# Ordinance and Regulations related to the Integrated B.Sc.B.Ed. Degree

01. The Objective and the Learning outcomes of the Integrated B.Sc.B.Ed. Degree are-

## **Objectives:**

- 1. To promote capabilities for inculcating national values and goals as mentioned in the constitution of India.
- 2. To act as agents of modernization and social change.
- 3. To promote social cohesion, international understanding and protection of human rights and right of the child.
- 4. To acquire competencies and skills needed for teacher.
- 5. To use competencies and skills needed for becoming an effective teacher.
- 6. To become competent and committed teacher.
- 7. To be sensitive about emerging issues such as environment, population general equality, legal literacy etc.
- 8. To inculcate logical, rational thinking and scientific temper among the students.
- 9. To develop critical awareness about the social issues & realities among the students.
- 10. To use managerial organizational and information & technological skills.

## Learning outcomes:

- 1. Competence to teach effectively two school subjects at the Elementary & secondary levels.
- 2. Ability to translate objectives of secondary education in terms of specific Programmes and activities in relation to the curriculum.
- 3. Ability to understand children's needs, motives, growth pattern and the process of learning to stimulate learning and creative thinking to faster growth and development.
- 4. Ability to use-
- 5. Individualized instruction
- 6. Dynamic methods in large classes.
- 7. Ability to examine pupil's progress and effectiveness of their own teaching through the use of proper evaluation techniques.
- 8. Equipment for diagnosing pupil progress and effectiveness of their own teachings through the use of proper evaluation techniques.
- 9. Readiness to spot talented and gifted children and capacity to meet their needs.
- 10. Ability to organize various school programmes, activities for pupil.

Dy. Registrar (Academic-I)
University of Rajasthan
Jaipur

Ÿ

- 11. Developing guidance point of view in educational, personal and vocational matters.
- 12. Ability to access the all round development of pupils and to maintain a cumulative record.
- 13. Developing certain practical skill such as:
  - a. Black board work
  - b. Preparing improvised apparatus
  - c. Preparing teaching aids and ICT.
- 14. Interest and competence in the development of the teaching profession and education. Readiness to participate in activities of professional organizations.

# Integrated Programme of B.Sc.B.Ed. Degree Shall Consist of

- i) First Year B.Sc.B.Ed.
- ii) Second Year B.Sc.B.Ed.
- iii) Third Year B.Sc.B.Ed.
- iv) Final Year B.Sc.B.Ed.

#### Duration of the Course - Four Years

# Examinination after each session in theory papers

Scheme of Examination against each subject separately.

#### Compulsory Papers:

O. 321 The objectives of the practical work prescribed for the Integrated Programme of B.Sc.-B.Ed. Degree (Four Year) are follows:

# PART II Practical Work

## Objectives:

To develop the ability and self-confidence of pupil teachers:

- 1. To be conscious of sense of values and need for their inculcation in children through all available means including one's own personal life.
- 2. Possess a high sense of professional responsibility.
- 3. Develop resourcefulness, so as to make the best use of the situation available.
- 4. Appreciate and respect each child's individuality and treat him as independent and integrated personality.
- 5. Arouse the curiosity and interest of the pupils and secure their active participation in the educative process.
- 6. Develop in the pupil's capacity for thinking and working independently and guide the pupils to that end.
- 7. Organize and manage the class for teaching learning.
- 8. Appreciate the dynamic nature of the class situation and teaching techniques.
- 9. Define objectives of particular lessons and plan for their achievements.
- 10. Organize the prescribed subject- matter in relation to the needs, interest and abilities of the pupils.

11. Use the appropriate teaching methods and techniques.

- 12. Prepare and use appropriate teaching aids, use of the black board and other apparatus and material properly.
- 13. Convey ideas in clear and concise language and in a logical manner for effective learning.
- 14. Undertake action research.
- 15. Give proper opportunity to gifted pupils and take proper care of the back-ward pupils.
- 16. Co-relate knowledge of the subject being taught with other subjects and with real life situations as and when possible.
- 17. Prepare and use assignments.
- 18. Evaluate pupil's progress.
- 19. Plan and organize co curricular activities and participate in them.
- 20. Co-operates with school teachers and administrators and learns to maintain school records and registers.

# Practical skill to teach the two school subjects offered under Theory papers VIII A/B and the following:

- 1. Observation of lesson delivered by experienced teachers and staff of the college.
- 2. Planning units and lessons.
- 3. Discussion of lesson plans, unit plans and lessons given (including criticism lesson)
- 4. Organization and participation in co-curricular activities.
- 5. Setting follows up assignment.
- 6. Evaluation in terms of educational objectives use of teachers made tests & administration of standardized tests.
- 7. Black-board work.
- 8. Practical work connected with school subjects.
- 9. Preparation and use of audio visual aids related to methods of teaching.
- 10. Experimental and laboratory work in chemistry, botany, zoology, physics, and mathematics subjects of experimental and practical nature.
- 11. Study of the organization of work and activities in the school.
- 12. Observation and assistance in the health education programme.
- 13. Observation and assistance in the guidance programme.
- 14. Maintenance of cumulative records.
- 15. Techniques of teaching in large classes.
- O. 322 A candidate has to deliver at least 40 lessons (20 Lessons of one teaching subject in 3<sup>rd</sup> year & 20 Lessons of other teaching subject in 4<sup>th</sup> year) in a recognized school under the supervision of the staff of the college shall be eligible for admission to the examination for the degree of B.Sc.-B.Ed.

Dy. Registrar (Academic-I)
University of Rajasthan

Jaipur

#### Notes:-

- i. Teaching subject means a subject offered by the candidate at his/her running B.Sc-B.Ed. course either as a compulsory subject or as an optional subject provided that the candidate studied it for at least two years. Thus the qualifying subjects like General English, General Hindi, Education and Environment Education. Prescribed for running B.Sc-B.Ed. course of the University or a subject dropped by candidates at the part I stage of the degree course shall not be treated as teaching subjects.
- ii. Only such candidate shall be allowed to offer General Science for the B.Sc B.Ed Examination who had studied Chemistry and any one subject of life science i.e. Biology, Botany or Zoology.
- O.323 No candidate shall be allowed to appear in the Integrated B.Sc/B.Ed examination I,II,III & IV Year unless he/she has attended (80% for all course work & practicum, and 90% for school internship)
- O.324 The examination for Integrated B.Sc.-B.Ed. for Four Year shall be in two parts- part 1<sup>st</sup> comprising theory papers & part 2 practice of teaching in accordance with the scheme of examination laid down from time to time.
- O.325 Candidates who fail in Integrated B.Sc-B.Ed examination in part 1 or/ part 2 the theory of education may present themselves for re-examination there in at a subsequent examination without attending a further course at an affiliated training college.

Provided that a candidate who fails in any one of the theory papers and secures at least 48% marks in the aggregate of the remaining theory papers may be allowed to reappear in the examination in the immediately following year in the paper in which he/she fails only. He/she shall be declared to have passed if he secures minimum passing marks prescribed for the paper in which he appeared and shall be deemed to have secured minimum passing marks only prescribed for the paper (irrespective of the marks actually obtained by him) for the purpose of determining his division in accordance with the scheme of examination. The candidate shall have to repeat the whole examination in subsequent year in case he fails to clear the paper in which he failed.

O.326 Candidates who fail in the Integrated B.Sc-B.Ed. examination part 1 and part 2 only in the practice of teaching may appear in the practical examination in the subsequent year provided that they keep regular terms for four calendar months per year and give at-least 40 lessons(20 in part 1& 20 in part 2) supervised lessons.

O.326 A: A candidate who complete a regular course of study in accordance with the provision laid down in the ordinance, at an affiliated teacher's training college

Dy. Registrar(Academic-I)
University of Rajasthan
Jaipur

for four academic year but for good reasons fails to appear at the Integrated B.Sc-B.Ed. examination may be admitted to a subsequent examination as an Ex-student as defined in O.325 or O.326 Above.

O.326 B: No candidate shall be permitted to appear as an Ex-student at more than one subsequent examination. The Integrated B.Sc-B.Ed programme shall be of duration of four academic years, which can be completed in a maximum of five years from the date of admission to the Integrated B.Sc.-B.Ed. Degree.

## Regulation 42:-

# Scheme of Integrated B.ScB.Ed Four Year Examination

The Integrated B.Sc-B.Ed. (Four years) will consist of the following components;

Part I- Main theory papers at B.Sc.B.Ed. I, In Integrated B.Sc.B.Ed I Paper nos. are 02, 03 & 04 in each session are of three hours carrying 100 marks (80 for theory + 20 for sessional) each. Compulsory paper\* 01 of 100 marks and optional Paper 05, 06, 07 (G-B). in each session are three hours carrying 150 marks (100 marks theory + 50 marks practical). Distribution of marks in mathematics is according to their marking scheme in page no.7.

Part II- Practice Teaching - Micro Teaching, Internship, Practice Teaching of 20 weeks (10 at B.Sc.B.Ed Year III & 10 at B.Sc.B.Ed Year IV) Block Teaching, Criticism and Final Lesson in III & IV Year per teaching subject.

