B. DES. IN CRAFT ACCESSORY DESIGN

There will be 5 disciplines and the students can specialize in one of these disciplines.

1. Bachelor of Design (Industrial Design):

I. **Craft Accessory Design**

II. Fashion Design

III. Interior Design

IV. Jewellery Design

2. Bachelor of Design (Communication Design):

I. Graphic Design

Bachelor of Design (Industrial)

I. **Craft Accessory Design**

Industrial design discipline in the classical avatar covered a range of design activities such as Jewellery Design, Fashion design, Craft Accessory Design, Interior Design, Industrial Design & Communication Design. In the 21st Century, we at Rajasthan University choose to redefine these Industrial Design subjects as Human Centred Design, Universal Design, Design for Sustainability, Health care Design, Design for societal needs, Heritage design and Way finding Design.

Our design programme stresses on the specific role of a designer that of being for and only about the user and the user's needs, empathy and environment. The students will be taught critical thinking and the design process to become effective and innovative problem solvers for companies, the community and the consumers.

A range of domains such as nature and form studies, gestalt, semiotics, human factors & ergonomics, materials and processes and systems design will form an array of learning modules through studio tasks, real life projects, workshops projects both individually as well as in teams.

Students typically will start projects by developing ideas and concepts from sketches to making models and finally working prototypes which will be tested in the real world.

Our Industrial Design graduates will be prepared to make a real difference in the world of design as entrepreneurs, employees of design firms as well as of industry and many will also form venture capital firms and some will also set up unique manufacturing hubs.

The pedagogy will consist of a combination of design skills, related theory, material and manufacturing science, social knowledge, communication skills and management principles. Learnings will be through class room projects, assignments as well as exposure to industry via visits. industry immersion of a few weeks and working on live projects with Faculty and outside design experts.

The design programme will start with a common foundation year with the Communication Design students where all the students will be taught basic skills in design thinking and aesthetics, sensitizing their minds to the world around through on and off campus assignments as well as essential learning tools such as sketching, observation, photography, colour, perception, presentation, model making and workshop projects, history of design and a sprinkling of topics from philosophy to social anthropology.

- The specialization courses in the above said areas which will be of 3-year duration. Total duration of the under graduate course will be of 4 years which includes 1 year of foundation course.
- Candidates have to choose their specialization subject while applying for the foundation course.
- Group discussions, seminars, workshop, exhibitions, study tour, visit to museum, galleries, industry visit are compulsory.
- Study tour is compulsory for all the students and they have to deposit additional charges according to the actual expenses must be borne by the students.
- As B Design is a professional course, professionally qualified teachers will be assigned for practical and theory subjects.

Educational excursions/enrichment outings/activities:

Course will comprise of Group discussion, Seminars, Workshops, Exhibitions, Study tours, Visit to museum, Galleries, Industry visits etc. Visit/Excursion expenses will be borne by student.

Examination pattern: Annual

Qualifying papers: Compulsory papers like General English, General Hindi, Environmental Studies and Elementary Computer Applications may be cleared anytime by the course duration of Four years but clearing of paper is essential to obtain the degree.

Due Papers: Practical papers cannot be carried forward so a student failing in Practical paper will not be promoted to next year.

Attendance eligibility: Minimum 75% attendance is required in Theory and Practical classes individually to be eligible to appear for respective exams.

Seat reservation: As per University of Rajasthan rules

Design course material: Drawing board, Design related software, Art materials, Designing tools etc. will be to be bought by student only.

Assessment pattern.

a) Theory assessment:

- Each theory paper of 3 hours duration will be divided into 5 Units/Sections
- Each Unit/Section will have two questions from each of the Units of the Syllabus
- Student will be required to attempt one question from each unit/section with an internal choice
- All questions will carry equal marks (20 marks x 5 questions = 100 marks)

b) Practical assessment:

- Material required for Practical exam will have to be brought by the Student only.
- Each practical paper of 6 hours duration will comprise of _____ questions divided into _____ units/sections
- Student will be required to attempt a total of _____ questions selecting at least _____ question(s) from each unit/section.
- A board/panel of examiners will be formed for Practical examination by University of Rajasthan, which will comprise of an internal examiner from the College who will award from out of 40% marks for submissions, continuous internal assessments etc. and an external examiner who will award from out of 60% marks for Practical exam and viva voce for each Practical paper.

Core Paper-3

CAD -103: Visualization & Drawing Techniques (Practical)

Internal Max. M: 40
Internal Min.P. M: 16
External Max. M: 60
External Min P. M: 24

Aim

The aim of this course is to understand the method of visualizing and drawing from nature, cast and product drawing.

Learning Outcome

- Student will be able to understand the methods & techniques of visualization & drawing.
- The student would be exposed to appreciation of drawing different products.

Course Contents

Understand the techniques of drawing such as pen and ink sketching; pencil sketching; pencil colour sketching etc., for drawings from nature, cast and product drawings; method of representing positive and negative spaces; light and dark tones etc.

