsonian translocations, B-A translocations.

Unit—IV

Molecular cytogenetics : Nuclear DNA content, C-value paradox, cot curve and its significance, multigene families and their evolution, in situ hybridization—concept and techniques, physical mapping of genes of chromosomes, computer assisted chromosome analysis, chromosome microdissection and microcloning, flow cytometry and karyotype analysis.

Alien gene transfer through chromosome manipulations : Transfer of whole genome, examples from wheat, *Arachis* and *Brassica*, transfer of individual chromosomes and chromosome segments, methods for detecting alien chromatin, production, characterization and utility of alien addition and substitution lines, genetic basis of inbreeding and heterosis, exploitation of hybrid vigour.

12. Snustad, D.P. and Simmons, M.J. 2000. Principles of Genetics (2nd edition). John Wiley & Sons Inc., USA.

Suggested Laboratory Exercises

1. Linear differentiation of chromosomes through banding techniques, such as G-banding, C-banding and Q-banding.
2. Silver banding for staining nucleolus—organizing region, where 18S and 28srDNA are transcribed.
3. Orcein and Feulgen. Staining of the salivary gland chromosomes of Chironomas and Drosophila.
4. Characteristics and behaviour of B chromosomes using maize or any other appropriate material.
5. Working out the effect of mono- and trisomy on plant phenotype, fertility and meiotic behaviour.
6. Induction of polyploidy using colchicines, different methods of the application of Colchicines.
7. Effect of induced and spontaneous polyploidy on plant phenotype, meiosis, pollen and seed fertility and fruit set.
8. Effect of translocation heterozygosity on plant phenotype. chromosome pairing and chromosome disjunction and pollen and seed fertility.
9. Meiosis of complex translocation heterozygotes.
10. Isolation of chlorophyll mutants, following irradiation and treatment with chemical mutagens.
11. Estimation of nuclear DNA content through microdensitometry and flow cytometry.
12. Fractionation and estimation of repetitive and unique DNA sequences in nuclear DNA.

Suggested Readings :

1. Fukui, K. and Nakayama, S, 1996 : Plant Chromosomes : Laboratory Methods. CRC Press, Boca raton, Florida.
2. Sharma, AK. and Sharma, A. 1999. Plant Chromosome Analysis. Manipulation and Engineering. Hoarwood Academic Publisher. Australia.

 Dy. Registrar (Acad.)
 University of Rajasthan
 JAIPUR

Paper-III : Biology and Diversity of Lower Plants :
Cryptogams

Scheme of Examination

Max. Marks : 100

Each paper will have 9 questions, out of which a student has to attempt 5 questions including the question No.1 which will be compulsory. The question No.1 will carry 20 marks and will be of short answer type questions with a limit of 20 words.

Unit-I

Phycology : Algae in diversified habitats (terrestrial, freshwater; marine), thallus organization, cell ultrastructure, reproduction, (vegetative, asexual, sexual) criteria for classification of algae: pigments, reserve food, flagella, classification, salient features of Protochlorophyta, Chlorophyta, Charophyta, Xanthophyta, Bacillariophyta, Phaeophyta and Rhodophyta : with special reference to *Microcystis*, *Hydrodictyon*, *Drapernaldiopsis*, *Cosmarium*, algal blooms, algal biofertilizers : algae as food, feed and use in industry.

Unit-II

Mycology : General characters of fungi, substrate relationship in fungi, cell ultrastructure, unicellular and multi cellular organization, cell wall composition, nutrition (saprobic, biotrophic, symbiotic), heterothallism, heterokaryosis, parasexuality, recent trends in classification. Phylogeny of fungi, general account of Mastigomycotina, Zygomycotina, Ascomycotina, Basidiomycotina, deuteromycotina, with special reference to *Pilobolus*, *Morchella*, *Melampsora*, *Polyporus* & *Phoma*, fungi in industry medicine and as food, fungal diseases in plants and humans, Mycorrhizae, fungi as biocontrol agents.

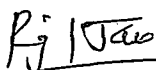

Unit-III

Bryophyta : Morphology, structure, reproduction and life history, distribution, classification, general account of Marchantiales, Jungermaniales, Anthocerotales, Sphagnales, Funariales and Polytrichales, with special reference to *Plagiochasma*, *Notothylus* and *Polytrichum*, economic and ecological importance.

Unit-IV

Pteridophyta : Morphology, anatomy and reproduction; classification; evolution of stele; heterospory and origin of seed habit; general account of fossil pteridophyta; introduction to Psilopsida, Lycopsida, Sphenopsida and Pteropsida; with Special reference to *Lycopodium*, *Gleichenia*, *Pteris*, *Isoetes* & *Ophioglossum*.

Paper-IV : Taxonomy and Diversity of Seed Plants

Scheme of Examination

Max. Marks : 100

Each paper will have 9 questions, out of which a student has to attempt 5 questions including the question No.1 which will be compulsory. The question No.1 will carry 20 marks and will be of short answer type questions with a limit of 20 words.

Unit-I

GYMNOSPERMS

Introduction : Gymnosperms, the vessel-less and fruitless seed plants varying in the structure of their sperms, pollen grains, pollen germination and the complexity of their female gametophyte, evolution of gymnosperms. Classification of Gymnosperms and their Distribution in India.

Brief account of Pteridospermales, General Account of Cycadeoidales and Cordaitales. Structure and reproduction in Cycadales, Ginkgoales, Coniferales, Ephedrales, Welwitschiales and Gnetales.

Unit-II

TAXONOMY OF ANGIOSPERMS

1. Aims, Components, and principals of taxonomy; Alpha and Omega Taxonomy, documentation and scope.
2. Systems of Angiosperm classification: Cronquist, Dahlgren, Throne and APG-II
3. International code of Botanical Nomenclature: Principles, rules and recommendations; Taxonomic Concept: Hierarchy, species, genus, family and other categories.

Unit-III

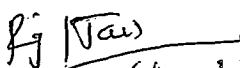

Numerical Taxonomy- Principals. concepts, operational taxonomic units (OTU), data processing and taxonomic studies, taximetric methods for study of population variation and similarity- coding, cluster analysis, cladistics, cladogram.

Taxonomic literature: Floras, Monographs, Icons, Library, Manuals, Index, Taxonomic keys.

Taxonomic tools and techniques: Herbarium, serological, Molecular technique, GIS and Mapping biodiversity.

Unit-IV

Taxonomic evidences: Morphology, Anatomy, Palynology, Embryology, Cytology, Phytochemistry and Genome analysis.

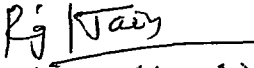

Dy. Registrar (Acad.)
University of Rajasthan
JAIPUR

Phylogeny of Angiosperms : Ancestors of Angiosperms, time and place of origin of Angiosperms; habit of Angiosperm, primitive living Angiosperms, interrelationship among the major groups of Angiosperms.

Suggested Laboratory Exercises :

Dy. Registrar (Acad.)
University of Rajasthan
JAIPUR

Gymnosperms

1. Comparative study of the anatomy of vegetative and reproductive parts of Cycas, Ginkgo; Cedrus, Abies; Picea, Cupressus, Araucaria, Cryptomeria, Taxodium; Podocarpus, Agathis, Texas, Ephedra and Gnetum.
2. Study of important fossil gymnosperms from prepared slides and specimens.

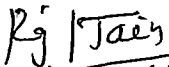

Angiosperms

3. Description of a specimen from representative, locally available families.

List of Locally Available Families :

(1) Ranunculaceae, (2) Cappariaceae, (3) Portulacaceae, (4) Caryophyllaceae, (5) Malvaceae, (6) Tiliaceae, (7) Sterculiaceae, (8) Zygophyllaceae, (9) Rhamnaceae, (10) Sapindaceae, (11) Leguminosae, (12) Combretaceae, (13) Myrtaceae, (14) Cucurbitaceae, (15) Umbelliferae-Apiaceae, (16) Rubiaceae, (17) Asteraceae, (18) Primulaceae, (19) Plumbaginaceae, (20) Asclepiadaceae, (21) Convolvulaceae, (22) Solanaceae, (23) Boraginaceae, (24) Polemoniaceae, (25) Acanthaceae, (26) Pedaliaceae, (27) Martyniaceae, (28) Bignoniaceae, (29) Libiatae, (30) Nyctaginaceae, (31) Polygonaceae, (32) Chenopodiaceae, (33) Amaranthaceae, (34) Aizoaceae, (35) Mollugmaceae, (36) Euphorbiaceae, (37) Commelinaceae, and (38) Cyperaceae.