# Organization evaluation of practice teaching:

- Every candidate will teach at-least 40 lessons (20 in III Year & 20 in IV Year) during practice teaching session. At least ten lessons in each subject should be supervised.
- 40 (20+20) lessons as desired in the syllabus should be completed as full period class room lesson. Micro teaching lesson to be used in addition to those 40 lessons for developing certain teaching skills.
- A minimum of ten lessons in each subject will be supervised evaluated by the subject specialist or a team of specialists of the subjects.
- By and large, the evaluation of the performance in the practical teaching will be based on the last ten lessons in the subject when the student has acquired some competence and skills of teaching.
- The internal assessment in practice of teaching will be finalized by the principal with the help of members of the teaching staff and the same will be communicated to the university before the commencement of the practical each year.

- 6. At Integrated B.Sc-B.Ed III Year each candidate should be prepared to teach one lessons at the final practical examination. At the Integrated B.Sc-B.Ed IV Year exam candidate should be prepared to teach two lessons (one in each subject). The external examiners may select at-least 10% of the candidates to deliver two lessons in Integrated B.ScB.Ed IV Year.
- 7. There will be a board of Examiners for the external examination for each college which will examine each candidate in at-least one lesson and a minimum of 15% in two lessons (one in each of the two subjects).
- 8. The board of Examination will consist of:
  - (a) The principal of the college concerned.
  - (b) A principal or a senior and experienced member of the teaching staff of another training college, affiliated to University of Rajasthan.
  - (c) An external examiner from outside the University of Rajasthan or a senior member of the teaching staff of an affiliated training college.
  - (d) The board as far as possible will represent Social science, language and science.
- 9. Approximately 50 lessons will be examined by the board each day.

## Working out the result and awarding the division:

- (1) A candidate in order to be declared successful at the Integrated B.ScB.Ed. I, II, III & IV Year Examination shall be required to pass separately in Part I (Theory) and Part II (Practice of Teaching).
- (2) For a passing in Part I (Theory) a candidate shall be required to obtain at-least (a) 30 percent marks in each theory paper and sessionals (24 marks out of 80 and 6 marks out of 20); (b) 30% marks in each theory paper and sessional (11 marks out of 35 & 4 marks out of 15) (c) 36 percent marks in the aggregate of all the theory papers.
- (3) For passing in Part II (school internship Practice of Teaching) a candidate shall be required to obtain separately at-least-
  - ❖ 40 percent marks in the external examination.
  - ❖ 40 percent marks in internal assessment.
- (4) The successful candidates at Integrated B.Sc.B.EdFour Year Examination obtaining total marks will be classified in three divisions and shall be assigned separately in theory and school internship Practice of teaching as follows:

Division

Theory

**Practice of Teaching** 

I	60%	60%
П	48%	48%
Pass	36%	40%

The practical work record shall be properly maintained by the college and may be made available for work satisfaction of external examiner in school internship (practice teaching), those are expected to submit a report regarding this separately.

# B.Sc. B.Ed. I YEAR-2019 GENERAL ENGLISH

Duration: 3hrs.

Max. Marks: 100

Minimum Pass Marks: 36

The syllabus aims at achieving the following objectives:

- 1. Introducing students to phonetics and enabling them to consult dictionaries for correct pronunciation. (sounds and word stress)
- 2. Reinforcing selected components of grammar and usage.
- 3. Strengthening comprehension of poetry, prose and short-stories.
- 4. Strengthening compositional skills in English for paragraph writing. CVs and job applications.;

The Pattern of the Question Paper will be as follows:

Unit A: Phon	(20 marks)				
(10 periods)					
I. Phone	tic Symbols and Transcription of Words	(05)			
II. Transl	ation of 5 Simple sentences from Hindi to English	(05)			
from I	English to Hindi	(05)			
III. Transl	III. Translation of (05) Words from Hindi to English				
From !	English to Hindi	$(2\frac{1}{2})$			
Unit B: Gran	mmar and Usage (2	25marks)			
(10 priods)	Poj ( T				
	Dy. Registrar(Ac University of R	•			

Jaipur

#### Unit C: Comprehension

(25 marks)

Following Essays and Stories in Essential Language Skills revised edition.compiled by Macmillan for University of Rajasthan General English B.A/B.com/B.Sc.

Candidates will be required to answer 5 questions of two lines each to be answered out of 10 questions. There would be two questions from the prescribed text. (10)

Voice of the Unwanted Girl Sujata Bhatt

Ruskin Bond Night Train for Deoli

The Birth of Khadi M.K.Gandhi

J.L.Nehru A Tryst with Destiny

A.P.J. Abdul Kalam Vision for 2020

The candidates will be required to answer 5 questions from the given unseen (10)passage.

One vocabulary question of 10 words from the given passage. **(5)** 

#### Unit D: Compositional Skills

(30 marks)

(15 periods)

(10)I. Letters-Formal and informal (10)II. CV's Resume and job Applications and Report

III. Paragraph Writing (10)

Arthur Waldhorn and Arthur Zeiger, English Made Simple. Upa and Co.

Gunashekared. A Foundation English Course for Undergraduate Book I, CIEFL, Hyderabad.

Quirk and Greenbaum: A University Grammar of English Longman, 1973

# **B.Sc.B.Ed PART - I - 02**

# Childhood and Growing up

Marks -100

## Objectives:

After completing the course the students will be able:-

- 1. To develop an understanding of the basic concepts, methods and principles of psychology.
- 2. To develop an understanding of the nature and process of development.
- 3. To understand the different periods of life with Psycho-Social Perspective.
- 4. To develop an understanding of the nature and process of learning in the context of various learning theories and factors.
- 5. To understand the critical role of learning Environment.
- 6. To acquaint them with various Psychological attribute of an individual.
- 7. To reflect on the changing roles of children in contemporary society.

# Unit I: Role of psychology to understand the child

- Psychology: Meaning, nature & branches of psychology,
- Methods of psychology: case study and experimental, Edu. Psychology;
- Meaning, nature, scope, educational implication of psychology in new Era,
- Child psychology; meaning, concept

Unit II: Multi dimensional development

Dy. Registrar(Academic-I)
University of Rajasthan

Jaipui V

- Growth and development- concept, stages principles, dimensions, Factors in influencing development- genetic, biological, environmental and physical
- Theories of development:
  - a) Piaget's vgotsky cognitive development
  - b) Freud's psycho- sexual development
  - c) Erikson's psycho social development
  - d) Gessel's maturation theory

# Unit 3: Child Growing up

- Childhood: Meaning, concept and characteristics, effects of family, schools, neighbourhood and community on development of a child
- Adolescence: meaning, concept, characteristics, effects of family, school, pear group, social climate and social media.
- Personality: concept and nature, theories of personality with special reference to (Garden Allport, Psycho analytical theory, Jungs Theory) assessment of personality
- Individual differences: concept, areas (With Special Educational needs-Concept) and educational implication.
- Stress: meaning, types consequences of stress and stress managment.

## Unit 4: Learning to Learn

- Concept and beliefs about learning:-Defining misconception, Brain's role in learning
- Memory and forget, Behaviouristic learning theories (Thorndike, Skinner, Pavlov), Gestalt, Cognitive, Types of learning by Gagne.
- Motivation:-Concept and Maslow's Hierarchy need theory, Creating and maintaining a productive Classroom Environment-Dealing with misbehaviour

# Unit 5: Psychological Attributes of an individual

- Intelligence Meaning, Types of intelligence Social, Emotional and Spiritual Intelligence, theory of intelligence, Gardner's Multi intelligence theory, Measurement of intelligence
- Creativity Meaning, Components, ways of enhancing creativity, relation with intelligence and other factors, Measurement of creativity

- Socialization Process of Socialization Group dynamics Theory of Kurt lewin's. Leadership and its styles (Kimble young), social prejudice
- Mental Health Common problems related to child Attention deficit
  hyperactivity disorder (ADHD), depression, Learning disabilities, dealing with
  a problematic child.

## Test and Assignment:-

• Class Test

10 Marks

- Project (Any one of the following) 10 Marks
- 1. Comparative study of developing pattern's of children with reference to different in SES.
- 2. Collecting and analyzing statistics on the girl child with reference to gender ratio.
- 3. Write the adminstration, scoring, interpretation and conclusion of any one test by psychological experiment onlearning/span of attention/memory/intelligence test.

# B.Sc. **B.**Ed **PART** - **I** - **03**

# Contemporary India and Education

MARKS-100

## Objectives:-

After completing the course the students will be able to:

- 1. To promote reflective thinking among students about issues of education related to contemporary India.
- 2. To develop an understanding of the trends, issues and challenges faced by contemporary education in India.
- 3. To appreciate the developments in Indian education in the post independence era.
- 4. To understand the Commissions and committees on education constituted from time to time.
- 5. To understand issues and challenges of education and concern for the underprivileged section of the society.
- 6. To develop awareness about various innovation practices in education.
- 7. To develop and understanding of self teaching technical devices.
- 8. To understand the constitutional values and provisions for education.