Core Paper-4

CAD -104: Material Studies (Practical)

Internal Max. M: 40
Internal Min.P. M: 16
External Max. M: 60
External Min P. M: 24

Aim

Learners will be introduced to a brief history and introduction to 3D materials, tools and processes and made aware of the range of possibilities of different materials in their 2D and 3D application to design. This may be done through lectures / PPT presentations / swatches/ samples.

Learning Outcome

- Student will be able to understand the properties of different material.
- Student will be able to understand the techniques, process terminology and tools of materials.

Course Contents

Material exposure could range from paper, fabrics, glass, metals, metal foils, plastics, acrylic, rubber, wood- natural/manmade, foam, Styrofoam, sponge, leather, rexine, clay, plaster of paris, adhesives etc.

Techniques, Process terminology and Tools can cover a range of methods like – cutting, sawing, carving, cutting, welding, drilling, joinery, polishing, constructions, mould making, modelling, casting, gluing, stitching, embroidery, weaving, tying, dyeing, surface embellishments and manual and mechanical tools used for such explorations.

CAD -105: Design Principles (Practical)

Internal Max. M: 40
Internal Min.P. M: 16
External Max. M: 60
External Min P. M: 24

Aim

The aim of this unit is to enable learners to develop knowledge and understanding of the issues that have informed debate on the purposes and processes of design.

Learning outcomes

- Understand the relationship between form and function
- Understand the principles of cultural and contextual association
- Be able to develop concepts through the exploration of materials, techniques and processes
- Be able to develop concepts by the analysis of the needs of end-users.

Unit content

Harmony, Contrast, Proportion, Scale, Rhythm, Balance, Emphasis, study of Artists, study of Architects, study of Designers, Textures and Finishes of Hard Material, Textures and Finishes of Soft Material, Nature Photography, Product Photography, Aesthetics, Signs and Symbols, Packaging, Branding & Copywriting.

CAD -106: Design Method (Practical)

Internal Max. M: 40
Internal Min.P. M: 16
External Max. M: 60
External Min P. M: 24

Aim

This unit aims to give learners opportunities to develop skills and knowledge in the development of new products or services in design pathways.

Learning outcomes

- 1 Know the phases of the design development cycle
- 2 Be able to plan a project using the design development cycle
- 3 Be able to use imagination and innovation in the development of a product
- 4 Be able to propose design improvements to the production process.

Unit content

Writing Design Brief, Developing Ideas, Developing through Experimentation, Reviewing and Evaluating Ideas in Progress, Specialist Materials, Equipments and Techniques, Presenting Work, Developmental Work, Strength and Weakness, Researching on Ideas, Ways of Gathering Ideas, Mind Mapping, Mood Boards, Recording Ideas for the Development Stage, Using Planning Skills, Prototyping, Purpose of an Art and Design Portfolio, Different types of Portfolio, present an art and design portfolio.

Aim

The aim of this unit is to encourage an understanding of the social, psychological, cultural, historical and commercial factors which underpin all Indian craft visual arts theory and practice across the spectrum of subject specialism's.

Learning Outcome

- Understand the historical evolution and visual characteristics of the work of artists and designers
- Understand and apply appropriate methods of research and analysis
- Be able to apply the influences of historical, contemporary and contextual factors to own practice
- Be able to synthesize research and present a professional and personal written study.
- This unit would have helped you gain /develop a perspective on key attributes and features of art movements.

Aim

This unit aims to develop learners' practical making skills in terracotta and to generate design work which shows understanding of historical and contemporary terracotta & Understanding of Traditional Lacquer Craft of Rajasthan. To come up with a range of different products using Lacquer craft. Understanding and depth knowledge of Lacquer craft materials and techniques. New invention in the Lacquer craft for new look and refinement. Understanding the technique through practical demonstration. A comparative analysis of the past Lacquer product work as compared to the present

Learning Outcome

- Understand the visual and tactile properties of terracotta materials
- Be able to develop designs for terracotta products
- Be able to make terracotta products
- Be able to employ professional practice.
- Properties of Terracotta
- Different techniques used in Terracotta
- Surface finishes on Terracotta

CAD-204: Fashion & Textile Material Understanding (Practical)

Internal Max. M: 40
 External Max. M: 60
 Internal Min.P. M: 16
 External Min.P. M: 24

Aim

This unit helps the students to study the science of textile fibres and analyze the use of textile fibre for different seasons & the woven and knitted garment. This course would give a deep understanding of how the method of weaving affects the final fabric and would help the students in the selection of fabrics for the different lines created.

This course would provide the knowledge of finishing the fabrics constructed and the method of ornamenting the same.

Learning Outcome

- Be able to exploit the properties of natural, manmade and sheet materials in their application to fashion and textiles products

27

Raj [Signature]
 Dy. Registrar (Acad.)
 University of Rajasthan

[Signature]

- Understand different systems of fabric manufacture and how these affect properties and characteristics
- Understand the relationship between properties of fibres, fabrics and processing methods, garment construction and the need for economically efficient manufacturing costing.
- Student will be able to understand finishing & fabric construction.
- Student will be able to understand how to make samples with dyeing printing & embroideries.