4. Description of species based on various specimens to study intraspecific variation : a collective exercise.
5. Description of various species of a genus, location of key characters and preparation of keys at generic level.
6. Location of key characters and use of keys at family level.
7. Field trips within and around the campus, compilation of field notes and preparation of herbarium sheets of such plants, wild or cultivated as are abundant.
8. Training in using floras and herbaria for identification of specimens described in the class.
9. Demonstration of the utility of secondary metabolites in the taxonomy of some appropriate genera.
10. Comparison of different species of a genus and different genera of a family to calculate similarity coefficients and preparation of dendrograms.

Dy. Registrar (Acad.)

JAIPUR

Paper-V : Plant Physiology and Metabolism

Scheme of Examination

Max. Marks : 100

Each paper will have 9 questions, out of which a student has to attempt 5 questions including the question No.1 which will be compulsory. The question No.1 will carry 20 marks and will be of short answer type questions with a limit of 20 words.

Unit-I

Water relation of plants : Unique physicochemical properties of water, chemical potential, water potential, apparent free space, bulk movement of water, Soil Plant Atmosphere Continuum (SPAC) stomatal regulation of transpiration, signal transduction in guard cell.

Membrane Transport : Passive - non-mediated transport and Nernst equation, Passive-mediated transport, ATP-driven active transport, Uniport, Symport, Antiport Ion channels.

Amino acids, Proteins and Enzymes : Nod factor, root nodulation and nitrogen fixation, structure of amino acids, stereo-isomers. Amphoteric properties, synthesis of amino acids by reductive amination, GS-GOGAT system and transamination.

Structure of proteins : Primary, secondary, tertiary, quaternary and domain structure, reverse turn and Ramchandran Plot, protein stability : electrostatic forces, hydrogen bonding, disulfide bonding and hydrophobic interaction.

Enzymes : Structure and properties, substrate specificity, classification and mechanism of enzyme action.

Unit-II

Carbohydrates : Classification, structure and function of monosaccharides, Polysaccharides and glycoproteins including starch, cellulose and pectins.

Photosynthesis : Photosynthetic pigments, absorption and transformation of radiant energy, photo-oxidation, four complexes of thylakoid membranes : photosystem I, cytochrome b-*f* complex, photosystem II and coupling factors, photolysis of water and O₂ evolution, non-cyclic and cyclic transportation of electrons, Water, water cycle, proton

Raj Jav

Dy. Registrar (Acad.)
University of Rajasthan
JAIPUR

gradient and photophosphorylation, Calvin cycle regulation of RUBISCO activity. control of Calvin cycle, C₄ pathway and its adaptive significance. CAM pathway, differences between C₃ and C₄ plants. glycolate pathway and photorespiration chlororespiration and CO₂ concentrating mechanism in micro-organ. ism.

Unit-III

Respiration : Anaerobic and aerobic respiration, amphibolic nature of TCA cycle, pentose phosphate pathway, glyoxylate path. way, oxidative phosphdrylation. gluconeogenesis, high energy com. pounds : their synthesis and utilisation.

Fat metabolism : Synthesis of long chain fatty acids, lipid biosynthesis, and oxidation

Secondary metabolites : Biosynthesis and function of secondary metabolites with special reference to tannins, alkaloids and ster-oids.

Unit-IV

Plant growth regulators : Auxins - chemical nature, bioassay, physiological effects and mode of action.

Gibberellins - chemical nature, bioassay, physiological effects and mode of action.

Cytokinins-chemical nature, bioassay, physiological effects and mode of action.

Abscisic acid - chemical nature, bioassay, physiological effects and mode of action.

Physiology of flowering : Photoperiodism and vernalization.

13. Westhoff, P. (1998) Molecular Plant Development from Gene to Plant, Oxford University Press, Oxford, UK.

Suggested Laboratory Exercises :

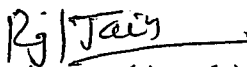

1. Effect of time and enzyme concentration on the rate of reaction of enzyme (e.g. acid phosphatase nitrate reductase).
2. Effect of substrate concentration on activity of any enzyme and determination of its K_m value.
3. Demonstration of the substrate inducibility of the enzyme nitrate reductase.
4. Extraction of chloroplast pigments from leaves and preparation of the absorption spectrum of chlorophylls and carotenoids.
5. To determine the chlorophyll a. chlorophyll b. ratio in C_3 and C_4 plants.
6. Isolation of intact chloroplasts and estimation of chloroplast proteins by spot protein assay.
7. to demonstrate photophosphorylation in intact chloroplasts, resolve the phosphoproteins by SDS-PAGE and perform autoradiography.
8. Extraction of seed proteins depending upon the solubility
9. Determination of succinate dehydrogenase activity, its kinetics and sensitivity to inhibitors.
10. Desalting of proteins by gel filtration chromatography employing Sephadex
11. Preparation of the standard curve of protein (BSA) and estimation of the protein content in extracts of plant material by Lowry's or Bradford's method.
12. Fractionation of proteins using gel filtration chromatography by Sephadex G100 or Sephadex G200.
13. SDS-PAGE for soluble proteins extracted from the given plant materials and comparison of their profile by staining with Coomassie Brilliant Blue or silver nitrate.

 Dy. Registrar (Acad.)
 University of Rajasthan
 JAIPUR

14. Separation of isozymes of esterases, peroxidases by native polyacrylamide gel electrophoresis.
15. Radioisotope methodology, autoradiography, instrumentation (GM count and Scintillation counter) and principles involved.
16. Principles of colorimetry, spectrophotometry and fluorimetry.

Paper-VI : Microbiology and Plant Pathology

Scheme of Examination

Max. Marks : 100

Each paper will have 9 questions, out of which a student has to attempt 5 questions including the question No.1 which will be compulsory. The question No.1 will carry 20 marks and will be of short answer type questions with a limit of 20 words.

Unit - I

Microbiology

1. **Important landmarks in the history of microbiology archaeobacteria and eubacteria** : General account, ultrastructure, nutrition and reproduction, biology and economic importance, cyanobacteria-salient features and biological importance.

2. **Viruses** : Classification, characteristics and ultrastructure of virus, isolation and purification of viruses, chemical nature, replication, transmission of viruses, cyanophages, economic importance.

3. **Phytoplasma** : General characteristics and role in causing plant diseases.

Unit-II

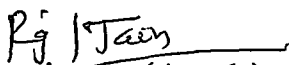

4. Scope and application of microbes in agriculture, industry, food, pollution and biological control of pests.

5. General account of immunity, allergy, properties of antigens and antibodies. Antibody structure and function, affinity and anti-body specificity. Monoclonal antibodies and their uses. Serology, types of vaccine. Preliminary account of Biofilms, biochips, biosensors and biosurfactants.

Unit-III

Plant Pathology

6. **History and scope of plant pathology** : General account of diseases caused by plant pathogens. Pathogen attack and defense mechanisms Physical, physiological, biochemical and molecular aspects.

Dy. Registrar (Acad.)
University of Rajasthan
JAIPUR

Plant disease management : Chemical, biological, IPM Systems. development of transgenics, biopesticides, Diagnosis of plant diseases, Preliminary account of application of Biotechnology in plant pathology.

Unit-IV

Symptomology, identification and control of following plant diseases.

Fungal diseases : Wheat (Rust, Smut), Bajra (ergot and smut).

Paddy (Paddy blast), Cotton (Wilt), Grapes (Downy mildew and powdery mildew).

Bacterial disease : Wheat (Tundu), Citrus canker.

Viral disease : Tobacco mosaic, Bhindi yellow mosaic.

Phytoplasma disease : Witch's broom of Papaya

Nematode disease : Root-knot of vegetables.

10. Trivedi, P.C. 1998. Nematode Diseases in Plants. CBS Publisher & Distributor. New Delhi.

Suggested laboratory Exercises (Microbiology)

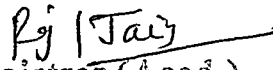

1. Calibration of microscope : determination of dimensions of microorganisms (suggested model organisms: yeast, lactobacilli, cyanobacteria).
2. Cultivation media for autotrophic and heterotrophic microorganisms (cleaning of glasswares, mineral media, complex media, solid media. sterilization) (based on topic 3).
3. Isolation of microorganisms, streaking on agar plates/pour plate method. isolation of clones, preservation (based on topics 2 and 3).