#### **Course Content**

Unit I Education as an Evolving Concept

Dy. Registrar(Academic-I) University of Rajasthan

Jaipur

- Education: Meaning, concept and nature, Ancient to present education as an organized and institutionalized form, formal and state sponsored active
- ities.
- Aims of Education: Historicity of aims of Education, changing aims of education in the context of globalization, sources of aims of Education, influence of aims of education on the curriculum and transactional strategies.

  Idan of educational thinkers such as Aurobindo, Krishnamurthy, Friere and Illich.

## Unit – II: Issues and Challenges

- Diversity, Inequality, Marginalization:- Meaning, Concept, Levels with special reference to Individual, Region, Language, Caste, Gender.
- Role of education in multicultural and multilingual society for Equalization and Improvement of Marginalization groups.
- Hindrances of Education in India: Quality, Facilities, Access, Cost, Political unwillingness, Youth unsatisfaction, Moral Crisis.

#### Unit – III: Constitution and Education

- Study of the Preamble, fundamental rights and duties of citizens, Directive Principles for state and constitutional values of Indian Constitution.
- Constitutional provisions for education and role of education in fulfillment of the constitutional promise of Freedom, Equality Justice, Fraternity.
- Education and politics, Constitutional vision related to aims of education,
- Peace Education, Role of Education, School and Teachers as agents for Imparting Culture, Education and Development. Education and Industrialization.

# Unit – IV: Programme and Policies

Overview the development of education system in India from 1948 to 2010
 University Education Commission-1946-48, Secondary Education
 Commission-1952-53, Indian Education Commission- 1964-66, National
 Education Policy- 1986

Ry Hay

- Rammurthy Committee (1990), Yashpal Committee Report (1993) Revised
   National Education Policy (1992) NCF-2005, NKC-2006, NCFTE- 2009,
   RTE-2010.
- SSA, MLL, RMSA, CCE, Navodaya Vidyalaya, Kasturba Gandhi Balika Vidyalaya, Model School.

#### Unit - V: Innovative Practices

- Cencept, Need of innovation in view of technological and social change,
  Obstacles in innovation, Role of Education in bringing innovations,
- Education through interactive mode of teaching: Computer, Internet, Tally and Video-Conferencing, Edu-set Smart Class Room
- Yoga Education, Life Skill Education, Education and Competence in life regarding Social inclusion.

## Test and Assignments :-

1. Class Test

10 marks

2. Any one of the following: -

10 marks

- Debate or Organize a one day discussion on the topic related to the subject and submit a report.
- Critical appraisal on the report or recommendations of any commission and committee.
- Organize collage, Poster Making activity in your respective institution.
- Collection of at least three handouts of related topics of the subject.

# B.Sc.B.EdPART-I -04 INSTRUCTIONAL SYSTEM AND EDUCATIONAL EVALUATION

**Objectives:** 

Marks: 100

## This course will enable the student teacher to:

- Explain the need, importance and characteristics of educational evaluation.
- Describe the approaches to educational evaluation.
- Discuss the role of educational evaluation in Teaching Learning Process.
- Explain the nature of tools and techniques of educational evaluation.
- Describe the need and importance of psychological testing,
- Explain the nature of learners' evaluation and need for continuous comprehensive educational evaluation in schools.

# Unit I: Instructional System

- Educational Objectives and instructional objectives.
- Relationship between educational objectives and instructional objectives
- Classification of educational objectives (Cognitive, affective and psychomotor)
- Functioning of educational objectives

Dy. Registrar(Academic-I)
University of Rajasthan

Jaipur V

Usefulness of the taxonomical classification.

# Unit III Need, importance and characteristics

- Teaching Learning process and role of evaluation
- Need and importance of Evaluation
- Definition of Evaluation
- Evaluation, Assessment and Measurement.
- Characteristics of good evaluation.

## Unit III: Approaches to Evaluation

- Formative evaluation and summative evaluation
- Difference between summative and formative evaluation
- External evaluation and internal evaluation, advantages and disadvantages,
- Norm referenced evaluation
- Criterion referenced evaluation.

# Unit IV: Role of Evaluation in Teaching-Learning Process.

- The relationship between instructional objectives, entering behavior, learning experiences and Performance assessment.
- Diagnosis to over come deficiency in learning.
- Importance of results of evaluation to students, teachers, institutions with special reference to help in determining the effectiveness of a course, programme and functioning of a school.

# Unit V: Nature of tools and techniques of evaluation

- Nature of test and Purposes of testing with reference to:
- Instructional purpose b) Guidance purpose c) Administrative purpose
- Administration of Test and Interpreting test result.
- Meaning of Norms, types of Norms, age, Grade, Percentile and standard score.
  - 4. Norms and interpretation of test scores.
- Concept of grade system. Absolute grading, comparative grading and its advantages and disadvantages.

Test and Assignments - 20 marks
One class Test - 10 marks

Dy. Registrar(Academic-I)
University of Rajasthan
Jaipur

## Practical (any one) 10 marks

- 1. Develop a portfolio for assessment of 2 school students
- 2. Prepare an advanced tool for evaluation
- 3. Develop a tool for self-assessment.
- 4. Develop an achievement test and its blue print.

Scheme:

Max Marks: 150  Duration (hrs.)			Max. Marks			Min. Pass Marks	
Paper I	3			33	٠.		
Paper-II	3		٠,	33		36	•
Paper-III	3			34			
Pacatical	5			50		18	

Note: Ten (10) questions are to be set taking two (02) questions from each unit. Candidates have to answer any 5 questions selecting at least one question from each unit.

# CH-101 Paper I: Inorganic Chemistry (2 hrs or 3 periods/ week)

#### Unit-I

Ionic Solids: Ionic structures, radius ratio effect and coordination number, limitation of radius ratio rule, lattice defects, semiconductors, lattice energy and Born Haber cycle solvation energy and solubility of ionic solids, polarizing power and polarisability of ions, Fajan's rule

Metallic bond: free electron, valence bond and band theories.

Weak Interactions: Hydrogen bonding, vander Waals forces.

#### Unit-II

Covalent Bond: Valence bond theory and its limitations, directional and shapes of simple inorganic molecules and ions. Valence shell electron pair repulsion (VSEPR) theory to NH<sub>3</sub>, H<sub>3</sub>O<sup>+</sup> SF<sub>4</sub>, CIF<sub>3</sub>, ICl<sub>2</sub>, H<sub>2</sub>O.

Molecular Orbital Theory: homonuclear and heteronuclear (CO and NO) diatomic molecules. Multicenter bonding in electron deficient molecules, bond strength and bond energy, percentage ionic character from dipole moment and electronegativity difference.

#### Unit-III

s-Block Elements: Comparative study, diagonal relationships, salient features of hydrides, solvation and complexation tendencies including their function in biosystems, an introduction to alkyls and aryls.

Periodicity of p-block elements: Periodicity in properties of p-block elements with a reference to atomic and ionic radii, ionization energy, electron affinity, electronic and ionic radii, ionization energy, electron affinity, electronic and ionic radii, ionization energy, electron affinity, electronic and ionic radii, ionization energy, electronic affinity, electronic and ionic radii, ionization energy, electronic affinity, electronic and ionic radii, ionization energy, electronic affinity, electronic and ionic radii, ionization energy, electronic affinity, electronic and ionic radii, ionization energy, electronic affinity, electronic and ionic radii, ionization energy, electronic affinity, electronic and ionic radii, ionization energy, electronic affinity, electronic and ionic radii, ionization energy, electronic affinity, electronic and ionic radii, ionization energy, electronic and ionic radii, ionization energy, electronic affinity, electronic and ionic radii, ionization energy, electronic affinity, electronic and ionic radii, ionization energy, electronic affinity electronic and ionic radii, ionization energy, electronic affinity electronic and electro

#### UNIT-IV

Some Important Compounds of p-block Elements: Hydrides of boron, diborance and higher boranes, borazine, borohydrides, fullerenes, carbides, fluorocarbons, silicates (structural principle), tetrasulphur tetranitride, basic properties of halogens, interhalogens and polyhalides.

23

Dy. Registrat (A & d.):
University of Rajasthan
University of Rajasthan

And the

chickstry of Noble Gases: Chemical properties of the noble gases, chemistry of Merion, structure and bonding in Xenon compounds.

#### Unit- V

Nuclear Chemistry: Fundamental particles of nucleus (nucleons); Concept of nuclides and its representation; Isotopes, Isobars and Isotones (with specific examples). Forces operating between nucleons (n-n, p-p, & n-p); Qualitative idea of stability of nucleus (nvo ratio).

Radiochemistry: Natural and artificial radioactivity; Radioactive disintegration series; Radioactive displacement law; Radioactivity decay rates; Half life and average life; Nuclear binding energy, mass defect and calculation of defect and binding energy; Nuclear reactions, Spallation, Nuclear fission and fusion.

# CH-102 Paper II : Organic Chemistry (2 hrs or 3 periods / week)

#### Unit-I

Mechanism of Organic Reactions: Homolytic and heterolytic bond cleavage. Types of reagents, electrophiles and nucleophiles. Reactive intermediates:—carbocations crucing intermediates, carbones, arynes and nitrenes (with examples). Types of organic reactions considerations. Includes of determination of reaction mechanism (procucal states intermediates, isotope effects, kinetic and stereochemical studies).