Unit Content

- Introduction to textiles; manufacturing of the natural fibres; properties for natural fibres and their significant use for different seasons; manufacturing of the man-made fibres; properties of man-made fibres and their significant use for different seasons.
- Weaving types of weaves; identification of weaves; method of weaving; differences between weaving and knitting types of knitting, knitting types of knitting identifications of knits; crocheting tatting non-woven.
- Grey preparation, dyeing, printing, finishing, embroidery stitches – hand and machine, traditional embroidery of India.

Aim

This unit aims to develop learners' practical making skills in leather and to generate design work which shows understanding of historical and contemporary leather.

Learning Outcome

- Understand the visual and tactile properties of leather materials
- Be able to develop designs for leather products
- Be able to make leather products
- Be able to employ professional practice.

Unit Content

- History of leather
- Classification of Leather
- Leather processing and printing
- Leather dyeing process- the dyes, the methods of dyeing, suitability of dyes, the processes involved
- Leather finishing process- the importance, the processes involved.
- Quality control in leather industry.

CAD-301: Professional Practice (Theory)

Max. M: 50
Min.P. M: 20

Aim

The aim of this unit is to extend learners' knowledge of professional practices within their specialist area and to relate these to personal goals and career opportunities.

Learning Outcome

- Be able to place themselves and their work in the context of their selected discipline
- Understand their specialist area and the career opportunities available
- Be able to develop and present a professional portfolio in an appropriate format
- Understand how to promote themselves and their work professionally.

Unit-1

- *Goal setting:* e.g. through SWOT analysis, Belbin questionnaire, self-reflection, brain storming, decision trees, aspirations, needs, wants, transferable skills, action plans, business plan
- *Career direction:* e.g. educational; employment; work experience; business start-up; freelance, part time, apprenticeship; new directions; gap year

Unit-2

- *Aspirations:* e.g. creative, managerial, team working; autonomy, personal ethics e.g. causes; environmental, ecological, charitable, educational; short term, long term
- *Responsibilities:* to agents; sponsors; clients; employers e.g. meeting deadlines, respecting confidentiality, settling bills; to consumers e.g. protection of consumers, supply of quality work; to self -e.g. conscience, costing, salary, ethics, legal issues

Unit-3

- *Research:* through marketing information; interviews; collecting and collating data; past experiences; industry contacts
- *Considerations:* qualities required e.g. visual competence, communication skills, confidence, team working skills, experience, empathy, resilience, hard work, negotiation skills; practical e.g. money, cost of living, distance to travel, family commitments, working conditions, potential colleagues, promotional prospects
- *Practicalities:* e.g. personal and public liability, insurance, taxes, freelance, self-employment, fees structures, negotiating, using agencies, copyright, intellectual property, contracts.

Unit-4

- *Portfolio:* format e.g. paper-based, CD, video, interactive media; supporting information e.g. focus, intentions, developmental, finished, research, evaluation
- *Organized:* e.g. structured, clarity, cohesive, creative, chronological, descriptive
- *Supporting information:* e.g. CV, business card, headed paper, personal statement, job application, references, named referees, work experiences endorsements

CAD-403: Range Development- Personal Luxury Brand (Practical)

Internal Max. M: 40
External Max. M: 60
Internal Min.P. M: 16
External Min.P. M: 24

Aim

In economics, a luxury good is a good for which demand increases more than proportionally as income rises, and is a contrast to a "necessity good", for which demand increases proportionally less than income. Luxury goods are said to have high income elasticity of demand: as people become wealthier, they will buy more and more of the luxury good. This also means, however, that should there be a decline in income its demand will drop. Income elasticity of demand is not constant with respect to income, and may change sign at different levels of income. That is to say, a luxury good may become a normal good or even an inferior good at different income levels, e.g. a wealthy person stops buying increasing numbers of luxury cars for his automobile collection to start collecting airplanes (at such an income level, the luxury car would become an inferior good).

Learning Outcome

- Towards the completion of this unit a student would think about the luxury brand philosophy and development with above parameters
- The student will be able to develop own luxury brand.

Unit Content

- What is Luxury Brand
- Global Luxury Brands of Craft product

CAD-404: Design Portfolio (Practical)

Internal Max. M: 20

External Max. M: 30

Internal Min.P. M: 08

External Min.P. M: 12

Aim

Design portfolio is the expression of student to translate themes into design. Here one gets inspired by different themes which could be art movements, sport, historic eras, music, dance, culture, nature, traditions etc. and picks out tangible and intangible elements which are to be used as design elements in the collection. The ability of a designer to exhibit and use design elements is highlighted which is further translated into projects. A portfolio is an exhibit of the overall knowledge of the student work which he/she has gained through the course of four years. The purpose lies in promoting the skills of students in a single format.

Learning Outcome

Students will present a portfolio of all the files/ folders/ projects created during the course of study in I to III year. The portfolio should include projects, industrial visit reports, any other projects made during the academic session. The external examiner will evaluate the portfolio and take a viva of the student.