Raj Jain
Dy. Registrar (Acad.)
University of Rajasthan
JAIPUR

4. Determination of growth of a microorganism (model organism : *Escherichia coli*, effects of nutrients, e.g. glucose, fructose, sucrose, principle of colorimetry/spectrocolorimeter) (based on topic 3).
5. Determination of microbial population size (suggested model organism yeast, use of haemocytometer, serial dilution technique, relationship between dilution and cell count, determination of standard error, reliability in cell counts) (based on topic 3).
6. Preparation of Winogradsky column using pond bottom mud. observations on temporal sequence of appearance of microbes (visual appearance, microscopic observations) (based on topic 7).
7. Observation on virus infected plants (symptoms) (based on topic 5).
8. Fermentation by yeast (inverted tube method, use of different substrates, e.g. glucose, fructose, cane sugar. starch) (based on topic 8).

Plant Pathology :

Diseases as per theory syllabus.

Skeleton Paper
M.Sc. (Previous) Group-I Practical Examination
Time : 6 Hours **M.M. : 150**

Q. No.	Questions	Marks alloted
1.	(a) Perform the given molecular biology exercise.	15
	(b) Perform the given exercise of cell biology/ molecular biology.	15
2.	(a) Perform the given exercise of Genetics/Mitosis/ Meiosis	15
	(b) Perform the given exercise of Cytogenetics/ Polytene chromosome	15
3.	(i) Identify two algae from the given mixture 'A'. Draw labelled diagrams. Comment upon their significant characters and systematic.	7
	(ii) Make a suitable preparation of material 'B' so as show reproductive parts of the fungus.	7
	(iii) Make a suitable preparation of material 'C' and Draw well labelled diagrams. Identify with giving reasons.	8
	(iv) Make a suitable preparation of vegetative/ reproductive parts of the material 'D'. Draw labelled sketches. Write features of special interest and identify giving reasons.	8
4.	Identify the spots critically (6X3)	18

Poj/Vaen
Dy. Registrar (Acad.)

5. Botanical field excursion report	5
6. Sessional marks	22
7. Viva-voce	15

Skeleton Paper

M.Sc. (Previous) Group-II Practical Examination

Time : 6 Hours

M.M. : 150

Q.No.	Questions	Marks allotted
1.	(a) Describe the material in semitechnical language. Assign it to the relevant family with reasons. Draw floral diagram.	9
	(b) Prepare an artificial key of the given plant materials (A B & C).	6
	(c) Make a suitable preparation of material 'D' (vegetative part only). Draw labelled diagram. Identify it giving reasons. Also give features of special interest. if any.	10
	(d) Make a suitable preparation of given material 'E' (reproductive part only) Draw labelled diagram. Identify it giving reasons.	6
2.	Perform the physiology experiments as assigned to you. Describe the methodology and record your observations. Exercise 'a'	20
	Exercise 'b'	10
3.	(i) Perform the microbiological exercise given to you. Draw suitable diagram describe methodology and record your observations.	10
	(ii) Prepare a suitable slide of the given microbiological exercise. Draw diagram, describe methodology and record your results.	7
	(iii) Prepare a suitable slide of the given material 'G' for histological study. Draw labelled diagram. Identify the pathogen giving reasons.	12
4.	Spots 6X3	18
5.	Herbarium	5
6.	Sessional Marks	22
7.	Viva voce	15

Scheme of Examination

Max. Marks 100

Each paper will have 9 questions, out of which a student has to attempt 5 questions including the question No.1 which will be compulsory. The question No.1 will carry 20 marks and will be of short answer type questions with a limit of 20 words.

Unit-I

Introduction : Unique features of plant development; differences between animal and plant development.

Seed germination and seedling growth : Metabolism of proteins and mobilization of food reserves; tropisms during seed germination and seedling growth; hormonal control of seedling growth; gene expression; use of mutants in understanding seedling development.

Shoot development : Organization of the shoot apical meristem (SAM); cytological and molecular analysis of SAM; control of cell division and cell to cell communication; primary and secondary tissue differentiation, control of tissue differentiation, especially xylem and

Pg Jay

Dy. Registrar (Acad.)
University of Rajasthan
JAIPUR

phloem; secretory ducts and laticifers; wood development in relation to environmental factors.

Unit-II

Leaf growth and differentiation : Inception, phyllotaxy; control of leaf form (leaf meristem and other factors), differentiation of epidermis (with special reference to stomata and trichomes) and mesophyll, Kranz anatomy, leaf traces and leaf gaps, transfer cells.

Root development : Organization of root apical meristem (RAM), vascular tissue differentiation, lateral roots, root hairs, root-microbe interactions.

Seed Coat development: External and Internal morphology of seed, seed appendages, ontogeny of seed coat in various families, mature structure, spermoderm patterns.

Unit-III

Reproduction : Vegetative options and sexual reproduction, flower development, genetics of floral organ differentiation, homeotic mutants in Arabidopsis and Antirrhinum.

Male gametophyte : Structure of anthers; microsporogenesis, role of tapetum; pollen development and gene expression; male sterility; sperm dimorphism and hybrid seed production; pollen germination, pollen tube growth and guidance; pollen storage; pollen allergy; pollen embryos.

Female gametophyte : Ovule development; megasporogenesis; organization of the embryo sac; structure of the embryo sac cells.

Pollination, pollen-pistil interaction and fertilization: pollination mechanisms and vectors, structure of the pistil, pollen-stigma interactions, sporophytic and gametophytic self-incompatibility (cytological, biochemical and molecular aspects); double fertilization; in vitro fertilization.

Unit-IV

Seed development and fruit growth: Endosperm development, embryogenesis, cell lineages during late embryo development, storage proteins of endosperm and embryo.

Polyembryony, apomixis; embryo culture, dynamics of fruit growth; biochemistry and molecular biology of fruit maturation.

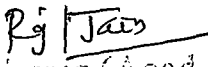

Latent life - dormancy: Importance and types of dormancy; seed dormancy; overcoming seed dormancy; bud dormancy.

Senescence and programmed cell death (PCD): Basic concepts, types of cell death, PCD in the life cycle of plants, metabolic changes associated with senescence and its regulation; influence of hormones and environmental factors on senescence.

 JAIPUR

20. The Plant Cell. Special Issue on Reproductive Biology of Plants. Vol. 5(10) 1993. The American Society of Plant Physiologists, Rockville, Maryland, USA.

Suggested Laboratory/Field Exercises

1. Study of living shoot apices by distichous using aquatic plants such as *Tabernaemontana*, *albizia*.
2. Study of cytohistological zonation in the shoot apical meristem (SAM) in sectioned and double-stained permanent slides of a suitable plant. Examination of shoot apices in a mono cotyledon in both T.S. and L.S. to show the origin and arrangement of leaf primordia.
3. Study of alternate and distichous, alternate and superposed, opposite and superposed; opposite and decussate leaf arrangement. Examination of rosette plants (*Launaea*, *Mollugo*, *Raphanus*, *Hyoscyamus* etc.) and induction of bolting under natural conditions as well as by GA treatment.
4. Microscopic examination of vertical sections of leaves such as Cannabis, tobacco, Nerium, maize and wheat to understand the internal structure of leaf tissues and trichomes, glands etc. Also study the C3 and C4 leaf anatomy of plants.
5. Study of epidermal peels of leaves such as *Coccinia*, *Tradescantia*, to study the development and final structure of stomata and prepare stomatal index.
6. Study of types of stomata in plants belonging to different families.
7. Study of whole roots in monocots and dicots.
8. Examination of L.S. of root from a permanent preparation to understand the organization of root apical meristem and its derivatives, (use maize, aerial roots of *banyan* etc.)
9. Study of lateral root development.
10. Study of leguminous roots with different types of nodules.
11. Study of primary and secondary tissue differentiation in roots and shoots.
12. Study of seed coat types-*Pisum*, *Cucurbita*, Wheat.
13. Study of vascular tissues by clearing technique.
14. Study of microsporogenesis and gametogenesis in sections of anthers at different ages.
15. Examination of modes of anther dehiscence and collection of pollen grains for microscopic examination (maize, grasses, *Cannabis sativa*, *Crotolaria*, *Tradescantia*, *Brassica*, *Petunia*, *Solanum melongena*, etc.)
16. Study of wall layer anther.
17. Tests for pollen viability using stains and in vitro germination.

Dy. Registrar (Acad.)
University of Rajasthan
JAIPUR

18. Pollen germination using hanging drop and sitting drop cultures, suspension culture and surface culture.
19. Estimating percentage and average pollen tube length in vitro.
20. Study of ovules in cleared preparations, study of monosporic, bisporic and tetrasporic types of embryo sac development thorough examination of permanent, stained serial sections.
21. Field study of several types of flowers with different pollination mechanisms.
22. Emasculation, bagging and hand pollination to study pollen germination.
23. Study of nuclear and cellular endosperm through dissections and staining.
24. Isolation of zygotic globular, heart-shaped, torpedo stage and mature embryos from suitable seeds.
25. Polyembryony in citrus, jamun (*Syzygiumcumini*) etc. by dissections.
26. Biochemical Estimation (qualitative and quantitative) of metabolites of seeds.