#### Unit-II

Stereochemistry of Organic Compounds: Concept of isomerism, Types of isomerism, Difference between configuration and conformation, Flying wedge and Fischer projection formulae.

Optical Isomerism: Elements of symmetry, molecular chirality, enantiomers, stereogenic centre, optical activity. Properties of enantiomers, chiral and achiral molecules with two stereogenic centres. Diastereomers, threo and erythro isomers, meso compounds. Resolution of enantiomers. Inversion, retention and racemization (with examples).

Relative and absolute configuration, sequence rules, D/L and R/S systems of nomenclature.

Geometric Isomerism: Determination of configuration of geometric isomers - cis/trans and E/Z systems of nomenclature. Geometric isomerism in oximes and alicyclic compounds.

Conformational Isomerism: Newman projection and Sawhorse formulae, Conformational analysis of ethane, n-butane, cyclohexane.

#### Unit-11

Alkanes and Cycloalkanes: IUPAC nomenclature of branched and unbranched alkyl group, classification of carbon atoms in alkanes. Methods of formation (with special reference of chartz reaction, Kolbe reaction, Corey-House reaction and decarboxylation of carboxyles areas.) Physical properties and chemical reactions of alkanes. Mechanism of free radical information orientation, reactivity and selectivity. Cycloalkanes - nomenclature, methods of formation, chemical reactions. Baeyer's strain theory and its limitations. Theory of strainless rings.

Alkenes, Cycloalkenes, Dienes and Alkynes: Methods of formation, mechanisms of dehydration of alcohols and dehydrohalogenation of alkyl halides. Regional electivity in alcohol dehydration - the Saytzeff rule, Hoffmann elimination. Physical properties and relative stabilities

Dy. Perisital (Acad.)

and free radical additions. Markownikoff's rule, hydroboration-oxidation, oxymercuration-reduction. Epoxidation, ozonolysis, hydration, hydroxylation and oxidation with KMnO<sub>4</sub>. Polymerization of alkenes. Substitution at the allylic and vinylic positions of alkenes.

Classification and Nomenclature of isolated, conjugated and cumulated dienes. Structure of allenes and butadiene. Methods of formation, properties, Chemical reactions - 1,2- and 1,4-additions, Diels-Alder reaction and polymerization.

Structure and bonding in alkynes. Methods of formation. Chemical reactions - acidity of alkynes; mechanism of electrophilic and nucleophilic addition reactions; hydroboration-oxidation; metal-ammonia reduction, oxidation and polymerization.

#### Unit-IV

Arenes and Aromaticity: Nomenclature of benzene derivatives. The aryl group, aromatic nucleus and side chain. Structure of benzene: molecular formula and Kekule structure. Stability and carbon-carbon bond lengths of benzene, resonance structure, MO diagram.

Aromaticity: the Huckei rule, aromatic ions — three to eight membered.

Aromatic electrophilic substitution: General pattern of the mechanism, role of the red complexes. Mechanism of nitration, halogenation, sulphonation, mercuration if the complexes and chioromethylation. Energy profile diagrams. Activating the decreasing substituents. Directive influence - orientation and ortho/para ratio. Side chain reactions of benzene derivatives. Birch reduction.

#### Unit-V

Alkyl and Aryl Halides: Methods of formation of alkyl halides, chemical reactions. Mechanisms of nucleophilic substitution reactions of alkyl halides S<sub>N</sub>2 and S<sub>N</sub>1 reactions with energy profile diagrams.

Polyhalogen compounds: Ch!oroform, earbon tetrachloride.

Methods of formation of aryl halides, nuclear and side chain reactions. The addition-elimination and the elimination-addition mechanisms of nucleophilic aromatic substitution reactions. Relative reactivities of alkyl, allyl, vinyl and aryl halides.

# CH-103 Paper III: Physical Chemistry (2 hrs. or 3 Periods/week)

#### UNIT-I

Mathematical Concepts: Logarithmic relations, curve sketching, linear graphs and cake tions of slopes, differentiation of functions like  $k_x$ ,  $e^x$ ,  $x^y$ , sinx and log x; maxima and minimal fartist differentiation and reciprocity relations, integration of some useful/relevant sunctions, permutations and combinations, factorials, probability.

Liquid State: Intermolecular forces, structure of liquids (a qualitative description). Structural differences between solids, liquids and gases. Liquid crystals: Difference between liquid crystal, solid and liquid. Classification, structure of nematic and cholestric phases. Thermography and seven segment cell.

31

Dy. Registres Acid

#### UNIT- II

Gaseous States: Postulates of kinetic theory of gases, deviation from ideal behavior van der Waals equation of state.

Critical Phenomenon: PV isotherms of real gases, continuity of states, the isotherms of van der Waals equation, relationship between critical constants and van der Waals constants, the law of corresponding states, reduced equation of state.

Moiecular velocities: Root mean square, average and most probable velocities. Qualitative discussion of the Maxwell's distribution of molecular velocities, collision number, mean free each and collision diameter. Liquification of gases (based on Joule-Thomson effect.)

#### UNIT- III

Solid State: Definition of space lattice, unit cell.

Laws of crystallography- (i) Law of constancy of interfacial angles (ii) Law of rationality of indices (iii) Law of symmetry. Symmetry elements in crystals.

Basic concept of X-ray diffraction by crystals. Derivation of Bragg's equation Determination of Crystal structure of NaCl and CsCl (Laue's method and powder method), band theory of solids. Defects in solids

#### **INIT IV**

Colloidal State: Definition of colloids, classification of colloids.

Solids in liquids (sols) properties-kinetic, optical and electrical, stability of colloids Projective action, Hardy-Schulze law, gold number.

Liquids in solids (gels): classification, preparation and properties, inhibition, general applications of colloids.

Liquids in liquids (emulsions): types of emulsions, preparation. Emulsifier

#### INIT V

Chemical Kinetics: Chemical kinetics and its scope, rate of a reaction, factors influencing the rate of a reaction, concentration, temperature, pressure, solvent, light, catalyst. Concentration dependence of rates, mathematical characteristics of simple chemical reactions - zero order, first order, second order; pseudo order, half-life and mean-life. Determination of the order of reactions - differential method, method of integration, method of half-life period and isolation method.

Radioactive decay as a first order phenomenon.

Experimental methods of chemical kinetics: conductometric, potentiometric, optical methods, polarimetry and spectrophotometry. Theories of chemical kinetics. Effect of temporal methods, polarimetry and spectrophotometry. Theories of chemical kinetics.

Simple collision theory based on hard sphere model transition state theory hypothesis). Expression for the rate constant bases on equilibrium constant and aspects.

# Practical: CH -104: Leberatory Course -I (4 hrs or 6 periods / week)

#### INORGANIC CHEMISTRY

Separation and identification of six radicals (3 cations and 3 anions) in the given inorganic mixture including special combinations.

Dy Regissages

#### CREANIC CHEMISTRY

#### Laboratory Techniques

- (a) Determination of melting point (naphthalene, benzoic acid, urea, etc.); boiling point (methanol, ethanol, cyclohexane, etc.); mixed melting point (urea-cinnamic acid, etc.).
- (b) Crystallization of phthalic acid and benzoic acid from hot water, acetanilide from boiling water, naphthalene from ethanol etc.; Sublimation of naphthalene, camphor, etc.

#### Qualitative Analysis

Element Detection (N, S and halogens). Functional group determination (unsaturation, phenolic, alcoholic, carboxylic, carbonyl, ester, carbohydrate, amine, amide, nitro) in simple organic solids and liquids.

#### PHYSICAL CHEMISTRY

(One of the following experiments should be given in the examination)

#### (i) Chemical Kinetics:

- (a) To determine the specific reaction rate of the hydrolysis of methyl acetate/ethyl acetate catalyzed by hydrogen ions at room temperature.
- (b) To study the effect of acid strength on the hydrolysis of an ester.
- (c) To compare the strengths of HCl and H<sub>2</sub>SO, by studying the kinetics of living vers of ethyl acetate.
- (d) To study kinetically the reaction rate of decomposition of iodide by H<sub>2</sub>O (ii) Viscosity, Surface Tension:
  - (a) To determine the viscosity/surface tension of a pure liquid (alcohol etc.) at room temperature. (using the Ostwald viscometer/st\_logmometer).
  - (b) To determine the percentage composition of a given binary mixture by surface tension method (acetone & ethyl methyl ketone).
  - (c) To determine the percentage composition of 4 given mixture (non-interacting systems) by viscosity method.
  - (d) To determine the viscosity of amyl alcohol in water at different concentration and calculate the excess viscosity of these solutions.

#### Note:

- 1. There will be 5 questions in each paper. All questions are compulsory. Candicate has to answer all questions in the main answer book only.
- 2. Q. No. 1 will have 18 very short answer type Questions (not more than 20 words) of half marks each covering entire syllabus.
- 3. Each paper is divided into four units. There will be one question from each unit. These Q. No. 2 to 5 will have internal choice.

Dy. Registrar (Acad.)
University of Rejesther
University of Property of Paris 1 Alpur

## Paper-I Cell Biology, Genetics and Plant Breeding (2 hrs /week) Unit-1

Cell emprelles and Nuclear material: Ultrastructures and functions of different cell organelles (cell wall, plasma membrane, nucleus, mitochondria, chloroplast, ribosome, peroxisomes, Lysosome, Golgi bodies and Endoplasmic Reticulum), Chromatin structure & Chromosome organization: eukaryotic and prokaryotic. Chromosome morphology; specialized types of chromosomes (Sex chromosomes, lampbrush Chromosome, Polytene chromosome); transposons.

#### Unit-2

Cell divisions: Cell cycle, mitosis: stages, structure and functions of spindle apparatus; anaphasic chromosome movement, Meiosis: its different stages- Meiosis I, Meiosis II, synaptonemal complex, chiasmata formation and crossing over.

Basis of genetic material: Griffith's transformation experiment and The Hershey and Chase tlender experiment to demonstrate DNA as the genetic material. Concept of Gene: Neurospora genetics: one gene one enzyme hypothesis:

An idea about Prokaryotic and eukaryotic structure of gene - operon concept, exons and introns.

Extra nuclear genome: mitochondrial and Chloreplast genome, plasmids;

Chromosomal aberrations: Deletion, duplication, translocation, inversion, Aneuploidy and polyploidy.

#### Unit-3

Genetic inheritance: Mendel's laws of inheritance and their exceptions; alleliciling co-dominance, lethality) and non-allelic interactions (complementary genes deplicate genes). Quantitative inheritance: grain color in wheat, corolla lengt tabacum.

Cytoplesmic inheritance-maternal influence, shell coiling in snails, Kappa periodes in Paramaecium, Multiple allelism: ABO blood groups in men

#### Unit-4

Plant Breeding: Introduction and objectives of plant breeding; general methods of plant breeding- in self-pollinated cross-pollinated and vegetatively propagated crop plants :Introduction and acclimatization, selections, hybridizations, hybrid vigour and inbreeding depression. Role of mutation and polyploidy in plant breeding. Famous Indian and international plant breeders and their contribution. National and International agricultural research institutes.

By Registrar (Acada)

University of IAIPUR

Plant breeding work done on wheat and rice in India, Green revolution

#### Suggested Laboratory Exercises.

- · Study of cell structure from Onion, Hydrilla and Spirogyra.
- · Study of cyclosis in Tradescantia spp.
- · Study of plastid for pigment distribution in Lycopersicom, Cassia and Capsicum
- · Study of electron microphotographs of eukaryotic cells for various cell organille
- Study of electron microphotographs of virus, bacteria and eukaryotic cells for comparative study of cellular organization.
- Study of different stages of mitosis and meiosis in root-tip cells and flower buds respectively of onion.
- To solve genetic problems based upon Mendel's laws of inheritance: Monnhybrid, Dihybrid, Dack cross and test cross.
- Permanent slides/photographs of different stages of mitosis and meiosis, sex chromosomes, polytene chromosome and salivary gland chromosomes,
- · Emasculation, bagging & tagging techniques
- Cross pollination techniques

### Paper II

## Microbiology. Mycology and Plant Pathology

(2 hrs /week)

### Unit-1

Microbiology: Meaning and Scope, history and development in the field of microbiology.

Concept of quorum sensing and biofilm

Eubacteria: general account, occurrence, morphology (structure, shapes), flagelia: characteria: nutritional types, endospore, reproduction (binary fission, transformation, conjugaçõe transduction) economic and biological importance.

Mycoplasma: occurrence, morphology, reproduction and importance.

### Unit-2

Virus: General characteristics and importance Structure of TMV and Pox virus, Structure and multiplication of Bacteriophage.

Fungi: General characters, occurrence, thallus organization, reproduction, economic importance. Classification of fungi (Alexopoulos and Ainsworth's).

Plant diseases: Biotic and abiotic diseases, important symptoms caused by fungi, bacteria, viruses and MI Os (blights, mildews-downy and powdery, rusts, smuts, canker, mosaic, little leaf, galls etc.).

### Unit-3

Brief account, structure, importance and life history and/or disease cycle and control of the following:

Alhago and white rust; Sclerospora and Downy mildew/Green ear disease of Bajra; Aspec Cianaceps and Lagot; Peziza.

### Unit-4

Breef account, structure, importance and life history and/or disease cycle and control of the following:

Precimin and Black rust of wheat; Usulago and loose smut of wheat and covered smut of barley; Agericus. Alternaria and early blight of potato

## Suggested Laboratory Exercises:

- 1. Study of hacteria using curd or any other suitable material, Gram's staining of bacteria.
- 2 Study of Mycoplasma, TMV, Poxvirus, bacteriophage (photographs/ 3-D models)
- 3 Study of symptoms of plant diseases. Downy mildew of Bajra, Green ear of bajra, Postery milder, mosaic of blinds

Dy. Registrat (Acad.)

Dy. Registrat (Acad.)

University of Rejustration

University AIPUR

- Study of specimen, permanent slides and by making suitable temporary slides: Albugo-4. white rust; Sclerospora- downy mildew, green ear; Aspergillus; Claviceps- ergot; Ustilaxo- loose smut of wheat, covered smut of barley, Puccinia- Black rust of wheat; Aguricus: Peziza and Alternaria- early blight of potato it visit a Local Bolamical Charlen Aill
- Media preparation: potato dextrose agar, Nutrient agar of study of Plantin furnis fild Agrecult 5.
- 6. Culture techniques of fungi and bacteria.

# Paper III Algae. Lichens and Bryophyta (2 hrs/week)

### Unif-1

General characters, Classifications (Smith) Diverse Habitat. Range of thallus structure, photosynthetic pigments and food reserves. Reproduction (Vegetative, Asexual, Sexual). Types of the life cycle: Economic importance.

#### Unit-2

Type Studies

Cyanophyceae - Oscillatoria, Nostoc

Chlorophyceae-Volvox, Chara.

Xanthophyceae-Vaucheria.

Phaeophyceae-Ectocarpus

Rhodophyceae-Polysiphonia.

### Unit-3

General characters, Origin, and evolution of Bryophtya. Classification (Eichler); Habitat, Range of thallus structure, Reproduction (Vegetative and Sexual); Alternation of generations; Economic importance.

Type Studies: Hepaticopsida - Riccia, Marchantia

### Unit-4

Type Studies: Anthoccrotopsida- Anthoceros, Bryopsida- Funaria

Lichens- General characters, habitat Structure, reproduction and economic and Ecological importance lichens.

### Suggested Laboratory Exercises

- 1 Study of class work material by making suitable temporary slides and study of permanent slides of Oscillatoria, Naster, India Chara, Venicheria, Ectocarpus Polysiphonia.
- 2 Study of external morphology and preparation of suitable sections of vegetative/reproductive parts of Riccia, Marchantia, Anthoceros, Funaria.
- 3 Study of lichens.

# **ZOOLOGY**

# **B.Sc.-B.Ed.**( Part-I) 2020

Scheme:

Max. Marks: 100 Min. Pass Marks: 36

Paper I: 3 Hrs duration33 MarksPaper II: 3 Hrs duration33 MarksPaper III: 3 Hrs duration34 Marks

Practicals : 4 Hrs. duration 50 Marks

### NOTE:

1. There will be two parts of every theory question paper with a total duration of 3 hours. First part of question paper will comprise of question No. 1 containing 9 (Paper I & II) or 10 (Paper III) very short answer (Maximum 25 words) type questions, each of 1 mark. This part is compulsory to attempt. Questions should be evenly distributed covering the entire syllabus.

Second part of question paper will be of long answer type questions having three sections. There will be total 9 questions (Q. No. 2 to 10) in this part, *i.e.*, three from each unit /section out of which candidate will be required to attempt any 4 questions selecting at least one question from each unit/section. Each question will carry 6 marks.

2. The candidate has to answer all questions in the main answer book only.

# PAPER -- I: Z-101 DIVERSITY OF ANIMALS

# Section - A

# Biosystematics and Taxonomy

- 1. General principles of taxonomy, concept of five kingdom scheme, international code of nomenclature, cladistics, molecular taxonomy.
- 2. Concept of Protozoa and Metazoa, and levels of organization.
- 3. Taxonomy and basis of classification of non-chordata and chordata: symmetry, coelom, segmentation and embryogeny.
- 4. Detailed classification of Non- chordata and Chordata (up to suborders with examples).

## Section - B

Habitat, Habit, Morphology, Structure, \*Locomotion, Organs and Systems (Digestive, Excretory, Respiratory, \*Osmoregulation, Nervous & Reproductive), Life Cycle, \*Affinities and \*Adaptations.

Note: \* indicates wherever required

Dy. Registrar (Academic-I)
University of Rajasthan
Jaipur

## 12. Nucleic Acids:

- (i) DNA structure, polymorphism (A, B and Z types) and replication (semi conservative mechanism) experiments of Messelson and Stahl: elementary idea about polymerases, topoisomerases, single strand binding proteins, replicating forks (both unidirectional and bidirectional), leading and lagging strands, RNA primers and Okazaki fragments, elementary idea about DNA repair.
- (ii) RNA structure and types (mRNA, rRNA and tRNA) and transcription.
- 3. Genetic code and translation: Triplet code, characteristics of triplet code, protein synthesis (translation).