Suggested Readings (for Laboratory Exercises)

Paper-VIII : Plant Ecology

Scheme of Examination

Max. Marks 100

Each paper will have 9 questions, out of which a student has to attempt 5 questions including the question No.1 which will be compulsory. The question No.1 will carry 20 marks and will be of short answer type questions with a limit of 20 words.

Unit-I

Science of Ecology: Introduction of Ecology, Evolutionary ecology, ecological models;

Population: Characteristics of population, population size and exponential growth, limits of population growth, Competition and coexistence, intra-specific interactions, interspecific interactions, scramble and contest competition model, mutualism, commensalism and allelopathy, prey-predator interactions.

Vegetation organization : Concepts of community and continuum, community coefficients; interspecific associations, ordination, species diversity and pattern diversity in community, concept of habitat and ecotone, ecological niche.

Unit-II

Vegetation development : Temporal changes (cyclic and non-cyclic), mechanism of ecological succession (relay floristic and initial floristic composition), succession models (facilitation, tolerance and inhibition models), Changes in ecosystem properties during succession, concept of climax.

Ecosystem: Nature and size of ecosystem, components of an ecosystem (Producers, consumers and decomposers), Grazing (grassland) and Detritus food chain in freshwater ecosystems, food webs, ecological energetic: Solar radiation and energy intakes at the earth's surface, energy flow models, Productivity of various ecosystems of the world and global biogeochemical cycles of carbon and nitrogen.

Unit-III

Ecosystem stability : Concept (resistance and resilience), ecological perturbations (natural and anthropogenic) and their impact on plants and ecosystems, Restoration of degraded ecosystem, ecology of plant invasion, environmental impact assessment, ecosystem restoration.

Biomes and biodiversity : Major biomes of the world and impact of changing climate on biomes, Biodiversity: Concept and levels, role of biodiversity in ecosystem functions and stability, assessment (local, national and global), speciation and extinction,

Rg Nar

Dy. Registrar (Acad.)
University of Rajasthan
JAIPUR

Biodiversity act of India and related international conventions, diversity indices, IUCN categories of threat, Hot spots.

Unit-IV

Conservation: Conservation (ex-situ and in situ) and management. International conservational organizations, sustainable development, nature resource management in changing environment, molecular ecology, genetic analysis of single and multiple population, conservation genetics.

Energy: Sources, Fossil fuels, Nuclear fuel, Solar energy, Fuel cells, Biomass, Hydropower, Wind Power, Geothermal, Tidal & Wave energy, Energy conservation.

16. G.T. Miller Jr. 2005. Essentials of Ecology. III edition, Thomas Brooks/Cole.

Suggested Laboratory Exercises

1. To determine minimum size and number of quadrats required for reliable estimate of biomass in grasslands.
2. To compare protected and unprotected grassland stands using community coefficients (similarity indices).
3. To estimate IVI of the species in a woodland using point centered quarter method.
4. To determine gross and net phytoplankton productivity by light and dark bottle method.
5. To determine soil moisture content, porosity and bulk density of soils collected from varying depths at different locations.
6. To determine the water holding capacity of soils collected from different locations.
7. To determine percent organic carbon and organic matter in the soils of crop and, grassland and forest.
8. To estimate the dissolved oxygen content in eutrophic and oligotrophic water samples by azide modification of Wrinkler's method.
9. To estimate chlorophyll content in SO, fumigated and unfumigated plants leaves.
10. To estimate rate of carbon dioxide evolution from different soils using soda lime or alkali absorption method.
11. To study environmental impact of a given developmental activity using checklist as & EIA method.

JAIPUR

Paper -IX : Plant Resource Utilization and Conservation

Scheme of Examination

Max. Marks 100

Each paper will have 9 questions, out of which a student has to attempt 5 questions including the question No.1 which will be compulsory. The question No.1 will carry 20 marks and will be of short answer type questions with a limit of 20 words.

Unit-I

Plant Biodiversity : Concept, status in India, utilization and concerns.

Sustainable development : Basic Concepts. Origins of agriculture.

World centres of primary diversity of domesticated plants : plant introductions and secondary centres

Unit- II

Origin, evolution, botany cultivation and uses of: (i) Food, forage and fodder crops, (ii) fibre crops, (iii) medicinal and aromatic plants, and (iv) vegetable oil-yielding crops.

Unit-III

Important fire-wood and timber-yielding plants and non wood forest products (NWFPs) : such as bamboos, rattans, rawmaterials for paper making, gums, tannins, dyes, resins and fruits.

Green revolution : Benefits and adverse consequences. Innovations for meeting world food demands.

Plants used as avenue trees for shade, pollution control and aesthetics. Principals of conservations, extinctions, environmental status of plants based on International Union for Conservation of Nature.

Unit-IV

Strategies for conservation-in situ conservation : International efforts and Indian initiatives, protected areas in India- sanctuaries, national parks: biosphere reserves, wetlands, mangroves and coral reefs, conservation of Wild biodiversity.

Strategies for conservation-ex situ conservation: Principles and practices, botanical gardens, field gene banks, Seed banks, in vitro repositories, cryobanks, general account of the activities of Botanical Survey of India (BSI), National Bureau of Plant Genetic Resources (NBPGR), Indian Council of Agricultural Research (ICAR), Council of Scientific and Industrial Research (CSIR), and the Department of Biotechnology (DBT) for conservation, non-formal conservation efforts.

Suggested Laboratory Exercises

The Practical course is divided into three units : (1) Laboratory work, (2) Field survey and (3) Scientific visits.

Laboratory Work

1. **Food crops** : Wheat, rice, maize, chickpea (Bengali gram), potato, tapioca, sweet potato, sugarcane. Morphology, anatomy, microchemical tests for stored food materials.
2. **Forage/fodder crops** : Study of any five important crops of the locality (for example fodder sorghum, bajra, berseem, clove, guar bean, gram, Ficus sp.)
3. **Plant fibers**:
 - a. Textile fibres : cotton, jute, linen, sunn hemp, Cannabis.
 - b. Cordage fibres: coir
 - c. Fibres for stuffing : silk, cotton, or kapok
 Morphology, anatomy, microscopic study of whole fibres using appropriate staining procedures.
4. **Medicinal and aromatic plants** : Depending on the geographical location college/university select five. medicinal and aromatic plants each from a garden crop field (or from the wild only if they are abundantly available).
Papaver somniferum, Atropa belladonna, Catharanthus roseus, Adhatodaceylanica (Syn A. vasica), Allium sativum, Rauvoffia serpentina, Withaniasomnifera, Phyllanthus amarus, (P. fraternus), Andrographis paniculata, Aloe barbadens, Mentha arvensis, Rosa sp., Pogostemoncablin, Origanum vulgare, Vetiveriazizanioides, Jasminum grandiflorum, Cymbopogon sp., Pandanus odoratissimus.

 Dy. Registrar (Acad.)
 University of Rajasthan
 JAIPUR

Study of live or herbarium specimens or other visual materials to become familiar with these resources.

5. Vegetable oils : Mustard, groundnut, soyabean, coconut, sunflower, castor, Morphology, microscopic structure of the oil-yielding tissues, tests for oil and iodine number.
6. Gums, resins, tannins, dyes : Perform simple tests for gums and resins. Prepare a water extract of vegetable tannins (*Acacia*, *Terminalia*, mangroves, tea. *Cassia spp.*, myrobalans) and dyes (turmeric, *Bixa orellana*, indigo, *Butea monosperma*, *Lawsoniainermis*) and perform tests to understand their chemical nature.

Field Survey

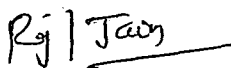

1. Firewood and timber yielding plants and NWF's:

- a. Prepare a short list of 10 most important sources of firewood and timber in your locality. Give their local names, scientific names, and families to which they belong. Mention their properties.
- b. Prepare an inventory of the bamboos and rattans of your area giving their scientific and local names and their various uses with appropriate illustrations.
- c. A survey of a part of the town or city should be carried out by the entire class in batches. Individual students will select one avenue road and locate the trees planted on a graph paper. They will identify the trees, mention their size, canopy shape, blossoming and fruiting period and their status (healthy, diseased, infested, mutilated, misused or dying) and report whether or not the conditions in which they are surviving are satisfactory. The individual reports will be combined to prepare a larger map of the area, which can be used for subsequent monitoring either by the next batch of students/ teachers / local communities/ NGOs/or civic authorities. The purpose of exercise in item C above is to make the students aware of the kinds of trees and value in urban ecosystems and ecological services.