## 4. Cell in reproduction:

- (i) Interphase nucleus and cell cycle: S, G-1, G-2 and M phase.
- (ii) Mitosis: Different stages, structure and function of spindle apparatus; anaphasic movement.
- (iii) Meiosis: Different stages, synapses and synaptonemal complex, formation of chiasmata and significance of crossing over.

## Section - C

### Genetics

- 1. Mendelism: Brief history of genetics and Mendel's work; Mendelian laws, their significance and current status, chromosomal theory of inheritance.
- 2. Chromosomal mutations: Classification, translocation, inversion, deletion and duplication; Variations in chromosome numbers; haploidy diploidy, polyploidy, aneuploidy, euploidy and polysomy.
- 3. Linkage and crossing over, elementary idea of chromosome mapping.
- 4. Genetic interaction: Supplementary genes, complementary genes, duplicate genes, epistasis, inhibitory and polymorphic genes.
- 5. Multiple gene inheritance: ABO blood groups and Rh factor and their significance.
- 6. Cytoplasmic inheritance.
- 7. Sex determination in *Drosophila* and man, pedigree analysis.
- 8. Genetic disorders: Down's, Turner's and Klinefelter's syndromes, color blindness, Hemophilia, Phenylketonuria.
- 9. Concept of gene: Recon, muton and cistron.

# PAPER – III: Z-103 GAMETE AND DEVELOPMENTAL BIOLOGY

# Section - A

# Developmental Biology: Scope and Early Events

- 1. Historical review, types and scope of embryology.
- 2. Gametogenesis:
  - (i) Formation of ova and sperm.
  - (ii) Vitellogenesis.
- 3. Fertilization: Activation of ovum, essence of activation: Changes in the organization of the egg cytoplasm.
- 4. Parthenogenesis.

Dy. Registrar (Academic-I) University of Rajasthan Jaipur 5~

## Section - B

## **Developmental Biology: Pattern and Processes**

- 1. Cleavage: Definition, planes and patterns of cleavage among non chordates and chordates, significance of cleavage, blastulation and morulation.
- 2. Fate maps, morphogenetic cell movements, significance of gastrulation.
- 3. Embryonic induction, primary organizer, differentiation and competence.
- 4. Development of chick up to 96 hours stage.
- 5. Embryonic adaptations:
  - (i) Extra embryonic membranes in chick, their development and functions.
  - (ii) Placentation in Mammals: Definition, types, classification on the basis of morphology and histology, functions of placenta.
  - (iii) Paedogenesis and neoteny.

## Section - C

## Dimensions in Developmental Biology

- 1. Regeneration.
- 2. Various types of stem cells and their applications.
- 3. Cloning of animals:
  - (i) Nuclear transfer technique.
  - (ii) Embryo transfer technique.
- 4. Teratogenesis (Genetic and Induced).
- 5. Biology of aging.
- 6. Cell death.

# B.Sc.-B.Ed.( Part-I) 2020 Practical – Zoology

### Min. Marks: 18

4 Hrs. / Week

Max. Marks: 50

## I. Microscopic Techniques:

- 1. Organization and working of Optical Microscope: Dissecting and compound microscopes.
- 2. General methods of microscopic slide preparations: Narcotization; fixing and preservation; washing; staining; destaining; dehydration; clearing and mounting.
- 3. General idea of composition, preparation and use of:
  - (i) Fixatives: Formalin, Bouin's fluid.
  - (ii) Stains: Aceto-carmine, Aceto-orcein, Haematoxylin, Eosin.
  - (iii) Common reagents: Normal saline, Acid water, Acid alcohol and Mayer's albumin.
- 4. Collection and Culture Methods:
  - (i) Collection of animals from their natural habitat during field trips such as Amoeba, Paramecium, Euglena, Daphnia, Cyclops, etc.
  - (ii) Culture of *Paramecium* in the laboratory and study of its structure, life processes and behavior in live state.

Ry Man

Dy. Registrar (Academic-I) University of Rajasthan Jaipur

# II. Study of Microscopic Slides and Museum Specimens:

Protozoa: Amoeba, Euglena, Trypanosoma, Giardia, Entamoeba, Elphidium (Polystomella), Foraminiferous shells, Monocystis, Plasmodium, Paramecium, leishmania, Paramecium showing binary fission and conjugation, Opalina, Nyctotherus, Balantidium, Vorticella.

Porifera: Leucosolenia, Euplectella, Spongilla, T. S. Sycon, Spicules, Spongin fibers, Gemmules.

Coelenterata: Millepora, Physalia, Velella, Aurelia, Alcyonium, Gorgonia, Pennatula, Sea anemone, Stone corals, Obelia colony and medusa.

Ctennophora: Any Ctenophore

Platyhelminthes: Taenia, Planaria, Fasciola (WM), T. S. body of

Fasciola, Miracidium, Sporocyst, Redia and CercariaLarvae of Fasciola, Scolex, T. S. mature proglottid of Taenia,

gravid proglottid, Cysticercus larva.

Aschelminthes: Ascaris, Wuchereria, Dracunculus

Annelida : Neries, Heteroneries, Arenicola, Aphrodite, Chaetopterus,

Tubifix, Glossiphonia, Pontobdella, Polygordius.

## III. Anatomy:

Earthworm: External features, general viscera, alimentary canal, reproductive system and nervous system.

Leech: External features, alimentary canal, reproductive and nervous system.

IV. Study of the Following Through Permanent Slide Preparation: Paramecium, Euglena, Foraminiferous shells, Sponge spicules, Spongin fibres, Gemmule, Hydra, Obelia colony and Medusa; Parapodium of Nereis and Heteronereis.

# V. Exercises in Cell Biology:

- 1. Squash preparation for the study of mitosis in onion root tip, permanent slides of mitosis (all stages).
- 2. Squash preparation for the study of meiosis in grasshopper or cockroach testes, permanent slice of meiosis (all stages).
- 3. Study of giant chromosomes in salivary glands of *Chironomous* or *Drosophila* larva.
- 4. Study of cell permeability using mammalian R.B.C.

### VI. Exercises in Genetics:

### A. Study of *Drosophila*:

- 1. Life cycle and an idea about its culture
- 2. Identification of male and female
- 3. Identification of wild and mutants (yellow body, ebony, vestigial wing and white eye)
- 4. Study of permanent prepared slides: Sex comb and salivary gland chromosomes.

B. Numerical problems based on monohybrid and dihybrid cross.

C. Identification of blood groups (A, B, AB, O & Rh factor)

Dy. Registrar (Academic-I)
University of Rajasthan
Jaipur ۲۰۰

Max. Marks: 50

## J VII. Developmental Biology:

- 1. Study of development of frog/toad with the help of Charts/Slides/Models:
  - (i) Eggs, cleavage, blastula, gastrula, neurula, tail-bud, hatching, mature tadpole larvae, metamorphic stages, toadlet / froglet.
  - (ii) Histological slides: Cleavage, blastula, gastrula, neurula and tail-bud stage.

# 2. Study of development of chick with the help of whole mounts/Charts/Slides/Models

- (i) 18 hrs, 21 hrs, 24 hrs, 33 hrs, 48 hrs, 72 hrs and 96 hrs of incubation.
- (ii) Primitive streak stage in living embryo, if possible, after removal of the blastoderm from the egg.
- (iii) Study of the embryo at various stages of incubation in vivo by making a window in the egg-shell may also be demonstrated.
- (iv) Study of various foetal membranes in a 10-12 day old chick embryo.

### Notes:

Time: 4 Hrs.

- 1. Anatomy: Study of systems of the prescribed types with the help of dissection.
- 2. With reference to microscopic slides, in case of non-availability, the exercise should be substituted with diagrams / photographs.
- 3. Candidates must keep a record of all work done in the practical class and submit the same for inspection at the time of the practical examination.
- 4. The candidates may be asked to write detailed methodology wherever necessary and separate marks may be allocated for the same.
- 5. Mounting material for permanent preparations would be as per the syllabus or as available through collection and culture methods.
- 6. It should be ensured that animals used in the practical exercises are not covered under the wild life act 1972 and amendments made subsequently.

### Paper-I: Mechanics & Oscillations

Work Load: 2 hrs. Lecture /week

Examination Duration: 3 Hrs.

Scheme of Examination: First question will be of nine marks comprising of six part of short answer type with answer not exceeding half a page. Remaining four questions will be set with one from each of the unit and will be of six marks each. Second to fifth question will have two parts namely (A) and (B) each carrying 3 marks. Part (A) of second to fifth question shall be compulsory and Part (B) of these questions will have internal choice.

### Unit - i:

Physical Law and frame of Reference

- (a) Inertial and non-inertial frames, Transformation of displacement, velocity, acceleration between different frames of reference involving translation.