Scientific Visits*

The students should be taken to one of the following:

- (i). A protected area (biosphere reserve, national park, or a sanctuary)
- (ii). A wet land
- (iii). A mangrove
- (iv). National Bureau of Plant Genetic Resources, New Delhi-110012 or one of its field stations.

Dy. Registrar (Acad.)
University of Rajasthan
JAIPUR

- (v). Head Quarters of the Botanical Survey of India or one of its Regional Circles.
- (vi). A CSIR Laboratory doing research on plants and their utilization.
- (vii). An ICAR Research Institute or a field station dealing with one major crop or crops.
- (viii). A recognized botanical garden or a museum (such as those at the Forest Research Institute, Dehradun; National Botanical Research Institute, Lucknow; Tropical Botanical Garden and Research Institute, Trivandrum), which has collection of plant products.

Note : The students are expected to prepare a brief illustrated narrative of the Field Survey and Scientific Visits. After evaluation, the grades awarded to the students by the teachers should be added to the final assessment of the practical examination

Dy. Registrar (Acad.)
University of Rajasthan
JAIPUR

**Paper-X : Biotechnology and Genetic Engineering of
Plants and Microbes**

Schemes of Examination

Max. Marks : 100

Each paper will have 9 questions, out of which a student has to attempt 5 questions including the question No.1 which will be compulsory. The question No.1 will carry 20 marks and will be of short answer type questions with a limit of 20 words.

Unit-I

Biotechnology : Basic concepts, principles and scope.

Plant Cell and tissue culture : General introduction, history scope, concept of cellular differentiation, totipotency.

Organogenesis and adventive embryogenesis: Fundamental aspects of morphogenesis: somatic embryogenesis and androgenesis mechanisms, techniques, and utility.

Unit-II

Somatic hybridization: Protoplast isolation, Fusion and culture, hybrid selection and regeneration, possibilities, achievements and limitations of protoplasts research.

Applications of plant tissue culture : Clonal propagation, artificial seed, production of hybrids and somaclones, production secondary metabolites/natural products, cryopreservation and germplasm storage.

Recombinant DNA technology: Gene cloning principles and techniques, construction of genomic/cDNA libraries, choice of vectors, DNA synthesis and sequencing, polymerase chain reaction, DNA finger printing.

Unit-III

Genetic engineering of plants: Aims strategies for development of transgenics (with suitable examples), Agrobacterium-the natural genetic engineer, T-DNA and transposon mediated gene tagging, chloroplast transformation and its utility, intellectual property rights, possible ecological risks and ethical concerns.

Microbial genetic manipulation : Bacterial transformation, selection of recombinants and transformants, genetic improvement of industrial microbes and nitrogen fixers, fermentation technology.

Unit-IV

Genomics and proteomics : Genetic and physical mapping of genes, molecular markers for introgression of useful traits, artificial

Dy. Registrar (Acad.)
University of Rajasthan
JAIPUR

chromosomes, high throughput sequencing, genome projects, bioinformatics, functional genomics, microarrays, protein profiling and its significance.

Bioactive Compounds : Alkaloid, antioxidants, flavonoid, proteins and terpenoids.

Suggested Laboratory Exercises

1. Growth characteristics of E. coli using plating and turbidimetric methods.
2. Isolation of plasmid from E. coli by alkaline Lysis method and its quantitation spectrophotometrically.
3. Restriction digestion of the plasmid and estimation of the size of various DNA fragments.
4. Cloning of a DNA fragment in a plasmid vector, transformation of the given bacterial population and selection of recombinants.
5. Demonstration of DNA sequencing by Sanger's di-deoxy method.
6. Isolation of protoplasts from various plant tissues and testing their viability.
7. Effect of physical (e.g. temperature) and chemical (e.g. osmoticum) factors on protoplast yield.
8. Demonstration of protoplast fusion employing PEG.
9. Organogenesis and somatic embryogenesis using appropriate explants and preparation of artificial seed.
10. Demonstration of androgenesis in Datura.
11. Electroporation of protoplasts and checking of transient expression of the reporter gene.
12. Co-cultivation of the plant material (e.g. leaf discs) with Agrobacterium and study GUS activity histochemically.

Paper-XI (a) : Advanced Plant Pathology - I

Schemes of Examination

Max. Mark : 100

Each paper will have 9 questions, out of which a student has to attempt 5 questions including the question No.1 which will be compulsory. The question No.1 will carry 20 marks and will be of several short objective type of questions such as multiple choice type, one line answer type, one word type and fill in the blanks type.

Unit-I

Plant Pathology : History & Scope. Nature, Origin & Evolution of parasitism. Biotic and abiotic pathogens. Pathogen factors in disease development. Penetration, infection and pathogenesis. Physiological specialisation in phytopathogenic microbes.

Unit-II

Host factors in disease development: Inoculum potential; Phenomena of resistance and susceptibility. Protective and defence mechanisms in plants; Phytoalexins. Breeding for disease resistant plants.

Environmental factors in disease development: Epiphytotics and plant disease forecasting.

Unit-III

IPM, Application of biotechnology and information technology to pest management.

Molecular Plant Pathology : Molecular diagnosis, identification of genes and specific molecules in disease development; molecular manipulation of resistance. Non-parasitic diseases and control measures.

Unit-IV

Principles of plant protection, Physical, chemical and biological control of plant diseases,

Classification and anatomy of galls : Some insect induced plant galls of Rajasthan, mechanism and physiology of insect galls.

R. J. Rao
Dy. Registrar (Acad.)
University of Rajasthan
JAIPUR

Paper-XII (a) : Advanced Plant Pathology - II

Schemes of Examination

Max. Mark : 100

Each paper will have 9 questions, out of which a student has to attempt 5 questions including the question No.1 which will be compulsory. The question No.1 will carry 20 marks and will be of several short objective type of questions such as multiple choice type, one line answer type, one word type and fill in the blanks type.

Unit-I

Fungal diseases : Symptomatology, disease identification and control of flag smut of wheat, covered smut of barley, blast of paddy, smut of Jowar, Red rot of sugarcane, flax rust.

Unit-II

Bacteria : Classification and nomenclature of bacterial plant pathogens. Methods of identification of bacterial pathogens (morphology, physiology, serology and pathogenicity).

Bacterial diseases : Brown rot of potato, blight of rice, soft rot of vegetables, crown gall disease, angular leaf spot of cotton.

Unit-III

Virus, viroid and phytoplasma disease : Symptomatology and transmission of viral diseases; Potato virus X & Y, Tomato ring mosaic, bunchy top of banana; viroids and important viroid diseases. Phytoplasma General account; Sesame phyllody, Spike disease of sandal.

Unit-IV

Nematology : Brief history, classification and identification of plant pathogenic nematodes. Morphology and anatomy of nematodes. Methods used in Nematology.

Control of plant parasitic nematodes. Nematode Disease : Molya disease of wheat & barley / ear cockle of wheat, root-knot disease.

Raj Jain
Dy. Registrar (Acad.)
University of Rajasthan
JAIPUR

Paper-XI (b) : Seed Science and Technology - I

Schemes of Examination

Max. Mark : 100

Each paper will have 9 questions, out of which a student has to attempt 5 questions including the question No.1 which will be compulsory. The question No.1 will carry 20 marks and will be of short answer type questions with a limit of 20 words.

Unit-I

History of seed testing and its importance to agriculture, aims of seed testing, Seed definition and its types, Sampling of seeds, purity analysis (physical and genetical), seed moisture content, germination test, rapid test of viability and evaluation, various method of seed separation, cleaning and drying and Seed Processing Plant and its process.

Unit-II

Gross architecture of seed structure of angiosperms, Identification and structure of seeds of important crop plants with special reference to Rajasthan (Wheat, pearl millet, mustard, gram pea) and Identification of designated objectionable weeds at seed level. Physiology of seed germination; seed and seedling vigour.

Unit-III

Principals of seed production, seed production in self and cross pollinated crops; hybrid seed production. Production of Foundation and certified seeds; synthetic seeds, terminator seed technology, Seed storage methods, principals for safe seed storage, effects of storage, mycotoxins-major groups, detection and detoxification, Deterioration of seeds in storage by microorganisms, insects and rodents; control of seed deterioration.

Unit-IV

Seed certification standards and quarantine regulations. International cooperation. International Seed Testing Association – rules and recommendations, Certificates, other seed certificates; Indian Seed Act and recent amendments, National and Regional Seed Corporation of India- their organisation, aims and functions. National and International Co-operation in Seed Pathology. Sanitary and phytosanitary (SPS) agreements of WTO.

List of suggested Practical exercises:

R. J. Nay
Dy. Registrar (Acad.)
University of Rajasthan
JAIPUR

1. Structure of seeds of some crop plants (wheat, pearl millet, mustard, gram, and pea).
2. Preparation of inventory of designated objectionable weeds at seed level and identification.
3. Identification of seed coat cracking.
4. Study of physical purity of seed sample.
5. Study of seed germination, seedling abnormality and seedling index.
6. Determination of moisture content of seeds.
7. TZ test for seed viability
8. Assay of enzymes in crop seeds.
9. Preparation of synthetic seeds.
10. Localization of starch, protein, lipids, tannins, phenols and lignin in seed sections.
11. Isolation and identification of storage fungi.
12. Preparation of phytosanitary certificate etc. of seed lot.

Paper-XII (b) : Seed Science and Technology - II

Schemes of Examination

Max. Mark : 100

Each paper will have 9 questions, out of which a student has to attempt 5 questions including the question No.1 which will be compulsory. The question No.1 will carry 20 marks and will be of short answer type questions with a limit of 20 words.

Unit-I

Introduction and importance of seed pathology in modern agriculture. History of seed pathology. Various method for testing seed-borne fungi, bacteria and viruses (Dry seed examination, Seed washing test, incubation methods, cultural, biochemical, serological, nucleic acid base test).

Unit-II

Mechanism of seed infection and its types, environment influencing seed infection, infected/contaminated part of seed, morphology and anatomy of seeds in relation to invasion, location of inoculum of the pathogen in seed- seed coat and pericarp, endosperm and perisperm and embryo.

Seed-borne diseases of some important crops with particular reference to the state of Rajasthan and India. Typical case of infection by fungi (wheat smuts and bunts, sesame-charcoal rot; bacteria (Brassicac- black rot, cluster bean- bacterial blight); viruses (Tomato mosaic virus, pea seed borne mosaic virus,) and nematodes (Wheat ear cockle, rice white tip).

Unit-III

Seed-borne inoculum, inoculum density and seed-borne inoculum in relation to plant infection, epiphytotic due to seed-borne inoculum, disease forecast based on infected seed samples: tolerance limits of seed borne pathogens.

Transmission of seed borne disease: Systematic and non-systematic disease transmission, types of disease transmission, mode of establishment and course of disease from seed to seedling and plant, factors affecting seed transmission.

Unit-IV

Management of seed-borne disease, principles of control, seed treatments (physical, chemical and biological), mechanism of action

Raj / Jay
Dy. Registrar (Acad.)
University of Rajasthan
JAIPUR

of seed treatment, major seed treatments for important seed pathogens and their methods of application.

List of suggested Practical exercises:

1. Dry seed examination of seed lots
2. Isolation and Identification of seed borne mycoflora by standard blotter method.
3. Preparation of culture media (PDA and NA)
4. Plating seed on PDA/NA for identification of food borne fungi and bacteria
5. Other methods of plating e.g. deep freezing; 2.4D- blotter method.
6. Water agar test tube seedling symptom test.
7. Study of any seed borne nematode disease.
8. Detection of bacterial and viral pathogens in seeds.
9. LOPAT tests for detection of seed borne pathogens.
10. Nucleic acid based detection of seed borne pathogens.
11. Histopathology of infected seed samples.
12. Physical control of seed borne pathogens.
13. Antibiotic/fungicidal assay against seed borne pathogens.
14. Biological control of seed borne pathogens.
15. Field visits: Crop fields, FCI, NSC, Seed testing labs, quarantine station (e.g. NBPGR) etc.

Paper-XI (c) : Ecosystem Ecology

Schemes of Examination

Max. Mark : 100

Each paper will have 9 questions, out of which a student has to attempt 5 questions including the question No.1 which will be compulsory. The question No.1 will carry 20 marks and will be of short answer type questions with a limit of 20 words.

Unit-I

Grassland Ecosystems - Characteristics of grasslands, stratification, grasslands and grazing, grasslands and drought, grassland and animal life, Grasslands types with special reference to Prairie and Savannah, Indian grasslands.

Forest Ecosystems - Stratification of the forest, Forest types - Boreal, Temperate and Tropical forests, Forest animal life

Unit II

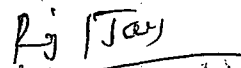

Freshwater Ecosystems -Classification of Freshwater Habitats, Lentic: Lakes & Ponds: Temperature and Oxygen stratification, Zonation based on light penetration, Flora and fauna, Productivity classes of lakes, Marshes and Swamps, Bogs Lotic: Springs, Streams and Rivers.

Marine and Estuarine Ecosystems - Characteristics of marine environment: Salinity, Temperature and pressure, Zonation and Stratification, Tides, Estuarine ecosystem: Types of Estuaries, Flora and fauna, Estuarine productivity, Coral reef ecosystem, Mangrove ecosystem

Unit III

Urban Ecosystem -Urban environment and Climatic conditions, additional physical complexes (modified surfaces including parking lots, roofs, and landscaping, buildings, transportation networks, infrastructure and public amenities), flora and fauna (human beings as largest macro consumer), Implications of urbanization: problems of air pollutants, drinking water supply, floods, waste disposal.

Rural ecosystems: Rural environment and climate, physical complexes (fields, agricultural implements and machines), Flora and

Dy. Registrar (Acad.)
University of Rajasthan
JAIPUR

fauna, Problems of discharge of chemical fertilizers, pesticides and drinking water. Management of waste, Principle; Social Forestry.

Unit III

Desert Ecosystem: Desert: Definition, classification (hot and cold), physiography, desert features, flora, fauna and water, formation, topography, distribution and characteristics of world deserts; **Thar desert:** Sand dunes: types, origin and morphology of sand dunes; Vegetation types and plant communities, biological production, conservation of flora and fauna, wild life, Succession in vegetation of western Rajasthan and coastal sand dunes, economic importance of desert plants (general economic plants, medicinal, famine food plants and crops);

Saline Arid zones: Saline tracts of Rajasthan and plants of saline arid zones (Halophytes), Economic and social considerations in the management of salt affected soils, afforestation in salt affected soils, Importance of halophytes.

Suggested Readings

2. Smith, R.L. 1996. Ecology and Field Biology, Harper Collins, New York.
3. Subrahmanyam, N.S. and A.V.S.S. Sambamurty 2000. Ecology. Narosa Publishing House, New Delhi.
4. G. M. Masters and W. P. Ela. 2008. Introduction to environmental engineering and sciences. PHI Learning Private Limited, New Delhi.
5. W. P. Cunningham and M. A. Cunningham. 2003. Principles of Environmental Science: Inquiry and Applications. Tata Mcgraw-Hill Publishing Company Limited, New Delhi

Suggested Laboratory Exercises

1. Find out stomatal index of Xerophytes (*Nerium*, *Calotropis*, *Zizyphus*,) growing in your locality.
2. Study of trichomes of xerophytes (*Zizyphus*, *Lantana*, *Calotropis*, *Aerua*) growing in your locality.
3. Study spread of root system of a perennial species in the soil
4. Study ecological adaptations of halophytes in your nearby area.

Dy. Registrar (Acad.)
University of Rajasthan
JAIPUR

5. Seed Viability by T.T.C. method
6. Dormancy (seed coat & temperature) in seeds .
7. Soil moisture and temperature at different depths
8. Salinity of soil sample.
9. Study of Canopy and Basal Cover of trees in your study area
10. Estimate primary productivity of a water body by light and dark bottle method
11. Mean leaf area of 2 plant Species growing in your area by graph method
12. Relative humidity by hair hygrometer
13. Light intensity by lux meter

Dy. Registrar (Acad.)
University of Rajasthan

Paper-XII (c) : Environmental Biology

Schemes of Examination

Max. Mark : 100

Each paper will have 9 questions, out of which a student has to attempt 5 questions including the question No.1 which will be compulsory. The question No.1 will carry 20 marks and will be of short answer type questions with a limit of 20 words.

Unit-I

Air Pollution: Important Primary (CO, CO₂, Oxides of Sulphur & Nitrogen, H₂S, Chlorine, Particulates, Odour Producing compounds) & Secondary Air Pollutants (Smog, Acid rain, Primary Photochemical reaction, Formation of ozone and peroxyacetyl nitrate in air), Effects of air pollutants on Buildings & Monuments, Plants, man and animals; Biomonitoring, Air pollution control (particulates and gaseous pollutants), Green belt, Ozone depletion, mechanism of depletion, control strategies;

Unit-II

Water Pollution: Eutrophication – Process and CONTRL; Oil Pollution, Thermal Pollution, Heavy metal Pollution, Treatment, Disposal & Recycling of Wastewaters, drinking water standards, Minimum National Standards

Solid & Hazardous waste management & Resource Recovery: Solid wastes, Types, collection, Shrinking waste streams: 3Rs (Reduction, Recycle & Reuse), composting, energy from waste, demanufacturing; Methods of disposal: Landfill, Open dumps, Exporting waste; Hazardous waste: Definition, disposal and management.