  Galilean transformation and invariance of Newton's laws.
- (b) Coriolis Force: Transformation of displacement, velocity and acceleration between rotating frame, Pseudo forces, Coriolis force, Motion relative to earth, Focult's pendulum.
- (c) Conservative Forces: Introduction about conservative and non-conservative forces.

  Rectilinear motion under conservative forces, Liscussion of potential culture and motion of a particle.

### Unix - II:

### Centre of Mass

Introduction about Centre of Mass, Centre of Mass Frame: Collision of two particles in one and two dimensions (elastic and inelastic), Slowing down of neutrons in a moderator, Motion of a system with varying mass, Angular momentum concept, conservation and charge particle scattering by a nucleus.

Rigid body

Dy. Registrar
(Academic)

(AIPUR

I quation of a motion of a rotating body, Inertial coefficient, Case of J not parallel to or. Knietic energy of rotation and idea of principal axes. Processional motion of infining to:

15.11 - 111: Motion unifer Central Forces

Introduction about Central Forces, Motion under central forces, Gravitational interaction, Incrin and gravitational mass, General solution under gravitational interaction, Keplers I aws, Discussion of trajectories, Cases of elliptical and circular orbits, Rutherford-scattering.

Damned Harmonic Oscillations

Introduction about oscillations in a potential well, Damped force and motion under damping. Damped Simple Harmonic Oscillator, Power dissipation, Annarmonic oscillator and simple pendulum as an example.

### UEH - IV:

Driven Harmonic Oscillations

Driven harmonic oscillator with damping, Frequency response, Phase factor, Resonance, Series and parallel of LCR circuit, Electromechanical a Calvanometer.

Coupled Oscillations

Equation of motion of two coupled Simple Harmonic Oscillators, Normal modes motion in mixed modes. Transpent behavior, Dynamics of a number of oscillators with neighbor interactions.

W

### UnitEsaluand Vector Fields

Concept of Field, Scalar and Vector Fields, Gradient of scalar field. Physical significance and formalism of Gradient, Divergence and Curl of a vector field Cartesian co-ordinates system, Problems based on Gradient, Divergence and curl operators. Concept of Solid angle, Gauss divergence and Stoke's theorem. Gauss law from inverse square law. Differential form of Gauss law.

### Electric Field and Potential Energy .

Invariance of Charge, Potential energy of system of (i) Discrete N-charges (ii) Continuous charge distribution. Energy required to built a uniformly charged sphere, classical radius of electron, Electric field due to a short electric dipole, Interaction of electric dipole with external uniform and non uniform electric field, potential due to a uniformly charged sphericl shell.

Poisson's and Laplace equations in Cartesian co-ordinates and their applications to solve the problems of electrostatics.

Electric field measured in moving frames, Electric field of a point charge moving with constant velocity.

### Unit II: Electric field in matter

Multipole expansion, defination of moments of charge distribution, Dielectrics, Induced dipole moments, polar non polar molecules, Free and bound charges, Polarization, Atomic polarizabilty, electric displacement vector, electric susceptibility, dielectric constant, relation between them.

Electric potential and electric field due to a uniformly polarized sphere (i) out side the sphere (ii) at the surface of the sphere (iii) inside the sphere, Electric field due to a dielectric sphere placed in a uniform electric field (a) out side the sphere (b) inside the sphere, Electric field-due to a charge placed in dielectric medium and Gauss law, Clausius-Mossotti relation in dielectrics

# Unit III: Magnetostatics and Magnetic field in matter

Lorentz force, properties of magnetic field, Ampere's law, field due to a current carrying solid conducting cylinder (a) out side (b) at the surface and (ii) inside the cylinder. Ampere's law in differential form, Introduction of Magnetic Vector potential, Poisson's equation for vector potential, Peduction of Bio-Savart law using Magnetic Vector potentials, Differential form of Ampere's law.

Atomic magnet, Gyromagnetic ratio, Bohr-magneton, Larmor frequency, induced mangnentic moment and dia-magnetism, spin magnetic moment, para and ferromagnetism, Intensity of Magnetization, Magnetic permeability and Susceptibility, free and bound current denoities, Magnetic field due to a uniformly magnetized material and Non-uniformly magnetized material.

## Unit IV: Maxwell's Equations and Electromagnetic waves,

Displacement current, Maxwell's Equations, Electromagnetic waves, Electromagnetic waves in an Isotropic medium, Properties of electromagnetic waves, Energy density of Electromagnetic waves, Pointing vector, Radiation pressure of free space, Electromagnetic waves in Dispersive medium, Spectrum of Electromagnetic waves.

OPTICS

Work Load: 2 hrs. Lecture /week

Examination Duration: 3 Hrs.

Scheme of Examination: First question will be of nine marks comprising of six parts of short answer type with answer not exceeding half a page. Remaining four questions will be set with one from each of the unit and will be of six marks each. Second to little and will have two parts namely (A) and (B) each carrying 3 marks. Part (A) of second to question shall be compulsory and Part (B) of these questions will have intermal parts.

### Unit - 1 Interference:

Concept of Spatial and Temporal Coherence, coherence length, coherence time, Definition and propagation of a wave front Huygen's principle of secondary wavelets, Young's Double slit experiment. Types of interference, interference by division of wavefronts: Fresnel's Biprism, Measurement of wavelength  $\lambda$  and thickness of a thin transparent sheet, Interference by division of amplitude: Interference in thin films of constant thickness in transmitted and reflected waves. Interference produced by a wedge shaped film, Newton's rings, Determination of wavelength  $\lambda$  and refractive index  $\mu$  by Newton's Rings: fringes of equal inclination (Haidinger fringes) and equal thickness (Fizeau fringes), Michelson's Interferometer, shape of fringes, Measurement of wavelength, difference between two spectral lines and thickness of a thin transparent sheet.

### Unit - 2 Diffraction:

Fresnel's diffraction, Half period zones, Fresnel's diffraction at a circular aperture straight can and a rectangular slit. Zone plate, Multiple foci of zone plate, comparison between and convex lens, Fraunhofer diffraction by single slit and a circular aperture fraud diffraction by N parallel slits with two slits as a special case, Missing order, Plane diffraction grating and its use in determining wavelength, Dispersion by a grating, Rayleigh's crucion of resolution. Resolving power of a Telescope and a Grating.

### 1 nit - 3 Polarization:

Polarization. (i) Plane polarized light (ii) Circularly polarized light and (iii) Elliptically Polarized light, Production of Plane polarized light: (i) by reflection (ii) by refraction (iii) by

JABUR

double refraction and (iv) by dicaroism (Polaroid), Identification of polarized high Hayest's theory of double retraction. Production of Circularly and Elliptically Polarized light, Quarter wave and half wave plates. Analysis of polarized light, Optical activity. I away of optical Activity. Fresnel's explanation of optical activity, Experimental verification of Fresnel's theory. Specific rotation, Polarimeter, Types of Polarimeter: (i) Laurent's half shade polarimeter and (ii) Biquartz polarimeter.

### Unit - 4: Quantum Optics & Photonics

- (i) Langer Spontaneous and stimulated emission, Einstein's A & B coefficients, Energy density of radiation as a result of stimulated emission and absorption, population inversion, Methods of optical pumping, energy level schemes, He-Ne, Ruby, co. lasers.
- (ii) Holography: Basic concepts of Holography, principle of holography. Theory, construction and reconstruction of image, application of holography.
- (iii) Fiber Optics: Introduction of Optical Fiber, Necessity of Cladding, Optical fiber system, optical fiber cable. Total internal Reflection, Explanation of Propagation of through an optical fiber.

## Practical

Work Load: Four hours laboratory work per week

Examination Duration: Four hours

Minimum Experiments: Total sixteen taking eight from each section.

The colleges are free to set new experiments of equivalent standard. This should be intimated and approved by the Convener, Board of Studies before the start of academic session. It is binding on the college to have experimental set up of at least sixteen experiments listed below (8 from each section). In case number of experiment performed by the student is less than sixteen, his marks shall be scaled down in final examination on pro rate basis. Laboratory examination paper will be set by the external examiner by making pairs of experiments taking one from each section out of sixteen or more experiments available at the center. Different combinations shall be given for different batch.

### Section A

- 1. To study the variation of power transfer by two different loads by a Desopre and to verify maximum power transfer theorem.
- 2. To study the variation of charge and current in a RC circuit with a different time constant (using a DC source).
- 3. To study the behavior of a RC circuit with varying resistance and capacitance using AC mains as a power source and also to determine the impedance and phase relations.
- 4. To study the rise and decay of current in an LR circuit with a source of constant emf.
- 5. To study the voltage and current behavior of an LR circuit with an AC power source. Also determine power factor, impedance and phase relations.
- 6. To study the characteristics of a semi-conductor junction diode and determine ferward and reverse resistances.
- 7. To study the magnetic field along the axis of a current carrying circular coil. Plot the necessary graph and nence find radius of the circular coil.
- 8. To determine the specific resistance of a material and determine difference between two small resistance using Carey Fosters Bridge.
- 9. To convert a galvanometer into a animeter of a given range
- 10. To convert a galvanometer into a voltmeter of a given range.