Unit-III

Climatic Issues: Greenhouse gases (CO₂, CH₄, N₂O, CFCs: sources, trends and roles and consequence of greenhouse effects (CO₂ fertilization, global warming, sea level rise, Biodiversity erosion), Carbon sequestration, Applications of GIS and REMOTE Sensing technology in environmental studies, the future of planet earth.

Policies, Regulations & related issues: Water (Prevention and Control of Pollution) Act 1974; Air (Prevention and Control of

Rj / Jan
Dy. Registrar (Acad.)
University of Rajasthan
JAIPUR

Pollution) Act 1981; Environment (Protection) Act 1986, Wild Life Protection Act 1972, Forest (Conservation) Act 1980, Biodiversity Act 2002.

Unit-IV

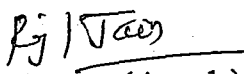

Environmental Concerns: Environmental auditing, Ecological footprints, Environment Impact Assessment, Bioindicator and biomarkers of environmental mhealth; Environmental economics, Ecopolitics and green policies; Ecolabel, Rain water harvesting, Orans, Indira Gandhi Canal and its ecological implications, water logging & salinity problems – The management alternatives.

Suggested Readings

10. S. K. Maiti, 2004. Handbook of Methods in Environmental Studies Vol. 1 & 2. ABD Publisher, Jaipur

Suggested Laboratory Exercises

1. To estimate pH, EC and Secchi Disc transparency for polluted and unpolluted water bodies.
2. To estimate Chemical Oxygen Demand of polluted water sample.

Dy. Registrar (Acad.)
University of Rajasthan
JAIPUR

3. To estimate Biological Oxygen Demand of polluted water sample.
4. To estimate inorganic phosphorus content in water samples collected from polluted and unpolluted water bodies.
5. To estimate Total hardness, calcium and magnesium content in water samples collected from polluted and unpolluted water bodies.
6. To estimate chloride content in water samples collected from polluted and unpolluted water bodies.
7. To estimate Total alkalinity in water samples collected from polluted and unpolluted water bodies.
8. To determine diversity indices (Shannon - Wiener, concentration of dominance, species richness, equitability and β - diversity) for polluted and unpolluted water bodies.
9. Chlorophyll content of plant species growing in polluted (along JLN Marg) and unpolluted habitat Botany Department).

R. J. Jain
Dy. Registrar (Acad.)
University of Rajasthan
JAIPUR

Paper-XI (d) : Advanced Plant Physiology - I

Schemes of Examination

Max. Mark : 100

Each paper will have 9 questions, out of which a student has to attempt 5 questions including the question No.1 which will be compulsory. The question No.1 will carry 20 marks and will be of short answer type questions with a limit of 20 words.

Unit-I

Proteins and Enzymes : Techniques of protein purification, protein sequencing and proteomics, enzyme kinetics, Michaelis-Menten equation and significance of K_m value, negative and positive cooperativity, enzyme nomenclature and EC number, catalytic mechanisms; acid-base catalysis, covalent catalysis, metal ion catalysis, electrostatic catalysis, catalysis through proximity-orientation effect and catalysis through transition state bonding, Lysozyme as model enzyme for catalytic mechanism, regulation of enzyme activity; feedback and allosteric regulation, active sites, coenzymes, activators and inhibitors, isoenzymes, ribozymes and abzymes.

Unit-II

Nucleotides: Biosynthesis of ribonucleotides (purines and pyrimidines), formation of deoxyribonucleotides, salvage purines, nucleotide degradation.

Vitamins : Water and fat-soluble vitamins, biochemical/function of thiamine, riboflavin, nicotinic acid, pantothenic acid, pyridoxin, biotin, folic acid, vitamin B₁₂, ascorbic acid, vitamin A and vitamin D.

Unit-III

Secondary metabolites :

Coumarins and lignins : structure and synthesis.

Insecticides : (pyrethrins and rotenoids) distribution, chemistry and function.

Tannins : distribution synthesis and function.

Flavonoids and water-soluble pigments: synthesis and function.

Raj Jain
Dy. Registrar (Acad.)
University of Rajasthan
JAIPUR

Unit-IV

Hallucinogens :distribution, chemistry and function.

Alkaloids : pyrrole, pyrrolidine, pyridine, polyacetyloquinoline, tropane and indole alkaloids - their distribution, synthesis and function.

Saponins and sapogenins: sterols, steroids, steroidal alkaloids – their distribution, synthesis and function.

Cardiac glycosides : their distribution, structure and function.

Paper-XII (d) : Advanced Plant Physiology - II

Schemes of Examination

Max. Mark : 100

Each paper will have 9 questions, out of which a student has to attempt 5 questions including the question No.1 which will be compulsory. The question No.1 will carry 20 marks and will be of short answer type questions with a limit of 20 words.

Unit-I

Plant growth regulators : Natural and synthetic, biochemistry and physiological effects of brassinosteroids, jasmonic acid, salicylic acid, polyamines, morphactins and cyanogenic compounds.

Signal transduction in plants: Receptors and G-proteins, phospholipid signaling, role of cyclic nucleotides, calcium-calmodulin cascade, diversity of protein kinases and phosphatases, signal transduction mechanisms with special reference to: Gibberellin induced signal transduction, auxin induced signal and cytokinin induced signal transduction.

Unit-II

Stress physiology : Plant responses to biotic and abiotic stresses, mechanism of biotic and abiotic stress resistance, plant defense mechanisms against water stress, salinity stress, metal toxicity, freezing and heat stress and oxidative stress.

Unit-III

Photobiology - Photoreceptors, phytochrome : history, discovery, physiological properties, interaction between hormones and phytochrome, role of different phytochromes in plant development and flowering, mechanism of phytochrome signal transduction. Physiology of flowering photo-periodism and vernalisation.

Circadian rhythms in plants : nature of oscillator, rhythmic outputs, entrainments (inputs) and adaptive significance.

Unit-IV

Pg | Jay
Dy. Registrar (Acad.)
University of Rajasthan
JAIPUR

Tools and Techniques: Principles and application of spectrophotometry, Principles of chromatography, partition chromatography, thin layer chromatography, ion-exchange chromatography, gas-liquid chromatography, high performance liquid chromatography, gel filtration, electrophoresis, isoelectric focusing, immobilized pH gradient, ultracentrifugation (velocity and density gradient), ELISA and RIA.

Paper-XI (e) : Advanced Morphology and Morphogenesis-I
Schemes of Examination **Max. Mark : 100**

Each paper will have 9 questions, out of which a student has to attempt 5 questions including the question No.1 which will be compulsory. The question No.1 will carry 20 marks and will be of short answer type questions with a limit of 20 words.

Unit-I

Floral anatomy and its role in explaining the morphology of the Stamen and Carpel, Placentation: Inferior ovary, Taxonomic significance of floral anatomy. Anatomy of the seed and pericarp and their taxonomic significance.

Unit-II

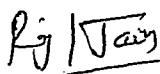

Anther-organizational relationship of anther tissues: ultrastructure aspects of microsporogenesis. Pollen-sporoderm pattern. Pollen analysis, pollen fertility and sterility, allergy due to pollen. Viability, storage and germination of pollen.

Unit-III

Embryosac - basic types and their inter-relationships. Ultrastructural aspects of embryosac development. Endosperm - Inter-relationship of the major types of endosperms, cytology and role in embryo development, Embryo-Major types, embryogenic laws. comparison of Soueges and Johansen's system: physiological factors controlling growth and differentiation of embryo;

Unit-IV

Apomixis - gynogenesis, androgenesis, agri-horticultural importance. Embryological features of the following families: Santalaceae, Loranthaceae, Podostemaceae, Cucurbitaceae, Scrophulariaceae, Acanthaceae, Orobanchaceae, Lentibulariaceae.

Dy. Registrar (Acad.)
University of Rajasthan
JAIPUR

Paper XII (e): Advanced Morphology and Morphogenesis-II
Scheme of Examination **Max. Marks : 100**

Each paper will have 9 questions, out of which a student has to attempt 5 questions including the question No.1 which will be compulsory. The question No.1 will carry 20 marks and will be of short answer type questions with a limit of 20 words.

Unit-I

Development and morphogenesis – shoot apex. the apical cell, meristem. the subcellular and biochemical structure of the meristem. The mechanism of primordium initiation, transition to flowering, growth and formation of organs. Experimental work on apical meristems. Meristem culture and virus free plant. Histochemical studies on apical meristems.