### Section B

- 1 To study the random decay and determine the decay constant using the statistical board.
- 2. Using compound pendulum study the variation of time period with amplitude in large angle oscillations.
- 3. To study the damping using compound pendulum.

Pilas (acad.)

- study the excitation of normal modes and measure frequency splitting two coupled oscillators.
- 5. To study the frequency of energy transfer as a function of coupling strength using coupled oscillators.
- 6. To study the viscous fluid damping of a compound pendulum and determining damping coefficient and Q of the oscillator.
- 7. To study the electromagnetic damping of a compound pendulum and to find the variation of damping and Escients with the assistance of a conducting larmina.
- 8. To find J by Callender and Barne's Method.
- 9. To determine Young's modulus by bending of beam.
- 10. To determine Y, σ and η by Searle's method.
- 11. To ensure Curie temperature of Monel alloy.
- 12. To determine modulus of rigidity of a wire using Maxwell's needle.
- 13. Study of normal modes of a coupled pendulum system. Study of oscillations in mixed modes and find the period of energy exchange between the two oscillators.
- 14. To study variation of surface tension with temperature using Jaegger's med
- 15. To study the specific-rotation of sugar solution by polarimeter.

# **MATHEMATICS**

## B.Sc.-B.Ed. Part-I Examination-2020

Teaching: 3 Hours per Week per Theory Paper.

2 Hours per Week per Batch for Practical
(20 candidates in each batch)

Examination	Scheme:	Min.Pass Marks	Max. Marks	
Science –		54	150	
Arts –		72	200	
		Duration	Max.Marks	
Paper – I	Discrete Mathematics	3 hrs.	40 (Science) 53 (Arts)	
Paper – II	Calculus	3 hrs.	40 (Science) 53 (Arts)	
Paper – III	Analytic Geometry and	l		
	Optimization Theory	3 hrs.	40 (Science) 54 (Arts)	
Practical	Optimization Technique	s 2 hrs.	30 (Science) 40 (Arts)	

### Note:

- 1. Common paper will be set for both the Faculties of Social Science and Science. However, the marks obtained by the candidate in the case of Faculty of Social Science will be converted according to the ratio of the maximum marks of the papers in the two Faculties.
- 2. Each candidate is required to appear in the Practical examination to be conducted by internal and external examiners. External examiner will be appointed by the University and internal examiner will be appointed by the Principal in consultation with Local Head/Head, Department of Mathematics in the college.
- 3. An Internal/external examiner can conduct Practical Examination of not more than 100 (Hundred) Candidates.
- 4. Each candidate has to pass in Theory and Practical examinations separately.

# **Paper – I: Discrete Mathematics**

Teaching: 3 Hours per Week

Max. Marks: 40 (Science)

**Duration of Examination: 3 Hours** 

53 (Arts)

**Note:** This paper is divided into FIVE Units. TWO questions will be set from each Unit. Candidates are required to attempt FIVE questions in all taking ONE question from each Unit. All questions carry equal marks.

54

Dy. Registrar (Academic-I)
University of Rajasthan
Jaipur

- Unit 1: Sets, Cardinality, Principal of inclusion and exclusion, Mathematical induction, Relations and Functions, Binary relations, Equivalence relations and partitions, Partial order relations and Lattices, Chains and Anti-chains. Pigeon hole principle.
- Unit 2: Boolean Algebra- Lattices and Algebraic structure, Duality, Distributive and Complemented Lattices, Boolean Lattices, Boolean functions and Boolean expression.

Fundamental theorem of arithmetic, Divisibility in Z, Congruence's, Chinese reminder theorem, Euler's functions, Primitive roots.

- Unit 3: Logic and propositional calculus, Simple and compound propositions, Basic logical operations, Truth tables, Tautologies and contradictions, Propositional functions, Quantifiers. Discrete numeric functions, Generating functions, Recurrence relations and Recurrence algorithms, Linear recurrence relation with constant coefficients and their solutions, Total solutions, Solution by the method of generating functions.
- Unit 4: Basic concepts of graph theory, Types of graph (Connected Graphs, Regular graphs, Planar graphs), walk, Paths & Circuits, Shortest path problem. Operations on graphs (union, join, products)
- Unit 5: Matrix representation of graphs, Adjacency matrices, Incidences matrices, Tree, Spanning tree, Minimumm spanning tree, Distance between vertices, Center of tree, Binary tree, Rooted tree. Hamiltonian and Eulerian graphs

# Paper- II: Calculus

Teaching: 3 Hours per Week

Max. Marks: 40 (Science)

**Duration of Examination: 3 Hours** 

53 (Arts)

Note: This paper is divided into FIVE Units. TWO questions will be set from each Unit. Candidates are required to attempt FIVE questions in all taking ONE question from each Unit. All questions carry equal marks.

Unit 1: Series – Infinite series and Convergent series. Tests for convergence of a series – Comparison test, D'Alembert's ratio test, Cauchy's n-th root test, Raabe's test, De-Morgan-Bertrand's test, Cauchy's condensation test, Gauss's test, (Derivation of tests is not required). Alternating series. Absolute convergence. Taylor's theorem. Maclaurin's theorem. Power series expansion of a function. Power series expansion of sinx,  $\cos x$ ,  $e^x$ ,  $\log_e(1+x)$ ,  $(1+x)^n$ .

University of Rajasthan

Jaipur 🗸

\*Unit 2: Derivative of the length of an arc. Pedal equations. Curvature – Various formulae, Centre of curvature and Chord of curvature. Partial differentiation. Euler's theorem for homogeneous functions. Chain rule of partial differentiation. Total differentiation, Differentiation of implicit functions.

Unit 3: Envelopes and evolutes, Maxima and Minima of functions of two variables. Lagrange's method of undetermined multipliers. Asymptotes. Multiple points. Curve tracing of standard curves (Cartesian and Polar curves).

Unit 4: Beta and Gamma functions, Reduction formulae (simple standard formulae), Double integrals in Cartesian and Polar Coordinates, Change of order of integration. Triple integrals. Dirichlet's integral.

Unit 5: Areas, Rectification, Volumes and Surfaces of solids of revolution.

# Paper-III: Analytic Geometry and Optimization Theory

Teaching: 3 Hours per Week

Max. Marks: 40 (Science)

**Duration of Examination: 3 Hours** 

54 (Arts)

Note: This paper is divided into FIVE Units. TWO questions will be set from each Unit. Candidates are required to attempt FIVE questions in all taking ONE question from each Unit. All questions carry equal marks.

Unit 1: Polar equation of conics, Polar equation of tangent, normal and asymptotes, chord of contact, auxiliary circle, director circle of conics

Unit 2: Sphere, Cone.

Unit 3: Cylinder, Central Conicoids – Ellipsoid, Hyperboloid of one and two sheets, tangent lines and tangent planes, Direct sphere, Normals.

Unit 4: Generating lines of hyperboloid of one sheet and its properties. Reduction of a general equation of second degree in three-dimensions to standard forms.

Unit 5: The linear programming problem. Basic solution. Some basic properties and theorems on convex sets.. Fundamental theorem of L.P.P. Theory of simplex method only Duality. Fundamental theorem of duality, properties and elementary theorems on duality only.

## Practical

Teaching: 2 hours per week per batch not more than 20 students

Examination:		Duration: 2 H	ours
Scheme	Science	Arts	
Max.Marks	30	40	
Min.Pass Marks	11	15	
Distribution of Marks:			

Two Practicals one from each group

10 Marks each	=	20 Marks	(13 Marks each)	26
Practical Record	=	05 Marks		07
Viva-voce	=	05 Marks		07
Total Marks	=	30 Marks		40

The paper will contain TWO practicals. The candidates are required to attempt both practicals.

**Group A**: Modelling of industrial and engineering problems into Assignment Problems and Transportation Problems and their solutions.

Group B: List of problems (with free and open source software tool Scilab)

- (i) Plotting the graphs of the following functions: ax,  $\sqrt{ax+b}$ , |ax+b|,  $c\pm |ax+b|$ ,  $x^{\pm n}$ ,  $x^{1/n}$  ( $n \in \mathbb{Z}$ ),  $e^{ax+b}$ ,  $\log(ax+b)$ ,  $\sin(ax+b)$ ,  $\cos(ax+b)$ ,  $|\sin(ax+b)|$ ,  $|\cos(ax+b)|$ . Observe and discuss the effects of change in the real constant a, b and c on the graphs.
- (ii) Graphs of hyperbolic functions and inverse trigonometric functions.
- (iii) Plotting and analyzing the graphs of polynomials and their derivatives.
- (iv) Complex numbers: Operations like addition, subtraction, multiplication, division, Modulus and inbuilt functions conj, imag, imult, isreal, real.
- (v) Matrix operations: Addition, Multiplication, Inverse, Transpose, Determinant, Rank and inbuilt functions eye, ones, zeros. Solving the system of linear equations.
- (vi) Solution of linear programming problems by using inbuilt functions of Scilab.

### Note:

- 1. For Group A: Problems will be solved by using Scientific Calculators (non-Programmable)
- 2. Each Candidate (Regular/non-Collegiate) has to prepare his/her practical record.
- 3. Each Candidate has to pass in Practical and Theory examination separately.