Unit-II

The phenomenon of morphogenesis - correlation. polarity, symmetry, differentiation. regeneration.

Morphogenetic factors - Physical, mechanical, chemical and genetic factors. Molecular basis of morphogenesis in plants with special reference to work done in **Arabidopsis**.

Unit-III

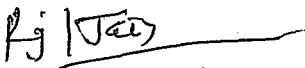

Somatic embryogenesis - Survey of somatic embryogenesis in angiosperms. direct somatic embryogenesis and embryogenesis from callus and protoplasts; cytology. physiology and genetics of somatic embryogenesis, nutritional factors, hormonal factors and embryo rescue in wide hybridization.

Micropropagation advances and synthetic seeds.

Cell Plating technique and isolation of mutant cell lines, auxotrophic mutants. Mechanisms involved in cell culture mutants.

Suspension culture and growth studies.

Unit-IV

Dy. Registrar (Acad.)
University of Rajasthan
JAIPUR

Microtechniques for plant cultures. Fixation (FAA and glutaraldehyde) and embedding in paraffin and GMA. equipment and histological procedures. *Transmission and scanning electron microscopy for plant protoplasts and cultured cells and tissues. Endosperm and ovary culture, control of fertilization, experimental work on embryology of parasitic plants. Role of plant tissue culture in crop improvement.

Paper XI (f) : Biosystematics of Angiosperms-I

Scheme of Examination

Max. Marks : 100

Each paper will have 9 questions, out of which a student has to attempt 5 questions including the question No.1 which will be compulsory. The question No.1 will carry 20 marks and will be of short answer type questions with a limit of 20 words.

Unit-I

Aims, components and principles of taxonomy, Alpha and Omega taxonomy, documentation, scope, significance and relationship of experimental and orthodox taxonomy, Evolutionary taxonomic classification.

Unit-II

Botanical gardens and Arboreta. Information from plant geography, Indian plant geographical regions. Role of Herbaria in taxonomy, Taxonomic literature, Taxonomic resource information (Data analysis coding of characters, statistics).

Principles, rules, rank of plant nomenclature, ICBN - Principles and important rules, type method. Principle of priority and its limitation, Name of hybrids and cultivars, Concept of Biocode.

Unit-III

Biosystematics Procedures: Steps of biosystematics studies, Biosystematic categories - Palynology, Cytology, Embryology, Anatomy and Histochemistry.

Unit-IV

Numerical taxonomy - Principles, Concept, Operational taxonomic units (OTU), Data processing and taxonomic studies, Taxometric methods for study of Population variation and similarity - Coding, Cluster analysis, cladistics.

Rj Jain
Dy. Registrar (Acad.)
University of Rajasthan
JAIPUR

Paper XII (f) : Biosystematics of Angiosperms-II

Scheme of Examination

Max. Marks : 100

Each paper will have 9 questions, out of which a student has to attempt 5 questions including the question No.1 which will be compulsory. The question No.1 will carry 20 marks and will be of short answer type questions with a limit of 20 words.

Unit-I

Experimental taxonomy - Scope and significance. Experimental categories. Relationship in Experimental and orthodox taxonomy. Synthetic theory of evolution.

Unit-II

Concept of species, speciation, species classification, Concept of characters - analytic versus synthetic character, qualitative versus quantitative characters, good and bad characters, Taxonomic characters - Character weighing. Character variation its role in speciation and isolation.

Unit-III

Concept of population, its significance, pattern of phenetic variability, Geographical variability, Transplant experiments. Genotype - environmental interaction, Plasticity. Variation - cause of variation in population. Range of tolerance and phenotypic plasticity, Ecotypes - origin and differentiation. Taxonomic significance of ecotypes.

Unit-IV

Experimental taxonomy and hybridization. Role of hybridization in evolution. Stabilization of hybrids and amphidiploidy. introgression and segregation.

Method of analysis of hybrid complex, Introgressive hybridization. Taxonomic treatment of hybrid complex. Breeding

Rg / Jav
Dy. Registrar (Acad.)
University of Rajasthan
JAIPUR

barriers, epistasis Pleiotropy. Biochemical systematics - method and principles. Systematics markers, chemotaxonomy.

University of Rajasthan
JAI PUR

Paper-XI (g) : Biotechnology-I

Scheme of Examination

Max. Marks : 100

Each paper will have 9 questions, out of which a student has to attempt 5 questions including the question No.1 which will be compulsory. The question No.1 will carry 20 marks and will be of short answer type questions with a limit of 20 words.

Unit-I

The concept of totipotency and history of development of plant tissue culture from Haberlandt to the present development of different PTC media and their nutritional components.

Plant tissue culture laboratory - facilities, operation and management, media preparation and handling; Sterile techniques.

Unit-II

Pathways of plant regeneration - proliferation of axillary buds, adventitious shoot bud proliferation, organogenesis and somatic embryogenesis from callus and suspension cultures.

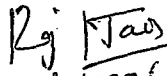

Somatic embryogenesis - Survey of somatic embryogenesis in angiosperms. Zygotic versus somatic embryogenesis in monocots and dicots. Conifer somatic embryogenesis.

Unit-III

Pollen embryogenesis - Discovery of anther culture, survey of anther and pollen culture in dicots and monocots. Pathways of pollen embryogenesis. Cytology and of pollen embryogenesis. stages of pollen development. Haploids for breeding and selection of mutants.

Isolation and culture of protoplasts of grasses; review of the work done with special reference to rice, wheat and maize.

Propagation of ornamental plants by tissue culture. Application of tissue culture in forestry.

Dy. Registrar (Acad.)
University of Rajasthan
JAIPUR

Micropropagation advances and synthetic seeds. Use of ELISA methods to certify pathogen free plants.

Unit-IV

Quantification of tissue culture procedures - fresh and dry weight, culture density by cell count, packed cell volume, mitotic index.

Microtechniques for plant cultures - Fixation (FAA and glutaraldehyde) and embedding in paraffin and GMA, equipment and histological procedures. Transmission and scanning electron microscopy for plant protoplasts, cells and tissues.

Staining procedures for chromosome analysis.

Paper-XII (g) : Biotechnology-II

Scheme of Examination

Max. Marks : 100

Each paper will have 9 questions, out of which a student has to attempt 5 questions including the question No.1 which will be compulsory. The question No.1 will carry 20 marks and will be of short answer type questions with a limit of 20 words.

Unit-I

Transgenic plants - The concept and history of development of transgenesis in plants.

Agrobacterium - mediated transformation.

Unit-II

Direct DNA transfer into intact plant cells - microprojectile bombardment and chemical uptake of DNA by plant protoplasts.

Tools for genetic transformation - Transformation vectors, promoters, terminators, marker and reporter genes.

Unit-III

Regulation of heterologous gene expression - factors affecting gene expression, introns, plant transcriptional factors, gene silencing, antisense RNA.

Transgenic approaches to crop improvement - protection against biotic (virus, fungi, bacteria, nematode, insect, weed) and abiotic stress (salinity, drought, cold, metals). Nutritional quality improvement - golden rice and other developments. Extension of flower life, pigmentation and fragrance.

Unit-IV

Manufacture of valuable products - antigens, antibodies, edible vaccines, enzymes, proteins.

Raj Jain
Dy. Registrar (Acad.)
University of Rajasthan
JAIPUR

Benefits and risks of producing transgenic - plants IPR and regulatory requirements, field testing and regulations to release transgenic plants in India.

Skeleton Paper

**M.Sc. (Final) Special Paper Adv. Plant Pathology
Practical Examination**

Time : 4 hours

M.M. : 100

Q. No.	Questions	Marks Alloted
1.	(a) Study the diseased plant material 'A' Provided; make histopathological investigations Draw labelled drawing and identify the pathogen giving reasons (b) Study and identify the mycoflora from the given material	10 5
2.	Give suitable drawings make a suitable preparation so as to study the given material 'C' identify giving reasons	10
3.	Study the external morphology, histopathology and development stages of given material 'D' Draw labelled diagrams. Identify the causal organisms.	10
4.	Calibrate your microscope with the help of micrometers and measure spores and determine the mean size.	10
5.	From given plant material isolate virus free plantlet through apical meristem culture. Briefly describe the procedure.	8

R. J. Tan
Dy. Registrar (Acad.)
University of Rajasthan
JAIPUR

6.	Stain the given bacterial sample and identify it as gram positive or negative. Write in brief the procedure adopted.	10
7.	Viva-Voce	10
8.	Spots (Four)	12
9.	Practical record	15
